# Omron Electronic Components LLC

## Stability and Experience

With over 70 years experience, Omron continues to apply the latest technologies providing you with innovative efficient control component solutions. Our wide range of relays, switches, sensors, and connectors allows our customers to streamline vendor lists and reduce the cost of procurement.

## Quality First

### Our commitment, your benefit

Omron makes a conscious choice to relentlessly pursue quality. Our quality engineers are part of the design and manufacturing from the start. We design and evaluate at the component level, test and adjust during manufacturing, and examine every physical, mechanical, and electrical aspect of each final product before it leaves the factory.

## Customer Support

Omron's sales engineers, inside sales representatives, and customer service staff have experience with all types of electronic applications. No matter what the application or volume, we will find just the right component for your project.

## RoHS Compliant Products

Most of Omron's electronic components are already compliant, and we are striving for 100% compliance by mid 2006.

## Broad Product Offering

### Relays, The #1 Supplier In The World:

- MOS FET
- Low Signal
- RF/HF
- Power PCB
- Automotive
- General-Purpose
- Solid State

### Switches:

- Snap Action
- Tactile
- DIP
- Dome Array
- Thumbwheel
- Rocker

### Photomicrosensors:

- Slotted
- Reflective

### Micro Sensors:

- Pressure
- Tilt
- Flow
- Shock/Vibration
- Clog Filter

### Connectors

- FPC
- FFC

Additional information can be found at [www.components.omron.com](http://www.components.omron.com), or by calling us at: 847.882.2288 Monday through Friday 7:30 AM until 6:00 PM CST. Our inside sales staff will be ready to provide you with detailed product information, technical design support, or the location of your local Omron sales office or authorized distributor.

\* Sealed Snap Action switches are available on pages 26 & 27.

# Omron History & Profile

## History:

Omron was founded May 10, 1933 in Kyoto, Japan, by founder Kazuma Tateisi. The first product developed and released by Omron was a timer for X-ray equipment. Since then, Omron has expanded globally and produced a steady stream of breakthroughs in electronic components that have contributed to the improvement of productivity in many different industries. Omron's consistent striving to accurately anticipate the potential needs of society and develop businesses to satisfy those needs has made the Omron Group what it is today. Dr. Tateisi's passion and progressive attitude are instilled to this day in all Omron employees, and the challenge-oriented spirit remains the main source of Omron's identity. By consistently preserving the spirit and philosophy of Omron's founder, we are determined to continue meeting the challenges of creating a better tomorrow.

## Achievements:

- December 1943 – Development of Japan's first precision switch; established Omron (then Tateisi Electric) as a 'technological pioneer' in Japan.
- 1948 – Establishment of Omron Tateisi Electronics Co. coincided with the successful development and production of a new current limiter integrating Omron's precision switch and protective relay technologies.
- 1955-1965 – Launched the full-scale production of control components and the introduction of a steady stream of new products including advanced precision switches & compact protective relays.
- 1960 – Development of the innovative solid-state proximity switch and solid-state relay.
- 1963 – Introduction of the world's first automatic meal-ticket vending machine.
- 1969 and 1971 – Development of the first off-line and on-line automatic cash dispensers which established Omron as one of the pioneers of the banking revolution in Japan.
- 1967 – Completion of the world's first automated train station system achieved by drawing on the company's advanced card system technology.
- January 1990 – the company was renamed to Omron Corporation and marked a commitment to continue expansion of business lines and global-scale production.
- April 1999 – Omron establishes a strategic system of five specialized, independent business units.
- 2002 – Establishment of Omron China to accelerate market expansion in to China and Asia-Pacific.

## Profile:

Omron Corporation is a \$5.5 billion global leading supplier of electronics and control system components and services.

## Omron Business Fields:

### Electronic Components Business

### Industrial Automation Business

### Automotive Electronics Business

### Social System Business

### Healthcare Business

# Omron's Core Competencies, Technologies & Markets Served

## Design Synthesis:

Our products' designs are based on a combination of our core competencies and core technologies to effectively meet customer and market needs. By efficiently and creatively manipulating these competencies, we are able to develop and manufacture a broad offering of cost effective, high quality, and environmentally friendly products. As the global market's demand for new and innovative products continues to grow, Omron pledges to expand its research and development of new core technologies.

## Commitment to the Environment:

Omron is committed to creating products that are designed with consideration for the environment throughout their entire lifespan (what we call "Eco-Products"). These considerations address energy and resource conservation, extended product life, reuse and recycling, as well as avoidance of hazardous chemical substances. Our goal is to make a proactive contribution to reducing the harm caused by our societal system to the environment through the development of more environmentally sound products.

# Relays - DC Power

The switching and driving sections are isolated, gas injected and hermetically sealed. This advanced construction requires no arc space, saves space, & helps ensure safety.

			
<b>General Attributes</b>	<b>G9EA</b>	<b>G9EB</b>	<b>G9EC</b>
<b>Model</b>	<b>G9EA-1(-B)</b>	<b>G9EA-1(-B)-CA</b>	<b>G9EB (-1B)</b>
<b>Classification</b>	Switching/current conduction	High-current conduction	Switching/current conduction
<b>Features</b>	Standard compact model carries/switches 400VDC, 60A loads	Carries 100A Low contact resistance when carrying current	Smallest in series 250VDC, 25A loads
<b>Contact Information</b>			
<b>Contact Form</b>	SPST-NO	SPST-NO	SPST-NO

# Designed to "Drop-In" Your Application.

Omron Electronic Components has a great variety of standard options. We can deliver a snap action switch that will drop right into your application. Saving you time, component counts, & cost while improving your products overall quality.

These options include:

## Actuators:

- Long & short panel mount plungers
- Long & short spring plungers
- Hinge levers in various lengths & orientation
- Roller levers in various lengths & orientations
- Simulated roller
- Leaf

## Termination styles:

- PCB
- Solder
- Quick Connect
- Screw
- Wire Leads
- Connector

## Additional Features:

- Sealed / Unsealed versions available.
- Class N (200C) types available.  
(D3V-T)

Contact Omron Components and have it your way. Configure a switch that meets your application needs.

## Plunger & Lever Options

## Terminal Options

# Micro Sensors - MEMS

## Mass Air Flow 1~5L

Dimensions mm (in)	D6F		
15H x 20D x 66W (0.60 x 0.79 x 2.60)			
Features	Detects –		
	• Breath rate in respiratory equipment • Natural gas flow rate • Gas in fuel cells • Flow in ventilation systems		
Applicable gases	Air, Natural gas, LP gas, O <sub>2</sub> , and N <sub>2</sub> O *		
Supply voltage	12 to 24VDC		
Operating temp. range	-10° to +60°C		
Ordering information	Case	Gas	Flow range Part number
	PPS	Air	0~1L/min D6F-101A-110
	PPS	Air	0~2L/min D6F-102A-110
	AL	LNG	0~5L/min D6F-05N2-000

\*Contact Omron regarding other gases.

## Mass Air Flow 10~50L

Dimensions mm (in)	D6F-10/20/50		
30H x 30D x 78L (1.18 x 1.18 x 3.07)			
Features	•Precision unidirectional mass airflow up to 50LPM •Stable output •Horizontal mounting with NBR 'O' ring •Low power consumption		
Applicable gases	Air, Natural gas, LP gas, O <sub>2</sub> , & N <sub>2</sub> O*		
Supply voltage	12 to 24VDC		
Operating temp. range	-10° to +60°C		
Ordering information	Flow range	Part number	
	0-10LPM	D6F10A600	
	0-20LPM	D6F20A600	
	0-50LPM	D6F50A600	

\*Contact Omron regarding other gases.

## Air Velocity Sensor

Dimensions mm (in)	D6F-W		D6F-V			
9H x 20D x 39L (0.35 x 0.79 x 1.53)			8H x 13D x 24L (0.31 x 0.51 x 0.94)			
Features	•Clogged filter detection •Compact size •Integral passive Dust Segregation System (DSS) •Fast fit for easy installation					
Applicable gases	Air*					
Supply voltage	12 - 24VDC					
Output voltage	5VDC					
Operating temp. range	-10° to +60°C					
Ordering information	Flow range	Part number	Flow range	Part number		
	0~1 m/sec flow range	D6F-W01A	0~3 m/sec flow range	D6F-V03A1		
	0~4 m/sec flow range	D6F-W04A				

\*Contact Omron regarding other gases.

# Micro Sensors - MEMS

## Pressure / Blood Pressure

	D8M-R	Blood Pressure 2SMCP-10
Dimensions mm (in)	30 H x 25.8 D x 30 W (1.18 x 1.02 x 1.18)	6.2 x 4.8 x 8.3 (0.27 x 0.21 x 0.37)
Features	<ul style="list-style-type: none"> <li>Solid state MEMS pressure sensor with frequency output</li> </ul>	<ul style="list-style-type: none"> <li>For applications using a minimum of 100,000 pieces per year only</li> <li>For pulse rate detection</li> <li>Electrostatic capacity style suitable for microcomputer input</li> </ul>
Applicable gases	Air, please inquire about other gases.	Air
Pressure range	0 - 0.78" of H <sub>2</sub> O	0-280mm Hg (600mm Hg max.)
Output	80 - 300kHz (1kHz/9.81 Pa)	-
Supply voltage	4.2 - 5.5VDC	5VDC
Current consumption	10 mA max.	-
Operating temp. range	-20° to +70°C	0° to +50°C

## Tilt

	D6B	D6BN
Dimensions mm (in)	5.50 H x 3.75 D x 5.50 W (0.22 x 0.15 x 0.22)	2 H x 7 D x 7 W (0.08 X 0.28 x 0.28)
Features	<ul style="list-style-type: none"> <li>Utilizes Hall Effect technology</li> <li>For space-constrained applications</li> <li>Surface mount</li> <li>No EMC bounce</li> </ul>	<ul style="list-style-type: none"> <li>Utilizes Hall Effect technology</li> <li>Low profile less than 1mm</li> <li>Surface mount</li> <li>No EMC bounce</li> </ul>
Operating angle	45~75° (output from high to low)	40~80° (left & right)
Return angle	50~20° (output from low to high)	50~10° (left & right)
Operating voltage (Vdd)	2.7~3.3VDC	2.4 ~ 3.6VDC
Output voltage	0.5VDC max.	0.4VDC max.
Low	Vdd - 0.5VDC min.	Vdd - 0.4VDC max.
High	20µA max.; 10µA typ (Vcc = 3VDC)	1mA max., 1µ standby
Current consumption	-10° to +60°C	-10° to +60°C
Operating temp. range	D6B-2	D6BN-1
Ordering information		

## Shock/ Vibration/Tilt

	D7E
Dimensions mm (in)	23.1 H x 23.6 D x 36.4 W (0.91 x 0.93 x 1.43)
Features	<ul style="list-style-type: none"> <li>Compact tilt sensor</li> <li>Responds to gradual tilting of 1degree/sec</li> <li>Self-resetting</li> <li>Quick-connect terminals</li> <li>PCB version available (D7A)</li> </ul>
Operating angle	50~80°
Return angle (reset)	25° or more
Contact capacity	0.1mA @ 5VDC to 100mA at 30VDC resistive load
Contact form	SPST-NC
Operating temp. range	-25° to +60°C
Service life	5000 operations min.

# Connectors - FPC (Flexible Printed Circuit)

				
	<b>XF2G</b>	<b>XF2U</b>	<b>XF2J</b>	<b>XF2L</b>
