Rotaries

General Specifications

Electrical Capacity (Resistive Load)

Power Level (silver): 3A @ 125V AC or 3A @ 250V AC or 3A @ 30V DC

Logic Level (gold): 0.4VA maximum @ 28V AC/DC maximum

(Applicable Range 0.1mA ~ 0.1A @ 20mV ~ 28V)

Other Ratings

Contact Resistance: 50 milliohms maximum for silver; 100 milliohms maximum for gold

Insulation Resistance: 200 megohms minimum @ 500V DC

Dielectric Strength: 1,000V AC minimum between contacts for 1 minute minimum;

1,500V AC minimum between contacts & case for 1 minute minimum

Mechanical Life: 1,000,000 operations minimum for momentary circuit

200,000 operations minimum for maintained circuit

Electrical Life: 100,000 operations minimum

Nominal Operating Force: Single pole: 1.5N

Double pole: 3.0N

Nonshorting (break-before-make) **Contact Timing:**

> Pretravel .059" (1.5mm); Overtravel .059" (1.5mm); Total Travel .118" (3.0mm) Travel:

Materials & Finishes

Black: Glass fiber reinforced polyamide (UL94V-0); Chrome plated: Chrome plating over ABS Bezel:

resin (UL94V-2)

Housing: Glass fiber reinforced polyamide (UL94V-0) Base: Glass fiber reinforced polyamide (UL94V-0)

Movable Contactor: Phosphor bronze with silver or gold plating Silver alloy or copper with gold plating **Movable Contacts: Stationary Contacts:** Silver alloy or copper with gold plating **Switch Terminals:** Phosphor bronze with tin plating **Lamp Terminals:** Phosphor bronze with tin plating

Environmental Data

Operating Temperature Range: -25°C through +50°C (-13°F through +122°F) for Illuminated

-25°C through +70°C (-13°F through +158°F) for Nonilluminated

90 ~ 95% humidity for 240 hours @ 40°C (104°F) **Humidity:**

Vibration: 10 ~ 55Hz with peak-to-peak amplitude of 1.5mm traversing the frequency range & returning

in 1 minute; 3 right angled directions for 2 hours

Shock: 50G (490m/s²) acceleration (tested in 6 right angled directions, with 5 shocks in each direction)

Sealing: IP65 of IEC60529 standard

Installation

Mounting Torque: 0.785Nm (6.95 lb•in) maximum

Soldering Time & Temperature: Manual Soldering: See Profile A in Supplement section.

Standards & Certifications

Flammability Standards: UL94V-0 housing, base & black bezel

File No. E44145 - Recognized only when ordered with marking on switch.

Add "/CUL" before first dash in part number to order cULus marking on switch.

All solder lug models recognized at 3A @ 125/250V AC or 0.4VA @ 28V AC/DC maximum.

D115

Distinctive Characteristics

24mm square and 25mm diameter pushbuttons with the shortest above-panel dimension (1.8mm) in the industry for splashproof design.

Meets IP65 of IEC60529 standards (similar to NEMA 4 and 13), providing dust tight and splashproof panel seal protection.

Tamper resistant 18mm square and 19mm diameter actuators.

Short body of .965" (24.5mm) conserves behind-panel space.

Distinctive long stroke and light touch actuation for clear indication of circuit status.

Choice of cap colors includes clear, brushed chrome, red, green, or amber, for enhanced panel appearance. Metallic silver cap option has bright ring illumination (round only).

Brilliant illumination with multiple LED colors.

Bezel color options in black or brushed chrome.

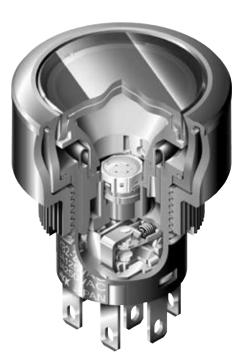

Brushed chrome option is lighter weight than actual metal switches due to metal plating on resin.

Available in momentary and alternate action with latchdown.

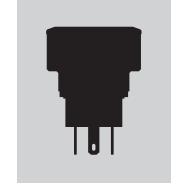

Crisp actuation and clear circuit status provided by snap-action contact mechanism. Arc barrier protects against crossover.

Combination solder lug and .110" quick connect terminals. Terminals are epoxy sealed to lock out flux, dust, solvents, and other contaminants, as well as to secure terminals and improve contact stability.

Custom legends on actuator available.

BRIGHT & SUPER BRIGHT LEDS

The electrical specifications shown are determined at a basic temperature of 25°C. LED circuit is isolated and requires an external power source. If the source voltage exceeds the rated voltage, a ballast resistor is required. Base of AT634 and AT636 is Black for 5V, Light Blue for 12V and Gray for 24V.

BALLAST RESISTOR CALCULATION FOR LEDS

If the source voltage is greater than the rated voltage of a lamp or LED, a ballast resistor must be connected in series with the lamp. This circuit diagram and formula will assist in calculating the value of the required ballast

ASSEMBLY INSTRUCTIONS FOR ROUND

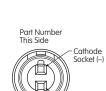

1. Remove knurled mounting nut.

2. Remove bezel and red o-ring from housing. There are two o-rings in this assembly: one is red, one is orange.

3. Install LED.

LEDs AT634 & AT636

Align D-flat on LED with Part Number on switch for appropriate polarity and insert LED into base.

ATTENTION

ELECTROSTATIC SENSITIVE DEVICES

LED AT628

LEDs AT625G,

AT631B,

AT632F

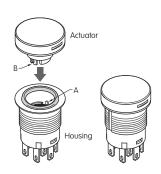

Align D-flat on LED with Part Number on switch for appropriate polarity and insert LED into base.

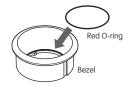

The larger metal part within the LED represents the cathode (-). Align LED for appropriate polarity and insert LED into base.

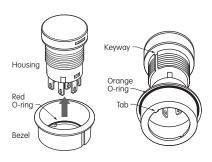

4. Align tabs (B) on both sides of actuator with the projections (A) inside of the housing and push actuator firmly down to snap in.

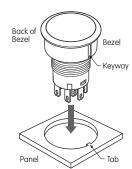

5. Install the red o-ring which was removed in step 2 at the inside bottom of the bezel.

6. Align tab inside of the bezel with keyway on housing and bring bezel back into its original position.

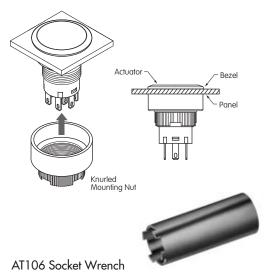

7. Before installing into panel, make sure that the orange o-ring is present at the back of the bezel. Align keyway on bezel with tab in panel and push switch all the way into the panel.

8. Attach mounting nut behind panel and tighten. Make sure that bezel and actuator fit properly and that there is no space between bezel and panel. Do not overtighten.

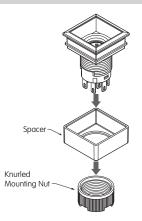

Mounting torque: 0.785Nm (6.95 lb.in) maximum. Optional socket wrench AT106 available.

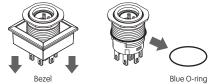

ASSEMBLY INSTRUCTIONS FOR SQUARE

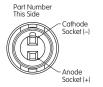

1. Remove knurled mounting nut.

2. Remove bezel and blue o-ring from housing.

3. Install LED.

ATTENTION

LEGENDS

NKK Switches can provide custom legends for caps. Contact factory for more information.

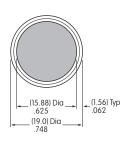

Suggested Printable Area for YB2 Caps

Recommended Methods: Laser Etch on clear cap, Screen Print or Pad Print on cap. Epoxy based ink is recommended.

For Caps AT3017, AT3018, and AT3019

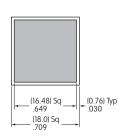

For Cap AT3020 (with clear ring for illumination)

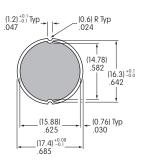

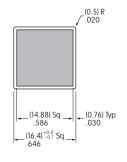

Shaded areas are printable areas.

For Caps AT3025 and AT3027

Suggested Printable Area for Film Inserts

Recommended Method:

Screen Print; Epoxy based ink is recommended

Film Material and Thickness: Clear Polyester, 4 mil max.

Shaded areas are printable areas.

HANDLING & PRECAUTIONS

LEDs are electrostatic sensitive devices. When installing and handling LEDs, use an electrostatic protected work station to prevent LED damage.
