For Quality, Service & Selection, Trust the Clamp Professionals

Founded in 1913, Ideal Clamp Products, Inc. is the largest and most-trusted clamp manufacturer in North America, and is expanding their Aftermarket and OE clamp business around the globe. As the leading clamp designer and manufacturer, we invite you to explore our IDEAL® and TRIDON® clamps catalog for automotive, industrial, hardware, plumbing, marine, heavy equipment and specialty hose clamps.

We are headquartered in Smyrna, Tennessee, with manufacturing operations in North America and Asia. Together, our facilities manufacture worm drive hose clamps, high-torque clamps, constant tension clamps, T-Bolts, V-Inserts, no-hub couplings, and a host of specialty and custom clamp products. We provide superior quality clamping and sealing products, selling to an ever-growing list of distributors, warehouses, retailers, M.R.O. and O.E.M. businesses.

Our products and services promote engineering ingenuity, market driving initiatives and a commitment to excellence. Customers benefit from our:

- Wide selection of bands, screws, housings and special features
- Design, engineering and manufacturing expertise
- Material and metallurgical science specialists
- Automated assembly processes
- Advanced screw manufacturing technology
- High-speed stamping
- Sensors and visual control systems
- Attractive and marketable packaging
- Established distribution channels
- Testing and analysis
- Performance and specifications documentation
- Inventory control options

Quality & Engineering

Our commitment to superior quality, environmental responsibility and process integrity has allowed us to earn and maintain facility certifications for ISO 9001 and 14001, as well as TS16949. Our facilities use only the finest quality certified steel and best manufacturing practices for clamp products you can trust.

We operate using the latest manufacturing equipment and facilities, from networked manufacturing complexes to advanced laboratory analysis. Our diversified team of engineers and operators are equipped with the most sophisticated testing labs and machine-tuning capabilities. We test and certify our clamp performance to stringent industry standards and real-life conditions, resulting in the ultimate product satisfaction.

Our labs and technicians perform temperature tests, salt spray tests, band load and tension tests, calibration tests and often develop custom procedures to fit customer requirements. We can develop custom designs for any application, from band notching and slotting to special finishes and screw head designs. Using 3-D modeling that includes stress and finite elemental analysis, we can help determine the best materials and configuration for your application.

Partnership

Let us help you create a clamp mix for your distribution or supply your next order for a production line. We can connect you with our sales representatives, and welcome you to partner with us as you plan your next clamp program.

IDEAL® and TRIDON® brands offer:

- Excellent customer service
- Experienced industry engineering talent
- A broad range of high quality clamp products

Our collaborative techniques set global standards and reflect excellence in everything we do. Whether you need a standardized product or specialized attention, we have the team, the facilities and the knowledge to deliver. For Quality, Service and Selection, Trust the Clamp Professionals.

Stay current on our services and product offerings at www.idealclamps.com.

IDEAL® and TRIDON® clamp brands are registered trademarks of Ideal Clamp Products, Inc. The company is parented by Tomkins, plc. and is part of the Industrial & Automotive Group.

Headquartered in London, Tomkins is a world-class global engineering and manufacturing group with market and technical leadership across two businesses: Industrial & Automotive and Building Products. Its products are sold into a wide variety of end-markets. Tomkins ordinary shares are listed on the London Stock Exchange under the symbol TOMK, and also trade in ADR form on the New York Stock Exchange under the symbol TKS. For further information, go to www.tomkins.co.uk.

Geographical Markets:

- U.S.A./Canada
- Mexico
- Central America
- South America
- Europe
- Asia
- Africa
- Australia & New Zealand

Industry Markets:

- General Aftermarket & Replacement
- OEM: Original Equipment Manufacturing
- Automotive
- Heavy Equipment
- Industrial
- Food Processing & Sanitation
- Marine
- Hardware
- Plumbing
- Government & Military
- Truck & Engine
- Telecommunications

Hy-Gear® 9/16" Worm Drive Clamps

Full-size industry-standard worm drive 9/16" band clamps have a wide range of applications, from simple home and auto repair to heavy industrial uses. The bands have clean punched rectangular perforations that hold strong and connect easily.

Ideal® 50 Series / Tridon® 150 Series

Stainless Steel and Plated Parts.
Screw: 5/16" hex-head, plated carbon steel.
Band: 9/16" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.

Ideal® 68 Series

All Stainless Steel Parts, specially suited for industrial applications.
Screw: 5/16" hex slotted, 410 stainless steel.
Band: 9/16" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.

Ideal® 64 Series

All Stainless Steel Parts, specially suited for industrial applications.
Screw: 3/8" hex slotted, 410 stainless steel.
Band: 9/16" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.

Ideal® 63 Series/Tridon® 225 Series

All Hi-Nickel Alloy Stainless Steel Parts for better corrosion resistance.
Screw: 5/16" hex slotted, 200 or 300 grade stainless steel.
Band: 9/16" band width, 200 or 300 grade stainless steel.
Housing: 200 or 300 grade stainless steel with UPC shield.

Ideal® 63-4 Series

All 300 Series Marine Stainless Steel Parts for better corrosion resistance.
Screw: 5/16" hex slotted, 305 stainless steel.
Band: 9/16" band width, 301 stainless steel.
Housing: 300 stainless steel with UPC shield.

1/2" Worm Drive Clamps

Standard worm drive band clamps are suitable for most common home and automotive repairs. The bands have clean punched rectangular perforations that hold strong and connect easily.

Ideal® 57 Series / Tridon® 611 Series

Stainless Steel and Plated Parts.
Screw: 5/16" hex slotted, plated carbon steel.
Band: 1/2" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.

Ideal® 67-1 Series / Tridon® 625 Series

All Stainless Steel Parts.
Screw: 5/16" hex slotted, 410 stainless steel (Ideal), 305 stainless steel (Tridon).
Band: 1/2" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.
HSS Automotive Series.

Ideal® 67-5 Series / Tridon® 620 Series

All High-Nickel Grade Stainless Steel.
Screw: 5/16" hex slotted, 200 or 300 grade stainless steel.
Band: 1/2" band width, 200 or 300 grade stainless steel.
Housing: 200 or 300 grade stainless steel with UPC shield.

Ideal® 67-4 Series / Tridon® 620P Series

All 300 Series Marine Grade Stainless Steel.
Screw: 5/16" hex slotted, 305 stainless steel.
Band: 1/2" band width, 300 stainless steel.
Housing: 300 stainless steel with UPC shield.

Ideal® 67-6 Series / Tridon® 665 Series

All 316 Series Marine Grade Stainless Steel Parts.
Screw: 5/16" hex slotted, 316 stainless steel.
Band: 1/2" band width, 316 stainless steel.
Housing: 316 stainless steel.

Miniature Micro-Gear® Clamps

Micro-Gear® clamps are tiny, tough and precision engineered for use in such small hose applications as emission control, fuel lines and vacuum hoses. Their slim, 5/16" band and low profile housing make them easy to install in confined areas.

Ideal® 62P Series / Tridon® 325 Series

Screw: 1/4" hex-head, plated carbon steel.
Band: 5/16" band width, 201/301 stainless steel.
Housing: Low profile, 201/301 stainless steel.

Tridon® 350 Series

Screw: 1/4" hex-head, 410 plated steel.
Band: 5/16" band width, 201/301 stainless steel.
Housing: Low profile, 201/301 stainless steel.
MAH Automotive Series.

Ideal® 62M Series / Tridon® 345 Series

Screw: 1/4" hex slotted, 300 stainless steel.
Band: 5/16" band width, 300 stainless steel.
Housing: Low profile, 300 stainless steel.

Ideal® 62J Series / Tridon® 359 Series

Screw: 1/4" hex slotted, 316 stainless steel.
Band: 5/16" band width, 316 stainless steel.
Housing: Low profile, 316 stainless steel.

Fuel Injection Clamps

Fuel injection clamps are designed to provide the uniform sealing pressure required on fuel injection hoses. They feature a solid band with rolled edges and a special nut and bolt design.

Ideal® 52F Series / Tridon® Automotive F.I. 905 Series

Screw: 7mm hex slotted, clear zinc-plated carbon steel.

Band: 9mm band width, clear zinc-plated carbon steel.

Features & Benefits*

IDEAL stamp on housing for a name you can trust

Cross saddle for more even support on installation and long-term band tension

Smooth inside band protects soft hoses against shearing and fray

Unique screw design and asymmetric housing provides improved housing roll-resistance and uniform sealing strength

Material spec and clamping range stamped on band to aid identification

***Meets or exceeds
DIN 3017 standard**

See chart on pg. 12 for specs and dimension information

Lined Clamps

Lined clamps are designed for use with silicone rubber and other soft hose applications. The liner protects the hose surface and prevents it from extruding or shearing through the band notches as the clamp is tightened.

Ideal® 53 Series / Tridon® 613 Series (ET)

Stainless Steel and Plated Parts.

Screw: 5/16" hex slotted, plated carbon steel.

Band: 1/2" band width, 201/301 stainless steel.

Housing: 201/301 stainless steel.

Liner: 201/301 stainless steel.

Hose installed with
unlined clamp

Hose installed with
lined clamp

Ideal® 65E Series / Tridon® 615 Series

All 300 Stainless Steel Parts. (Ideal)
Marine Grade Stainless Steel. (Ideal)

Screw: 5/16" hex slotted.

300 stainless steel.

Band: 9/16" band width (Ideal)
or 1/2" band width (Tridon),
300 stainless steel.

Housing: 300 stainless steel. (Ideal)
201 Stainless Steel. (Tridon)

Liner: 300 stainless steel.

Ideal® 67M Series

All 316 Stainless Steel Parts.
Marine Grade Stainless Steel.

Screw: 5/16" hex slotted.

316 stainless steel.

Band: 9/16" band width.
316 stainless steel.

Housing: 316 stainless steel.

Liner: 316 stainless steel.

N/A - Not Available

We recommend a minimum of all 300 grade stainless steel clamps for marine applications. For applications directly over galvanized steel, we recommend an intermediate layer of non-conductive material such as vinyl electrical tape.

**56/500
Series**

**58/550
Series**

Snaplock® Quick Release Clamps

Snaplock® quick release worm drive clamps are good for closed system applications where the clamp must be disengaged to be applied. The swivel-action locking of screw to band makes installation and removal much faster.

Ideal® 56 Series

Screw: 5/16" hex slotted, plated carbon steel.
Band: 9/16" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.
Bridge: Plated carbon steel

Ideal® 58 Series

Screw: 3/8" hex combo slotted, 410 stainless steel.
Band: 9/16" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.
Bridge: 410 stainless steel.

Tridon® 500 Series

Screw: 5/16" hex slotted, plated carbon steel.
Band: 1/2" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.
Bridge: 410 stainless steel.

Tridon® 550 Series

Screw: 5/16" hex slotted, 410 stainless steel.
Band: 1/2" band width, 201/301 stainless steel.
Housing: 201/301 stainless steel.
Bridge: 410 stainless steel.

Combo-Hex® Clamps

Combo-Hex® clamps are the clamps professional mechanics choose most often. Particularly helpful in hard-to-reach areas, they feature an exclusive, safety-collared, deep-slotted screw design that prevents screwdrivers from slipping and puncturing the hose wall. Combo-Hex clamps can be installed with a screwdriver, nutdriver or socket wrench.

Ideal® 54 Series

Stainless Steel and Plated Parts.

Screw: 3/8" safety-collared, hex, deep-slotted, plated carbon steel.

Band: 9/16" band width. 201/301 stainless steel.

Housing: 201/301 stainless steel.

Surelock

Combo-Hex

Lox-On® Clamps

For extra-tough installations. Unique design provides double-locking security and high band tension for high sealing pressures.

Ideal® 69 Series

All 300 Series Marine Grade Stainless Steel.
Screw: 5/16" hex slotted, 300 stainless steel.
Band: 9/16" band width, 300 stainless steel with UPC shield.
Housing: Double locking, 300 stainless steel.

LOX-ON		CLAMPING RANGE					
SAE Sizes	Ideal Part No.	Min. Dia. (in.)	Max. Dia. (in.)	Min. Dia. (mm)	Max. Dia. (mm)	Band Length (in.)	Band Length (mm)
69							
12	6912	11/16	1 1/4	17	32	4 13/16	122
20	6920	11/16	1 3/4	17	44	6 13/32	163

Simplified inventory – just one size No. 6932, will handle from 1/2" through 2" pipe. Lox-On ships flat and disengaged – It's easy to stock, easy to store.

We recommend a minimum of all 300 grade stainless steel clamps for marine applications. For applications directly over galvanized steel, we recommend an intermediate layer of non-conductive material such as vinyl electrical tape.

69 Series

Insert band through buckle from underneath. Pull band snug about pipe and engage serration of band on inner lug.

Bend band at 90° from buckle and engage outer tooth with serration. Hold band down and tighten screw.

A. Illustrates Lox-On compression at only 20 in.-lbs. tightening torque on 160 PSI (high-density) polyethylene pipe. This is half the torque generally applied to conventional worm drive clamps.

B. Patented, offset buckle provides full circle seal. Lox-On conforms to the contour of the pipe.

IDEAL® Turn-Key® Clamps

Innovative design installs with a simple hand twist, no tools required. It's easy to remove and replace. Pull off the screw cap for a tamper-resistant connection.

Common Applications by Size

Automotive Hose Clamps: Heater = SAE sizes No. 12 or 20

Radiator = SAE sizes No. 28 or 36

Garden Hose Clamps: SAE size No. 12

RV Sewer Hose Clamps: SAE size No. 48

Dryer Vent Hose Clamps: SAE size No. 64

Material Specifications

Injection molded thermoplastic screw cap, removable and reusable.

Screw: Plated carbon steel.

Band: 1/2" band width, stainless steel.

Housing: Stainless steel.

IDEAL® Nylon Cable Ties

One piece 6/6 nylon for tying, bundling and positioning in industrial, PHAC, automotive and marine applications. Resistant to corrosion and fungus. Installs easily with or without tools.

Ideal® 665 Series

Self-locking, easy install. Corrosion and fungus resistant. Tapered tips slip under and around cables. Flexible nylon conforms readily to most shapes. Uniform serrations along the tie aid "pull-through" to ready for final tensioning and cut off for a neat, tight harness.

62MS/632 Series

61 Series

61001

Single-Ear Pinch / Crimp Clamps

Pinch clamps are designed to fit most popular polyethylene and polybutylene water service lines, and are perfect for sprinkler systems, irrigation systems and most other low-pressure applications.

Ideal® 61 Series

Marine Grade Clamps.

All 300 stainless steel for excellent corrosion resistance.

Welded construction for superior strength.

Easy installation.

Permanent, tamper-proof 360° seal.

Compatible with most clinching tools.

Accessories

Crimp Clamp Tool

Part No. 61001 – Use to install or remove pinch / crimp clamps.

How to determine proper pinch/climp clamp size:

Measure actual outside diameter (O.D.) of the hose on the fitting. Select the nominal size clamp nearest to that size, but always larger than the O.D. of the hose on the fitting.

IDEAL® Flexible Hose Clamp Driver

Stop using that old, rigid nut driver and add some flexibility to your work! The flexible shaft and slipless grip provide 90-degree work access and are best in tight spaces such as compact car and boat engines, as well as plumbing repair applications. The socket fits mini and standard hose clamp screw heads. Just flip the socket for the desired size of 1/4" or 5/16" hex.

Part No. 9999V - Flexible Hose Clamp Driver

Accessories

IDEAL® Flexible Driver Socket Replacements

Our convenient replacement socket set includes: Two - 1/4" x 5/16" and Two - 5/16" x 3/8" for even greater versatility.

Part No. 8001V – Flexible Driver Socket Replacements

PowerGrip™ SB 46 Series

PowerGrip™ shrink band clamps are made of heat-sensitive thermo-plastic with a memory that prevents them from over-tightening or under-tightening. Shrinks on with a heat gun. They are environmentally friendly, virtually eliminating antifreeze leaks and groundwater contamination. Heat gun, nozzles, removal tool and replacement blades also available.

We offer one of the most comprehensive lines of heavy-duty clamping products in the business. Our heavy-duty products include T-Bolts, Spring Loaded T-Bolts, V-Inserts, Heavy-Duty and Constant Tension worm drive clamps. We cover the world of heavy-duty truck, off-road and industrial applications. Ask us about custom engineering a product to meet your special sealing requirements.

Heavy-duty T-Bolt clamps provide uniform sealing pressure for a positive, reliable seal. Designed for use in high vibration and large diameter applications common in heavy trucks, industrial machinery, off-road equipment, agricultural irrigation and machinery. Features a 3/4" wide stainless steel band with welded construction for reliability. Styles are available in Part Stainless or All Stainless steel.

Standard T-Bolts

The most widely used T-Bolt clamp design. Typical applications include truck air intake systems, cold side charge air systems, off-road equipment and industrial machinery.

IDEAL® 30010 Series/ TRIDON® 813 Series

Lined Band & Bridge: 3/4" width, 201/301 stainless steel

Bolt: 1/4" plated carbon steel

Nut: 7/16" hex, plated carbon steel locknut, nylon insert

Trunnion: plated carbon steel

IDEAL® 30011 Series/ TRIDON® 811 Series

All 300 Grade Stainless Steel

Marine Grade Clamps

Channel Bridge T-Bolts

Provides the added assurance of a rigid bridge liner to help prevent leak paths – good for softer hoses. Typical applications include truck air intake systems, cold side charge air systems, off-road equipment and industrial machinery.

IDEAL® 30020 Series/ TRIDON® 814 Series

Lined Band & Bridge: 3/4" width, 201/301 stainless steel

Bolt: 1/4" plated carbon steel

Nut: 7/16" hex, plated carbon steel locknut, nylon insert

Trunnion: plated carbon steel

IDEAL® 30021 Series/ TRIDON® 810 Series

All 300 Grade Stainless Steel

Marine Grade Clamps

Spring Loaded T-Bolts

Helical spring design compensates and provides constant tension to prevent leak paths due to temperature fluctuations. Typical applications include heavy truck charge air and cooling systems.

IDEAL® 30030 Series/ TRIDON® 819 Series

Lined Band & Bridge: 3/4" width, 201/301 stainless steel

Spring: plated carbon steel

Bolt: 1/4" plated carbon steel

Nut: 7/16" hex, plated carbon steel locknut, nylon insert,

Trunnion: plated carbon steel

EGR Cooler Mounting (Rectangular T-Bolts)

Custom shaped to fit exhaust gas recirculation (EGR) cooler assemblies common in diesel trucks outfitted for new emissions standards. Manufactured to OE specifications provided. Samples shown here are non-stocking items. All EGR clamps are custom fit to cooler specification and made to order.

Diesel Particulate Filter Clamp – DPF (Not Shown)

Custom clamp made to specifications of the diesel particulate filter (DPF). Diesel Particulate Filters help reduce air pollutants by trapping soot from the diesel engine fuel in the filter. The filters need to be maintained and replaced according to the vehicle's recommended schedule. All DPF clamps are custom fit to DPF specifications and made to order.

High Performance Worm Drive Hose Clamps

Premium Pow'r-Gear® and Trimax® clamps are designed for high vibration and stubborn leakage applications such as industrial machinery, heavy truck, farm and off-road equipment engines. Features an extra wide 5/8" band and a wide profile housing that provides maximum engagement of screw threads to band. Engineered to deliver exceptionally high rates of band tension to handle the toughest sealing jobs.

IDEAL® Pow'r-Gear® 60 Series / TRIDON® Trimax® 850 Series

All Stainless Steel

Screw: 5/16" hex-head, 410 stainless steel.

Band: 5/8" band width, 0.028" thick, 300 stainless steel.

Housing: 0.060" thick, 300 stainless steel.

IDEAL® Pow'r-Gear® 6P Series

All 300 stainless steel, Marine grade clamps.

Screw: 5/16" hex-head, 305 stainless steel.

Lined Band: 5/8" band width, 0.028" thick, 300 stainless steel.

Housing: 0.060" thick, 300 stainless steel.

IDEAL® Pow'r-Gear® 6L Series / TRIDON® Trimax® 843 Series

For maximum protection of soft hoses. Protective liner prevents extrusion and shearing of hose through band notches. Extended band design prevents liner from skewing during installation.

All Stainless Steel

Screw: 5/16" hex-head, 410 stainless steel.

Band: 5/8" band width, 0.028" thick, 300 stainless steel.

Housing: 0.060" thick, 300 stainless steel.

IDEAL® Pow'r-Gear® 6M Series

All 300 stainless steel, Marine grade clamps.

Screw: 5/16" hex-head, 305 stainless steel.

Lined Band: 5/8" band width, 0.028" thick, 300 stainless steel.

Housing: 0.060" thick, 300 stainless steel.

IDEAL® Pow'r-Gear® 6X Series

Extra band notches allow greater opened and closed working diameters.

Only five sizes cover clamping diameters from 1 1/4" to 10 1/8".

Minimizes inventory investment without compromising applications coverage.

All Stainless Steel

Screw: 5/16" hex-head, 410 stainless steel.

Band: 5/8" band width, 0.028" thick, 300 stainless steel.

Housing: 0.060" thick, 300 stainless steel.

POW'R-GEAR® and TRIMAX® clamps deliver over 800 lbs. of band tension at 150 in.-lbs. of screw torque. That's more than twice the band tension of conventional clamps.

Measurements in illustrations are in inches [millimeters]

Better than the rest:

Our patented* WaveSeal 360™ construction consistently performs as well as or better than leading constant tension brands and styles. The clamp's low profile fits in tight spaces and is optimal for use on radiator, charge air and cooling systems, as well as other fluid and air conducting applications.

Tested and Proven:

Recent leak pressure tests show that the WaveSeal 360™ clamp performed better in thermal cycling than typical constant tension clamps, Belleville spring or spring loaded T-bolt styles. Further testing revealed WaveSeal 360™ performs even better over time when compared to other leading brands in the same category.

WaveSeal 360™ Clamps – 9/16" Band Width (14.29 mm)

Thermal cycling, cold flow and temperature fluctuations are among the main reasons leaks occur. The uniquely engineered peaks and valleys of the IDEAL® WaveSeal 360™ constant tension clamp help to secure hose connections and prevents the unwanted flow of fluids and air. Through its patented technology, the clamp seals in a steady 360-degree pattern in response to pressure and temperature changes. And with its compact design and lower profile, you get the optimal heavy-duty constant tension clamp without all the bulk.

Seals the deal:

Unique expansion and contraction creates a steady 360° seal in response to changing temperatures and works well with non-uniform hoses.

Prevents Cold Flow Leakage:

The two inward pointed ridges form points of high pressure and, between them, a low pressure center that creates an O-ring effect.

Common Uses:

- Hydraulic systems – Construction, agricultural and telecommunications equipment.
- Cooling systems – Heater hose, radiator hose and heat exchanger.
- Charged air systems – Cold and hot side diesel turbo charger, and air intake.

*U.S. Patent No. 7,178,204 B2

Flex-Gear® Constant Tension Clamps

Using a Belleville spring design to eliminate "cold flow" leakage, Flex-Gear® clamps adjust with the hose and fitting to maintain constant tension on the connection, eliminating leak paths. Excellent choice for fluctuating temperature applications and thermal compensation.

Features and Benefits:

Belleville spring and clamp construction is built to respond to constant temperature fluctuations. The larger, heavier-gauge, precision-formed springs provide higher rates of band tension and adjustment for a more dependable seal. Inner liner protects against shearing of the hose surfaces. Provides a uniform 360° seal. Reusable.

IDEAL® Flex-Gear HD® Clamps 41 Series

Screw: 3/8" hex-head, plated carbon steel.
Band: 5/8" band width, 300 stainless steel.
Liner: 300 stainless steel.
Housing: 300 stainless steel.
Springs: 300 stainless steel.

IDEAL® Flex-Gear HD® Clamps 45 Series

Screw: 3/8" hex-head, 410 stainless steel.
Band: 5/8" band width, 300 stainless steel.
Liner: 300 stainless steel.
Housing: 300 stainless steel.
Springs: 300 stainless steel.

IDEAL® Profit Centers - 120 Display

This compact, wall-mounted or counter display sells 120 full-size and Micro-Gear® clamps from 1/4" to 2 3/4" clamping ranges. Available in multiple assortments, the 120 display helps you sell more clamps in less space.

Size: 14 5/8" x 15 1/16" x 4 3/8". Contains: 120 clamps each*

*Assortments available with or without barcoded clamps.

Hardware Assortments

64 Series (Part No. 6402)

All stainless steel, 3/8" screw.
9/16" band width.

IDEAL® Profit Centers - 450 Display

This display features 450 full-size and Micro-Gear® clamps from 1/4" to 5" clamping ranges. Available in multi assortments, the 450 display includes a built-in size chart for easy clamp selection and a plan-o-gram. Mount it to a pegboard or place on a shelf.

Size: 26 1/4" x 25" x 6 1/4". Contains: 450 clamps each*

*Assortments available with or without barcoded clamps. All assortments ship with merchandiser.

Hardware Assortments

67-1 Series (Part No. 6705)

All stainless steel.
1/2" band width.

68 Series (Part No. 6805)

All stainless steel.
9/16" band width.

Marine Assortments

67-4 Series (Part No. 6702-4)

All 300 stainless steel.
1/2" band width.
IAPMO listed with UPC shield.

63-4 Series (Part No. 6705-6)

All 300 stainless steel.
9/16" band width.
IAPMO listed with UPC shield.

67-6 Series (Part No. 6305)

All 316 stainless steel.
1/2" band width.

Plumbing Assortments

67-5 Series (Part No. 6705-5)

All high-nickel grade stainless steel.
1/2" band width.
IAPMO listed with UPC shield.

63 Series (Part No. 6305)

All high-nickel grade stainless steel.
9/16" band width.
IAPMO listed with UPC shield.

Industrial Assortments

50 Series (Part No. 5005)

Band and housing: Stainless steel.
Screw: Plated steel.
9/16" band width.

57 Series (Part No. 5705)

Band and housing: Stainless steel.
Screw: Plated steel.
1/2" band width.

Automotive Assortments

50 Series (Part No. 5001)

Band and housing: Stainless steel.
Screw: Plated steel.
9/16" band width.

54 Series (Part No. 5405)

Band and housing: Stainless steel.
Screw: Plated steel, collared.
9/16" band width.

Stainless Steel Material Facts and Properties:

- The 300 grades of stainless steel are known as “non-magnetic.”
- The 400 grades of stainless steel and plated steel are known as “magnetic.”
- The 200 and 300 grades of stainless steel resist corrosion better than 400 grades of stainless steel and better than plated steel.
- Only 300 grades should be considered for marine applications.
- Applications that require IAPMO listed products can include grades of 200 and 300 stainless steels.
- Our clamps are compliant with the RoHS directive. All of our clamps are free of Hexavalent or Chromium 6 agents and are known as “hex-free.”
