Network Connectivity

Intel® Desktop Adapters

Network Connection support policy

Intel develops network components used in motherboards and network adapters sold by OEM (Original Equipment Manufactures such as Dell*, HP*, Gateway*, or IBM*). Network connections that are built into the motherboard or network adapters sold by an OEM will be supported by the OEM. Intel will not provide support for OEM integrated network connections, mobile connections or OEM adapters.

Network components listed as a "Network Connection" (e.g. Intel® PRO/100 VE Network Connection, or Intel® PRO/1000 CT Network Connection) or "Mobile Connection" (e.g. Intel® PRO/1000 GT Mobile Connection, or Intel® PRO/1000 MT Mobile Connection) are supported by your OEM.

Generic Drivers & Software
Gigabit (1000 Mb) and 10/100 Mbps Network Adapter drivers are generic versions, and can be used for general purposes. However, computer original equipment manufacturers (OEMs) may have altered the features, incorporated customizations, or made other changes to the software or software packaging they provide. To avoid any potential installation incompatibilities on your OEM system, Intel recommends that you check with your OEM and use the software provided via your system manufacturer. Intel or the computer original equipment manufacturer (OEM) may not provide technical support for some or all issues that could arise from the usage of this generic version of software drivers.
