GLARE SCREEN, GLARE SCREEN +

Reduce glare by over 99%.

Key Features

- ▶ **Reduces ELF/VLF E-field radiation by 99.9%.**
- ▶ **Made from high-quality optical glass.**
- ▶ **Increases display contrast by up to 3 times.**
- ▶ **Accepted by the American Optometric Association.**

The Glare Screen is made of optical-quality float glass. The HighContrast™ feature provides maximum contrast enhancement for brighter colors and images when used with color monitors.

The glass is cut to size, then edge-glare coating is vacuum deposited; this virtually eliminates

glare from the front surface! The anti-glare coating is also a conductive coating to provide ELF/VLF E-field shielding.

The Glare Screen is easy to attach to your monitor with universal clips. Connection to ground is provided by a wire with a specially designed three-prong

plug that fits all standard U.S. and Canadian electrical outlets.

The Glare Screen+ has a wraparound design for curved monitors.

Specifications

Power: 110-V plug for antistatic cord for ground only, hot and neutral are not wired

Size: 14- or 15-inch monitors
