Single Comparator

The TC75S59F/TC75S59FU/TC75S59FE is a CMOS general-purpose single comparator. The device can operate off a single power supply and draws a lower supply current than a conventional bipolar general-purpose comparator. This device's open-drain output stage can be wire-ORed with those of other open-drain output circuits.

Features

- Low-current power supply : $I_{DD} = 100 \mu A$ (typ.)
- Single power supply operation
- Wide common mode input voltage range: $V_{SS} \sim V_{DD} - 0.9 V$
- Open drain output circuit
- Low input bias current
- Small package

Maximum Ratings (Ta = 25°C)

Characteristics		Symbol	Rating	Unit
Supply voltage		V_{DD}, V_{SS}	± 3.5 or 7	V
Differential input voltage		DV_{IN}	± 7	V
Input voltage		V_{IN}	$V_{SS} \sim V_{DD}$	V
Output current		I_O	± 35	mA
Power dissipation	TC75S59F/FU	P_D	200	mW
	TC75S59FE		100	
Operating temperature		T_{opr}	-40~85	°C
Storage temperature		T_{stg}	-55~125	°C

Note: This device's CMOS structure makes it prone to latch-up. To prevent latch-up, please take the following precautions:

- Ensure that no I/O pin's voltage level ever exceeds V_{DD} or drops below V_{SS} . In addition, check the power-on timing.
- Do not subject the device to excessive noise.

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
