

DESCRIPTION

Coto's Molded DYAD dry reed switch is ideally suited for small signal switching applications. This switch has sputtered ruthenium contacts and an extraordinary seal strength achieved by a patented laser sealed glass. In low level dry switching environments, this switch typically provides > 1 billion operations. It has hermetically sealed contacts and offers a wide range of available magnetic sensitivities. In addition, the molding process provides a solid plastic outer shell. This plastic shell provides superior mechanical strength, eliminates concerns over handling glass switches, and provides an ideal solution for high speed, automated assembly environments.

FEATURES

- Small size
- SMT-compatible
- Easily formed leads
- Sputtered ruthenium contacts
- Hermetically sealed contacts
- Fast switching speed - up to 500Hz
- Wide range of available magnetic sensitivities
- Superior mechanical strength
- Enhanced for better auto placement
- RoHS Compliant 

APPLICATIONS

- Security
 - proximity sensors
 - smoke alarms
- Automotive
 - level sensor
 - lamp current sensor
- Relays

SPECIFICATIONS
