	Technical Drawing / Dimension / Layout	Page 355
	Circuit Drawing	Page 364
	Typical Applications	Page 365
Marking	Page 366	

General Notes

The illuminated pushbuttons with 1 metre Immersion proof front (IP 67) combine the robust actuators of series 04 with gold plated silver snap-action, low-level switching elements silver contacts for switching elements 2.8 mm plug-in terminals can be supplied on request for 1 changeover only.

The range includes pushbuttons, keylock switches and selector switches.

Mounting

Mounting from the front through the mounting hole either 22.5 mm diameter for raised or 30.5 mm diameter for flush.

The pushbuttons are screwed to the panel by means of a front ring and prevented from twisting by two screws.

To ensure correct positioning of the pushbuttons we can provide a positioning insert on request.

The universal terminals of the low-level switching elements permit them to be mounted on printed circuit boards (PCB). These terminals are also suitable for dip soldering. For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

Lenses

The flat lenses, made of polyamide, are available in various colours, as well as translucent or transparent.

Marking

For engravings, hot stamping and film inserts, see "Marking" on page 366.

Illumination

Perfect illumination of the different coloured lenses is assured by lamps T 5,5 (6-60 V).

For supply voltages above 60 V, it is necessary to use a voltage reduction element (external series resistor, capacitor or transformer). Do not solder the terminals directly, because of the high surface temperature.

Multi-LEDs T 5,5 (6, 12, 24, 48 V) are available in the colours white, red, yellow and green.

Position Indicating

When a switch with maintained action is actuated, the lens remains in the depressed position mechanically. The state of the switch is apparent at all times from the position of the lens.

Keylock switches

Safety lock (Index K).

Single locks (2 positions).

10 different locks with standard numbers 1001-1010. If the lock number is not specified, we will supply No. 1001. An additional 690 locks with numbers 1011-1700 are available on request. For numbers 1001-1700 no master key can be supplied. Two keys are supplied with each keylock switch.

Spare keys for KABA safety locks may be ordered by quoting No. 14-987 (please state the lock number).

Combined locking systems

Information supplied on request.

Number structure

14-XXX.OXX

Example:

-Illuminated pushbutton; momentary action, gold-plated silver contact; soldering terminals; 1 switching element
14-131.025

-Lens red, transparent
704.602.2

-Front ring; aluminium, natural anodized
704.600.1

-Marking plate; white, translucent
704.609.9

Specimen orderIndicator front illumination

- indicator front illumination, soldering terminal 14-040.005

Recommended accessories:

- lens plastic, opaque black 704.6020
- marking foil for lens plastic/metal black 704.609.0
- front ring, aluminium black 704.6020
- LED. 1 chip, 12 VDC, white 10-2109.3139

All dimensions in mm.

We reserve the right to modify technical data.

illuminated-/pushbutton

- 1 front ring
- 2 lens
- 3 marking plate
- 4 switch housing
- 5 fixing nut

pushbutton-/illuminated pushbutton for flush mounting

- 1 front bezel bracket for flush mounting
- 2 lens
- 3 marking plate
- 4 switch housing
- 5 front panel
- 6 pressure ring
- 7 fixing nut

indicator front illumination

recommended accessories:

- d lens plastic → 345
- d marking foil for lens plastic/metal → 346
- d front ring → 347
- d incandescent lamp → 350; LED → 350

	connection method	29 mm dia. part no.	circuit drawing	technical drawing	mounting dimension	components layout	e
indicator front illumination	ST/ PT	14-040.002	2	1	1	-	0,050

actuator with snap-action switching element**switching system**

Self-cleaning, double-break, snap action switching system (with contact gap 2 x 0.5 mm).

1 normally closed or 1 normally open contact per element.

snap-action switching elements with soldering terminals at the sides: up to 4 switching element can be on a pushbutton (max. 4 normally closed and 4 normally open contacts).

snap-action switching element with axial plug-in terminals 2,8 mm not stachable, only 1 switching element can be on a pushbutton.

material**actuator case**

polyamide

material of contacts

gold-plated silver

switching element

plug-in-/soldering terminal

diallylphthalate DAP, polyamide 66, polysulfone, heat-resistant and self-extinguishing

soldering terminal: PA 6.6 Ultramid

mechanical characteristics**actuating force**

3.5-5.5 N, depending on the number of switching elements

actuating torque

measured at the key or lever of the keylock- or selector switch: 2.5-5.5 Ncm, depending on the number of switching elements

actuating travel

illuminated pushbutton :3 mm

switch actuator with 2 positions:

1 x ca. 42° deflection momentary action

1 x ca. 90° deflection maintained action

switch actuator with 3 positions:

2 x ca. 42° deflection momentary action

2 x ca. 90° deflection maintained action

ambient air temperature

-25°C to +55°C

for indicators and illuminated pushbuttons mounted as a block , make sure the heat can escape freely (as per DIN IEC 68-)

connection method

snap-action switching element with tinned soldering terminals at the sides:

max. wire diameter: 2 wires à 1.2 mm

max. wire cross-section of stranded cable: 1x 1 mm².

snap-action switching element with axial plug-in terminals, which can also be used as soldering terminals:

plug-in terminal: 2.8 x 0.5 mm

soldering terminal:

max. wire diameter: 2 wires of 1 mm

max. wire cross-section of stranded cable: 2 x 0.75 mm² or 1 x 1.0 mm²

degree of protection

front as per IEC 529: IP 67

mechanical life

momentary action 2 mio. cycles of operation

maintained action 1 mio. cycles of operation

rebound time

<= 5ms

resistance to climate

standard condition as per IEC 68-2-3 and 2-30

changing condition as per IEC 68-2-14 and 2-33

resistance to shock

(single impacts, semi-sinusoidal)

15 g for 11 ms as per IEC 512-4-3, IEC 68-2-27

resistance to vibration

(sinussoidal)

10 g at 10-2000 Hz, amplitude 1.5 mm as per IEC 68-2-6

storage temperature

-40°C to + 85°C

(as per DIN IEC 68-)

electrical characteristics**continuous thermal current I_{th2}**

5 A

The maximum current in continuous operation and at ambient temperature not exceeding the quoted maximum values.

electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IEC 512-2-11.

electrostatic breakdown value

<= 15 KV (keylock switch)

protection class

II

rated current

5 A

rated insulation voltage

250 VAC/DC as per VDE 0110, group B

switch rating

250 VAC/5 A (cos φ 1)

250 VAC/3 A (cos φ 0.3)

switch rating AC, cos φ 0,7:

voltage	125 V	250 V
---------	-------	-------

current	3 A	2 A
---------	-----	-----

switch rating DC (inductive), L:R = 30 ms:

voltage	24 V	60 V	110 V	220 V
---------	------	------	-------	-------

current	2 A	0,7 A	0,2 A	0,1 A
---------	-----	-------	-------	-------

volume resistance

starting value (initial) <= 50 mΩ

rules

EN 61 058

actuator with Low Level switching element

switching system

This low level switching element was designed for switching low powers in electronic circuits. The mechanism assures reliable switching of loads ranging from a few $\mu\text{A}/\mu\text{V}$ up to 100 mA/42 VAC/VDC.

Single-break momentary contact, as normally open or normally closed with 4 independent points of contact. 2 momentary contacts per switching element; combination of normally open and normally closed is possible.

Special features are the long life, extremely short rebound time and stable contact resistance.

material

actuator case

polyamide

material of contacts

gold-plated

switching element

polysulfone, heat-resistant and self-extinguishing

mechanical characteristics

actuating force

3-4 N

actuating torque

measured at the key or lever of the keylock- or selector switch: 2.5-5.5 Ncm, depending on the number of switching elements

actuating travel

illuminated pushbutton :3 mm

switch actuator with 2 positions:

1 x ca. 42° deflection momentary action

1 x ca. 90° deflection maintained action

ambient air temperature

-25°C to +55°C

for indicators and illuminated pushbuttons mounted as a block , make sure the heat can escape freely

(as per DIN IEC 68-)

connection method

The universal terminals permit these units to be mounted on printed circuit boards (PCB). These terminals can also be used as soldering or plug-in terminals.

For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

soldering terminal:

max. wire diameter: 2 wires of 1 mm

max. wire cross-section of stranded cable: 2 x 0.75 mm²

plug-in terminal: 2.0 x 0.5 mm

degree of protection

front as per IEC 529: IP 67

mechanical life

momentary action 5 mio. cycles of operation

maintained action 1 mio. cycles of operation

rebound time

Typ. < 100 μs

resistance to shock

(single impacts, semi-sinusoidal)

15 g for 11 ms as per IEC 512-4-3, IEC 68-2-27

storage temperature

-40°C to + 85°C

(as per DIN IEC 68-)

electrical characteristics

electric strength

2500 VAC, 50 Hz, 1 min. between all terminals and earth, as per IC 512-2-11.

electrostatic breakdown value

≤ 15 KV (keylock switch)

protection class

II

switch rating

10 $\mu\text{A}/100 \mu\text{V}$ to 100 mA at 42 VAC/VDC

volume resistance

starting value (initial) $\leq 50 \text{ m}\Omega$

buzzer

buzzer system

system

Piezo disc

material

alarm buzzer case

polyamide

front cap

plastic: polyamide

metal: nickel-plated brass

sea-water proof

mechanical characteristics

ambient air temperature

-25°C to + 50°C

(as per DIN IEC 68-)

connection method

plug-in terminal 2.8 x 0.5 mm

degree of protection

IP 65 as per IEC 529

storage temperature

-25°C to + 50°C

(as per DIN IEC 68-)

electrical characteristics

frequency (tone)

ca.2.8 kHz continuous tone only

operation voltage/current

operation voltage: 24 VDC $\pm 10\%$

operation current: $\leq 25 \text{ mA}$

sound pressure

95 db (A) ± 8 at a distance of 0.1 m

With indicators and illuminated pushbuttons equipped with diodes, the user is able to perform a lamp check or wire an alarm circuit simply with a considerable saving of space.

lamp check

lamp check with blocking diodes

alarm circuit from fault
annunciating system

lamp check and alarm circuit

lamp check and alarm circuit with
only one diode and AC voltage

LC = lamp check

Indicator - Engraving of marking cap

All marking plates and marking caps are engraved in lettering to DIN 1451, with black or white filling.

Can also be supplied with standard lettering or symbols.

For symbols see series 04.

Lettering to be engraved should be specified on a separate order sheet.

(available from us on request.)

Height of letters mm	Number of lines	Number of letters per line approx.			Line spacing mm
		b1	b2	b3	
3	3	11	10	9	4,6
4	2	8	7	-	6,6
8	1	4	-	-	-

Pushbutton/Illuminated pushbuttons - Engraving of marking plate or raised marking cap

All marking plates and marking caps are engraved in lettering to DIN 1451, with black or white filling.

Can also be supplied with standard lettering or symbols.

Lettering to be engraved should be specified on a separate order sheet.

(available from us on request.)

Height of letters mm	Number of lines	Number of letters per line approx.			Line spacing mm
		b1	b2	b3	
3	3	9	9	7	4,6
4	2	7	6	-	6,6
8	1	3	-	-	-

Engraving of labels

All labels are engraved in lettering to DIN 1451, with black filling.

Lettering to be engraved should be specified on a separate order sheet.

(available from us on request.)

Height of letters mm	Number of lines	Number of letters per line approx.		Line spacing mm
		L = 30 mm	L = 42 mm	
3	2	14	20	4,5
4	1	10	14	4
8	1	5	7	2
