New 11053 Large Gauge Wire Stripper/Cutter for Stranded Wire

Expanding the Klein-Kurve® product line, Klein Tools introduces a new 6-12 AWG stranded wire stripper/cutter for industrial MRO applications. The versatile 11053 is the optimum choice for stripping 6 AWG stranded wire, eliminating the need for a skinning knife.

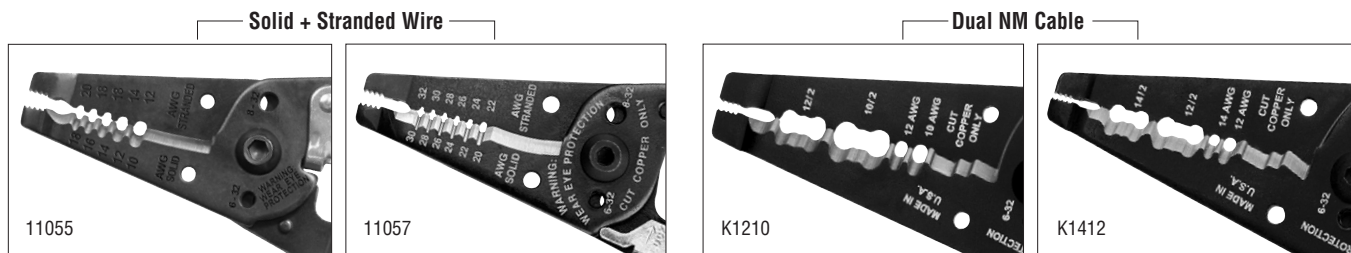

The exclusive curved handle design and double-dipped textured grips provide control and comfort while stripping and cutting. This multifunctional, lightweight tool easily strips, cuts, loops and gauges 6-12 AWG stranded wire, plus cleanly shears 6-32 and 8-32 screws. The serrated pliers nose allows the user to pull, grip, and twist wire with minimal pressure.

Designed to get the job done with precision and quality, professionals prefer the Klein-Kurve® wire stripper series featuring US-made tool steel that is heat treated for durability, black oxide finish for corrosion resistance, precision ground stripping holes to eliminate damage to the conductor, and shear type cutting blades for clean and precise cuts.
