FIBOX

Enclosing innovations

Innovation is defined as something newly introduced. Perhaps it is a new method, an improved solution, a new design, or an entirely new device. Whatever your innovation, it represents a change for the better, and as always, it is the result of both your inspiration and your hard work.

At Fibox, we appreciate your effort and match it with our own. Fibox is the leading innovator in developing enclosure solutions to protect your electrical and electronic designs from hostile environments. Simply put, we enclose your innovations.

OVER 50 YEARS EXPERIENCE

In 1966, Fibox introduced the first modular enclosure injection moulded from polycarbonate plastic. These enclosures began a new era in electrical panel building. From the beginning, a commitment to innovation resulted in continuous product improvement, resulting in more than 20 patents. Our on-going product development has fuelled the dramatic and rapid growth of Fibox.

Whatever your application, the Fibox enclosure product family features the widest range of high quality enclosures for the packaging and protection of electrical and electronic components and systems. Fibox offers over 1000 enclosure variations. Enclosures can be delivered in standard off-the-shelf configurations, or customized to your exact specification. For higher volume OEM's, Fibox offers custom moulds and contract manufacturing.

TECHNICAL INNOVATION

Fibox is the industry leader in developing both new products and new technologies for injection moulding thermoplastic enclosures. At Fibox, we consider moulding technology a key element contributing to product improvement. For example, the Fibox MNX enclosure series features 2 component moulding technology to insure a precision-formed TPE gasket that guarantees superior ingress protection ratings. Fibox was first to introduce this innovation, and continues as the only producer applying this technology to electrical enclosures.

A further example is our emphasis on multiple slide technology for mould construction. While more complex and costly, this type of mould provides our OEM customers with cost-effective alternatives for modifying standard enclosures to meet their specific needs.

But beyond technology, our success depends upon understanding the requirements of our customers and the value they place upon our contributions to their success. We know our customers derive the inspiration for their innovations by listening to and understanding the needs of their customers. Thus, our products are designed in close cooperation with our customers and we value the input of our global customer base to produce new enclosure solutions, useful functional accessories and on-going product innovations.

CUSTOMISING

FIBOX CUSTOMISING SERVICES

MACHINING SERVICE

Fibox employs state-of-the-art machines to manufacture your custom-made enclosures with drills, knockouts or openings — even for small piece numbers.

ASSEMBLY SERVICE

Have you ordered hinges, inspection windows or other Fibox accessories? Do you know our assembly service can deliver your enclosure and accessories pre-assembled and ready for use. This cuts down your labour costs and time to delivery.

TOOL MODIFICATIONS FOR OEM ENCLOSURES

Instead of having to manufacture a whole new tool Fibox can modify our own standard tools according to your OEM enclosure specification. This results in a shorter product development time and enables you to take your product to market earlier.

Modifications of our standard tools give you a possibility to differentiate your products from your competitors.

COLOURED ENCLOSURES

Paint your enclosures in your corporate colour. Fibox offers customers a choice of custom or RAL colour for plastic enclosures, even for relatively small quantities.

LACQUERED ENCLOSURES

Fibox provides a lacquer coating for your enclosures on request. This process is especially recommended for production quantities of under 500 pieces. We offer a comprehensive range of lacquer options.

EMC PROTECTION FOR ENCLOSURES

Fibox can provide your plastic enclosure with EMC protection if desired. For example we can apply a conductive copper coating to the inside faces, or utilising a special conductive gasket....or both.

PRINTED ENCLOSURES

Fibox can supply your enclosures with silk screen printing to your specification. Smooth, even surfaces are required.

WEB SERVICES

ALWAYS UP TO DATE

Visit www.fibox.com to keep up to date with the latest developments from Fibox. Our interactive website can also assist you in selecting the right enclosure for your requirement first time by providing you with a 2D/3D CAD download facility, dimensional drawings, detailed material and performance specifications and regulatory approvals. The latest product catalogues and leaflets are also available to download from the Fibox website.

Wherever you are in the world there is access to the Fibox website in local languages. These are Chinese, Danish, Dutch, English, Finnish, French, German, Japanese, Korean, Polish, Russian and Swedish. Help us to improve our web offering by giving us feedback. We are always very willing to listen to your comments and adopt change wherever possible.

FX CAD

ONLINE ENCLOSURE CONFIGURATION AND QUOTE REQUEST

In 2018 Fibox has announced the launch of a brand-new online configurator for enclosures and control cabinets. The tool enables individual planning of housings for control and display devices and power distribution components with custom breakouts. Users are also able to immediately request quotes. All product series in the entire extensive Fibox program are integrated in the configuration software.

The enclosure configurator is available at the company website www.fibox.com in English and German, with additional language versions to follow.

Users can either directly select their preferred series or specify the enclosure size and material. The enclosure is visualized as a 3-D model. Breakout openings can be positioned by drag and drop or by entering coordinates. The configurator suggests matching accessories, for example cable glands for threaded holes. Additional installation components such as mounting plates and rails sized for the specified enclosure are also presented and can comfortably be dragged into the parts list. Short mouseover texts explain the available options; further information is readily available via direct links to the product catalog.

After registration, users can save and further process their configurations. A download link for technical drawings and CAD data (file formats: PDF and DXF) will be sent via email.

OUR MARKETS

SOLUTIONS FOR DEMANDING ENVIRONMENTS

At Fibox, we appreciate your efforts and achievements and adapt to your performance requirements. Fibox can give you the necessary support, allowing you to concentrate on your core business and thus save time and money.

Fibox is the right partner for a long-term and trustworthy partnership. We are committed to ensuring our full support throughout the life span of our products. Fibox can significantly reduce your workload not only by assisting you in product development regarding construction, rapid prototyping processes, tooling and production but also in the area of marking products with your trademark. This leaves you free to fully concentrate on your core business as well as on effective project organisation, which puts your products on the market faster.

- Shortening of lead and delivery times –
global Fibox service
- Increasing sales –
Fibox supplements your product range
- Reduction of investment risk –
Fibox shares investment costs with you
- Better quality –
Fibox complies with the quality standard ISO 9001:2000
- Top-class enclosures –
Fibox offers protection of your innovations

ARCA

FIBOX – Make Difficult Easy

HIGH PERFORMANCE CABINET

Superior performance and security in most demanding environments. Easy to use. Quick to install. All this is driven by innovation and market driven product development. ARCA is a non corrosive and cost effective alternative to sheet steel cabinets being installed in harsh and demanding environments. In a nutshell, ARCA has all the features of steel but benefits of high grade thermoplastic.

Impact-resistant material.

ENCLOSURE:

- 1 Enclosure base
- 2 Cover, grey incl. PUR gasket
- 3 Cover, transparent
Hinges on the long/short side

ACCESSORIES:

- 1 Fastening lugs (4 pcs.) incl. screws
Hinge set for CAB/Quick, corner plug
- 2 Mounting plate, electro-galvanised steel
- 3 DIN rail TS 35
- 4 Pivotal front plate, aluminium with mounting kit
- 5 Front plate has flexible opening and depth mounting options

Including:

Cabinet base, door with PUR gasket, 3 mm double bit lock(s) with transport and plastic key or latches.

OFFERS HUGE OPTIONS

This range offers over 260 versions. Choose MNX if you have a large product family that needs to be housed in matching enclosures with the minimum of fuss, no matter the environment or installation height. For the protection of electrical and electronic components of all kinds.

Easy-to-use solutions and functionality. Designed to house automation, control and switch gear components. Modular height system.

ENCLOSURE:

- 1 PC or ABS enclosure, different heights, optionally also available with metric knockouts to assure a quick fitting assembly
- 2 PC cover, grey or smoked transparent

ACCESSORIES:

- 1 Mounting plate, Electro-galvanised steel
- 2 Fastening lugs (4 pcs.) incl. screws
- 3 DIN rail TS 15/TS 35
- 4 Cover screws, various versions
- 5 Pivotal front plate, aluminium

Including:

Enclosures include: Base with screws for mounting plate, cover with PUR gasket and polyamide cover screws.

EK

FOR MODULAR FLEXIBILITY

Because EK enclosures are fully modular, this range stretches to fit, from a single module to extensive enclosure panels. EK comes in a large size range, with various depths and a host of accessories.

PC: IP 66/67; IK 08 (side surface); IK 09 (front surface)

DIMENSIONS:

190 x 190 x 130 mm – 760 x 560 x 250 mm

FIBOX – Make Difficult Easy

Modular structure for larger enclosure panels

Wide accessory selection

Extension frame multiplies usage options

Selection of flange plates and cover plates – see pages 34 and 35.

Ideal for single or modular enclosure solutions.
Wide selection and extensive range of accessories.

ENCLOSURE:

- 1 Base
- 2 Cover, grey or transparent
- 3 Cover screws, various versions

ACCESSORIES:

- 1 Fastening lugs (2 pcs.) incl. screws
- 2 Mounting plate, electro-galvanised steel, stable and impact-resistant
- 3 DIN rail different sizes TS 35
- 4 Intermediate frame, polycarbonate, (from size 2819) PUR gasket (height 50 mm)
- 5 Membrane cable gland for flexible applications

Including:

Enclosures include: Base with screws for mounting plate, cover with PUR gasket and polyamide cover screws.

SOLID

FIBOX – Make Difficult Easy

SOLID PROTECTION

Solid is the superb all-rounder, both in and out of doors. If you need general protection, in everyday environments, Solid may be the all-purpose solution you are seeking for electronic and electrical components.

PC: IP 66/67; IK 08 (side surface), IK 09 (front surface)

ABS: IP 66/67; IK 08

DIMENSIONS:

190 x 190 x 130 mm – 760 x 560 x 250 mm.

Wide opening hinges +180°
for easy access

Guaranteed long-term ingress protection –
no holes required in enclosure

Wide accessory selection

Secure protection of terminal blocks and electronic devices.

Including:

Base with screws for mounting plate / DIN-rail, cover with PUR gasket and stainless steel cover screws.

ENCLOSURE:

- 1 Base
- 2 Cover, grey or transparent
- 3 Rapidly installed QuickLock cover screws

ACCESSORIES:

- 1 Fastening lugs (4 pcs.) incl. screws
- 2 Mounting plate, electro-galvanised steel resistance to corrosion
- 3 DIN rail, different sizes TS 15 / TS 35

ALN

FIBOX – Make Difficult Easy

FOR THE PROTECTIVE LIGHTNESS OF ALUMINIUM

Our ALN enclosures can be mounted almost anywhere, so it's just as well they withstand so much! Knocks, bangs, chemicals, temperatures that swing from tropical to frozen, or where EMC protection is an issue – ALN beats the competition in guarding against it all.

ALN: IP 66/67/68; IK 08

DIMENSIONS:

60 x 66 x 46 mm – 310 x 600 x 180 mm

High resistance to chemical attack (painted)

EMC shielding

Higher temperature range

Designed to mount terminal blocks. Ideal for housing and protecting different sensor types/electr. components.

ENCLOSURE:

- 1 Base
- 2 Cover, grey
- 3 Cover screws, various versions

ACCESSORIES:

- 1 Fastening lugs (4 pcs.) incl. screws
- 2 Mounting plate, electro-galvanised steel, stable and impact-resistant
- 3 DIN rail with mounting screws different sizes TS 15 / TS 35

Including:

Base with screws for mounting plate/DIN-rail, cover with PUR gasket and stainless steel cover screws.

TEMPO

FIBOX – Make Difficult Easy

ENCLOSED IN SECONDS!

As its name suggests, Tempo doesn't like to hang around. Need an enclosure that's easy on the pocket and installed in seconds, but still gets the job done? Tempo does all this and still meets high, recognised standards.

ABS: IP 65; IK 07
PC: IP 65; IK 08

DIMENSIONS:

95 x 65 x 60 mm – 344 x 289 x 157 mm

Sealing availability
for added security

Quick-to-install integral hinge
in selected sizes

Multiple wall mounting options

110 x 35	8524031	CHM-3	PC/ABS M/MH

Secure protection for electronic devices such as push buttons, terminal blocks. Optimum protection for control sensors and interruptors

ENCLOSURE:

- 1** Base
- 2** Cover, grey or transparent
- 3** Cover screws, various versions

Including:

Flanged Base with screws for mounting plate, cover with PUR gasket and polyamide cover screws.

ACCESSORIES:

- 1** Fastening lugs (2 pcs.) incl. screws
- 2** Mounting plate, electro-galvanised steel stable and impact-resistant
- 3** DIN rail different sizes TS 35

QUICK

FIBOX – Make Difficult Easy

FOR HARSH INDUSTRIAL AND OUTDOOR ENVIRONMENTS

These smart, modern enclosures are so-named after their quick-screw covers. They're easy to close and open, but offer good protection against tampering. A large range of accessories is available.

PC: IP 66/67; IK 08
ABS: IP 66/67; IK 08

DIMENSIONS:

300 x 200 x 170 mm – 600 x 400 x 270 mm

Quick locking cover screws for fast access to components

Adjustable depth for front panel

Swing door

Including:

Enclosures include: Base, terminal compartment cover with PUR gasket and screws for mounting plate/DIN-rail. -3 and -L3 versions: Transparent cover with PUR gasket, hinges, locking devices; FC version: Closed PC frame front plate with PUR gasket and cover screws.

ENCLOSURE:

- 1 Basic enclosure optionally available with or without knockouts
- 2 PC front plate frame or transparent hinged cover options are standard. PUR gasket and assembly screws are included. Separate connection compartment
- 3 Polycarbonate and ABS enclosure body available
- 4 Facility to install tamper proof locking screws in the hinged cover

ACCESSORIES:

- 1 Fastening lugs (2 pcs.) incl. screws hinge and lock set
- 2 Internal mounting options and external din-rail mounting facility are included
