

7000 Series

Miniature Rocker & Lever Handle Switches

Description

The 7000 series miniature rocker and lever handle switches are multi-pole and multi-position, have a wide variety of actuator and termination options available and use epoxy terminal-seal that's compatible with bottom wash cleaning. Product designers in the telecommunications, instrumentation and medical equipment industries turn to the 7000 series switches because of their reputation for quality and performance even in the face of harsh environments.

Features & Benefits

- Multi-pole and multi-position
- Wide variety of actuator and termination options
- Epoxy terminal-seal compatible with bottom wash cleaning
- RoHS compliant

Agency Approvals

Agency	Agency File Number
	E42363

Applications

- Telecommunications
- Instrumentation
- Medical equipment

Specifications

Contact Rating	B contact material: 0.4 VA max. @ 20 V AC or DC max. Q contact material: 5 amps @ 120 V AC or 28 V DC; 2 amps @ 250 V AC. See page 21 for additional ratings.
Electrical Life	7X01 and UX1 models: 100,000 make-and-break cycles at full load. All other models: 40,000 cycles.
Contact Resistance	Below 10 m Ω typ. initial @ 2-4 V DC, 100 mA, for both silver and gold plated contacts.
Insulation Resistance	10 ⁹ Ω min.
Dielectric Strength	1000 Vrms min. @ sea level.
Operating Temperature	-30°C to 85°C
Solderability	Per MIL-STD-202F method 208D, or EIA RS-186E method 9 (1 hour steam aging).

Notes:

Any models supplied with S, P, R, Q, B or G contact material are RoHS compliant. Specifications and materials listed above are for switches with standard options. For information on specific and custom switches, consult Customer Service Center.

Materials

Case	Glass filled nylon 6/6, flame retardant, heat stabilized, or diallyl phthalate (DAP) (UL 94 V-0).
Actuator	Nylon, black.
Frame (Front Mount)	Spring steel, black.
Frame (Rear Mount)	Brass or zinc, nickel plated.
Bushing	Stainless steel
Switch Support	Brass or steel, matte-tin plated.
End Contacts	B contact material: Copper alloy, with gold plate over nickel plate. Q contact material: Coin silver, silver plated. See page 21 for additional contact materials.
Center Contacts & All Terminals	B contact material: Copper alloy, with gold plate over nickel plate. Q contact material: Copper alloy, silver plated. See page 21 for additional contact materials.
Terminal Seal	Epoxy. Refer to Soldering and Cleaning in Technical Data Section
Hardware	Mounting nuts & screws: Brass. Lockwasher: Stainless steel. Standoff: Nylon standard.

7000 Series

Miniature Rocker & Lever Handle Switches

Ordering Number

To order, simply select desired option from each category and place in the appropriate box. For additional options not shown in catalog, consult our Customer Service Center.

This technical drawing shows a cross-section of a probe tip assembly. The probe tip is on the left, featuring a 25° angle and three positions labeled POS 1, POS 2, and POS 3. A central hole contains a '+' symbol. To the right of the tip is a cylindrical component with an 'Epoxy Seal' at its base. Dimensions are provided in inches and millimeters:

- Probe Tip Dimensions:**
 - Radius: .024 (0,61)
 - Tip Length: .138 (3,51)
- Cylindrical Component Dimensions:**
 - Total Length: .435 (11,05)
 - Inner Hole Diameter: .030 typ. (0,76)
 - Outer Diameter: .185 typ. (4,70)
 - Seal Thickness: .155 typ. (3,94)
- Other Features:**
 - 'C&K Marking on Opposite Side' points to a feature on the top surface.
 - A dimension of .060 (1,52) is shown for a small step or gap.

4PDT

Technical drawing of a cross-section of a probe assembly. The drawing shows a probe tip with a 25-degree angle, labeled POS 1, POS 2, and POS 3. The probe is inserted into a hole in a substrate. Dimensions are given in inches and millimeters. Key dimensions include: .024 (0,61) for the hole diameter, .138 (3,51) for the hole depth, .435 (11,05) for the total length, .155 typ. (3,94) for the epoxy seal thickness, .185 typ. (4,70) for the probe diameter, .030 typ. (0,76) for the probe tip thickness, and .060 (1,52) for the probe base thickness. A note indicates 'C&K Marking on Opposite Side'.

LED Information

Process Information: Soldering to LED leads must be completed within 5 seconds at 500° F (260°C) maximum.

LEDs are not supplied with J52, J62 options. LED snaps into switch frame surrounding actuator and is wired externally.

Suggested LED for J52 & J62 options.
