Note

- The FDC05 (W) series required a minimum 10% loading on the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specification
- Simulated source impedance of 12uH. 12uH inductor on series with + Vin.
- The ON/OFF control is option function. There are positive logic and negative logic. The pin voltage is referenced to negative input
To order positive logic ON-OFF control add the suffix-P (Ex: FDC05-24S05-P)
To order negative logic ON-OFF control add the suffix-N (Ex: FDC05-24S05-N)
- BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40°C.
(Ground fixed and controlled environment)
- M1 version is more efficient, therefore, it can be operated in a more extensive temperature range than standard and M2 version.
- Heat sink is optional and P/N: 7G-0020A.
- Maximum value at nominal input voltage and full load of standard type.
- Typical value at nominal input voltage and full load.
- Test by minimum Vin and constant resistor load.
