CrucialTM Desktop DRAM

Improve desktop performance with Crucial DRAM

Desktop systems are essential business tools at both work and home. And whether that system is old or new, a PC or Mac, Crucial can help—because a memory upgrade from Crucial is one of the most affordable ways to improve system performance.

Affordable and effective

Crucial reliability and affordability make these products the perfect solution for desktop upgrades. Easy to find, easy to buy, and easy to install, Crucial DRAM is rigorously tested, premium-quality, and is a part of Micron—one of the largest DRAM manufacturers in the world.

A trusted name

With over a decade in the DRAM business, Crucial is a recognized name in memory products. Price-competitive, high-quality, and reliable, Crucial DRAM is backed by industry-leading warranties and outstanding service and support. And because they're available in a wide range of speeds and capacities, there's an ideal Crucial DRAM upgrade for nearly every user.

Crucial Desktop Memory

- SDRAM, DDR, DDR2 and DDR3 options
- Wide range of speeds and capacities
