

STGBL6NC60D STGPL6NC60D

600 V - 6 A hyper fast IGBT

Datasheet — production data

Features

- Low C_{RES} / C_{IES} ratio (no cross-conduction susceptibility)
- Very soft ultra fast recovery antiparallel diode

Applications

- Very high frequency operation
- High frequency lamp ballast
- SMPS and PFC (including hard switching)

Description

This series of hyper fast IGBT is based on PowerMESH technology and exhibits very low turn-off energy, thanks to a new lifetime control system. This results in an optimized trade-off between on-state voltage and switching losses, allowing very high operating frequencies.
