

*New generation
of circular connectors
for heavy-duty applications*

VGE1/FER1 Connectors

Following MIL-DTL-5015 & VG 95234
and validated according to NFF 61030

SOURIAU
Connection Technology

VGE1/FER1 Series

SOURIAU

Connectors and interconnect systems for harsh environments

The company designs, manufactures and markets high performance interconnect solutions for severe environments from industrial broadband and universal ranges to complex system with integrated functions: filtering, high speed data transmission, hermetic seal, separation mechanism, remote handling, underwater mating, ...

Industrial

Aeronautical

Equipment & system

The dedicated end markets for SOURIAU's products are aeronautical, defense-space and industrial.

Railway
Geophysics
Manufacturing environment
Instrumentation
Automation & process

Civil & military aircraft
Helicopter
Weapon delivery system
Avionics

Military marine
Communications
Satellites
Launcher & missile

SOURIAU was established in 1917 and has been created by successive acquisitions of the industrial, aeronautical, defense and space activities of SOURIAU, JUPITER and BURNDY.

The Group's products are engineered and manufactured in the USA and Dominican Republic, Europe and Morocco, Japan and India, and sold by a worldwide sales and marketing organization, and in addition to SOURIAU's offices, a large network of licensed distributors and agents.

SOURIAU complies with most of national and international Quality Assurance Standards, production unit with ISO 14001.

VGE1/FER1 Series

Technical features & benefits

• Ruggedized full metal reverse bayonet connector

- Enabling 500 mating-unmating without wear out thanks to a stainless steel wear pin located at the critical point of mating.
- Secure locking device: audible “click” when mating; visible yellow dot to indicate end of mating.

• Dynamic* IP67

- Protected against the effects of temporary immersion between 15 cm and 1 m (duration of the test: 30 min).

* The connector remains sealed while the cable is moving. For rates IP68 and IP69K: consult us.

• Up to 500 hours salt spray resistance

- can be used in very severe environment thanks to Zn-Co plating.

• High performance signal transmission

- TRIM TRIO contact.
- 360° shell Shielding permit to decrease all signal perturbations.

• In accordance with railway standards

- As per the French railway standard NFF 61 030 and the fire & smoke standards NFF 16 101, NFF 16 102.

VGE1/FER1 Series*

VGE1 Series

Completely intermountable with VG 95234 : the MS 5015 reverse bayonet connectors

Description

This connector series is an enhanced version of the VG 95234 connector standard but remains completely intermountable with VG 95234 : the MS 5015 reverse bayonet connectors.

- This connector series is also in conformity with the French railways standard NFF 61030.
- The insulator is in hard thermoplastic, classified UL94VO. It is also classified I2F3 following NFF 16101-16102 standards.
- An interfacial seal is present on the male inserts to extend the creepage distance and to have a better sealing when the connector is mated.
- The insulator is retained into the plug or receptacle shell by a metallic retaining ring which can be removed with a small screwdriver. Once removed, user can define insulator orientation.
- Contacts gauge 8, 12 or 16 are machined crimp contacts, removable thanks to a clip on the contact.
- No tools are needed to insert contacts into the insulator. An extraction tool is available to extract the contacts. The tool is engaged by the front face of the connector and the contacts are rear released.
- Contacts are crimped thanks to very common toolings.
- The connector is rated IP67 when mated and used with backnut and grommet (please refer to page 16 to check the wires diameters), or suitable accessories (ex: sealed backshell). It is unsealed when used with cable clamp without grommet.
For rates IP68 and IP69K (in dynamic): consult us.
- Backshells can be derivated from VG 95234 standards or SOURIAU VGE1 backshells adapted to the railways market needs.
- This connector can be supplied fully assembled or in component form (please consult us).

*** FER1 is a threaded version of VGE1 available in sizes 18-22-28**

VGE1/_{FER1} Series

Description

Receptacle

Plug

FER1 is a threaded version of VGE1 available in sizes 18 - 22 - 28

Receptacle

Plug

VGE1/FER1 Series

Technical Features

Mechanical

- Mechanical endurance : 500 mating and unmating
- Minimum retention force of the contact in the insulator :
 - 70 N for contacts # 16 (1.6 mm)
 - 90 N for contacts # 12 (2.4 mm)
 - 110 N for contacts # 8 (3.6 mm)

Minimum values with a maximum displacement of the contact of 0.3 mm (following NFF 61030)

- Retention of the insulator in the shell : (following MIL-C-26482G Series 2 class L standard)
- Bayonet coupling mechanism - Coupling torque : following VG 95234
- Vibrations : following NFF 61030
 - Sinus vibrations : 10 - 100 Hz
 - Acceleration : 2 g
- Shocks : Acceleration = 30 g
Duration = 18 ms following NFF 61030
- Impact strength (free fall of the plug).
The connector plug is subjected to a free fall test. The height of drop is 0.75 m.
No mechanical damage.

Electrical

- Contact resistance :
 - 2.5 m Ω maxi for contact # 16
 - 1.3 m Ω maxi for contact # 12
 - 0.9 m Ω maxi for contact # 8 following NFF 61030
- Maximum current per contact :
 - 15 Amps for contact # 16
 - 20 Amps for contact # 12
 - 30 Amps for contact # 8
- Withstanding voltage :
 - 2550 Vrms for layouts # 16
 - 3250 Vrms for layouts # 12 and 8
- Insulation resistance :
 - ≥ 5000 M Ω under 500 Vcc
 - ≥ 4000 M Ω under 220 Vcc
- Electrical continuity of the shells : 20 m Ω maximum
- In mated conditions (interfacial seal is in compression)
minimum creepage distance = minimum insulation distance in the air :
 - 9 mm minimum for layouts with contacts # 16
 - 12 mm minimum for layouts with contacts # 12 or # 8

Environmental

- Climatic category : -40°C +100°C
Dry heat test : +100°C during 96 h

- Corrosion spray resistance : up to 500 hours salt spray
- Damp heat : 21 days, 40°C, 95% relative humidity
- Water protection : the connector is rated IP67 when mated and used with backnut and grommet (please refer to page 16 to check the wires diameters), or suitable accessories (ex: sealed backshell). (Immersion under 1m maxi of water during 30 min). It is unsealed when used with cable clamp without grommet.
- Material rated I2F3 following NFF 16101-16102 and UL 94 VO
- Fluid resistance : gas oil, mineral oil, acid bath, basic bath, following NFF 61030

Material

- Shell in aluminium alloy with black zinc cobalt plating
- Insulator : hard thermoplastic with glass fiber
- O'ring and interfacial seal in silicone
- Retaining insulator ring in carbon steel

This full product range is qualified by ALSTOM, RATP and SNCF.

Robustness and high reliability of the locking mechanism

VGE1/FER1 Series

Connector Ordering Information

(without contacts and accessories)

Shells, backshells, contacts and accessories have to be ordered separately

Series	VGE1	B	22	— 14	P	N	--
Shell type							
B	Rear mounting receptacle						
D	Plug						
C	Rear mounting receptacle for PC tails contact # 16						
H	Jam Nut Receptacle with EMI Lamella						
Shell size : 18 - 20 -22 - 24 - 28 - 32 - 36 - 40							
Layouts							
Contact type : P - Pin S - Socket							
Insert Orientation : N ; W ; X ; Y ; Z or 0 0 = for insulator not installed in the shell							
Modification Code : <i>Please consult us</i>

VGE1/FER1 Series

Contacts

Contacts come from our well known TRIM-TRIO® Series.

They are precision solid machined crimp snap-in pins and sockets for heavy duty top performance requirements.

Springs on both contacts are made of spring-tempered, heat treated, beryllium copper.

The socket inner spring supplies high contact pressure to ensure low-resistance contact between pin and socket. The socket contact features closed entry to prevent probe damage. Crimp barrels have insulation grips for vibration support and are provided with a cable stop and inspection hole.

Construction

- **Contact body :**
High conductive copper alloy
- **Outer spring :**
Tempered, heat treated, beryllium copper
- **Inner spring socket :**
Tempered, heat treated, plated beryllium copper

Plating table

Au = Gold plated : minimum of 0.4 μm of Gold all over, over nickel coating

Ag = Silver plated 5 μm of silver all over

Panel Cutout

Shell size	A ± 0.15	B 0/+0.3	C ± 0.10	Maximum thickness of the panel for rear mounting
18	27	31,2	3,4	3
20	29,4	34,6	3,4	3
22	31,8	37,8	3,4	3
24	34,9	41,3	3,9	3
28	39,7	47,1	3,9	3
32	44,5	53,8	4,5	3
36	49,2	60	4,5	3
40	55,5	66,4	4,5	3

Note : The above panel cut-out enables front mounting of all receptacles.

VGE1/FER1 Series

Wiring Instructions

1 - Cable preparation

Length of wire stripping

- Contact # 16 L = 7 mm
- Contact # 12 L = 9 mm
- Contact # 8 L = 9 mm

2 - Contact insertion

Take the crimped wire, insert the contact into the cavity and then push it until the mechanical stop. Pull slightly on the wire to be sure that the contact is in the right position.

3 - Contact extraction

An extraction tool is available to extract the contacts. The tool is engaged by the front face of the connector and the contacts are rear released.

Note : Full wiring instruction form available upon request.

4 - Crimping

The choice of the crimping tools we recommend on page 20, has been done to respect the NFF 61030 specifications : simultaneous cruciform stamping with 4 stamps comprising 2 impressions.

Appendix 1 : Heating curves of VGE1 connector function of intensity and conductor section

VGE1/FER1 Series

Appendix 2 : Coupling/Uncoupling of VGE1 connectors

Coupling and uncoupling of the connector with a tool is recommended (but not mandatory) for coupling torque ≥ 8 mN. The below chart defines the number of coupling/uncoupling cycles to reach this torque. In any case VGE1 connectors keep all their performances until 500 cycles.
