

# SN74LV4066A Quadruple Bilateral Analog Switches

## 1 Features

- 1.65V to 5.5V  $V_{CC}$  operation
- Support mixed-mode voltage operation on all ports
- High on-off output-voltage ratio
- Low crosstalk between switches
- Individual switch controls
- Extremely low input current
- ESD protection exceeds JESD 22:
  - 2000-V Human-Body Model (A114-A)
  - 200-V Machine Model (A115-A)
  - 750-V Charged-Device Model (C101)

## 2 Applications

- [Infotainment](#)

## 3 Description

This quadruple silicon-gate CMOS analog switch is designed for 1.65V to 5.5V  $V_{CC}$  operation.

These switches are designed to handle both analog and digital signals. Each switch permits signals with amplitudes up to 5.5V (peak) to be transmitted in either direction.

Each switch section has its own enable-input control (C). A high-level voltage applied to C turns on the associated switch section.

Applications include signal gating, chopping, modulation or demodulation (modem), and signal multiplexing for analog-to-digital and digital-to-analog conversion systems.

### Package Information

| PART NUMBER | PACKAGE <sup>(1)</sup> | PACKAGE SIZE <sup>(2)</sup> |
|-------------|------------------------|-----------------------------|
| SN74LV4066A | D (SOIC, 14)           | 8.65mm × 6mm                |
|             | PW (TSSOP, 14)         | 5mm × 6.4mm                 |
|             | RGY (QFN, 14)          | 3.5mm × 3.5mm               |

(1) For more information, see [Section 10](#).

(2) The package size (length × width) is a nominal value and includes pins, where applicable.

## 4 Pin Configuration and Functions

**Figure 4-1. D or PW Package, 14-Pin SOIC or TSSOP (Top View)**

**Figure 4-2. RGY Package, 14-Pin QFN (Top View)**

**Table 4-1. Pin Functions**

| PIN             |     | TYPE <sup>(1)</sup> | DESCRIPTION   |
|-----------------|-----|---------------------|---|
| NAME            | NO. |                     |   |
| 1A              | 1   | I/O                 | Input/Output to switch channel 1  |
| 1B              | 2   | I/O                 | Input/Output to switch channel 1  |
| 2B              | 3   | I/O                 | Input/Output to switch channel 2  |
| 2A              | 4   | I/O                 | Input/Output to switch channel 2  |
| 2C              | 5   | I                   | Control line for channel 2. Switch is ON when control pin is high.  |
| 3C              | 6   | I                   | Control line for channel 3. Switch is ON when control pin is high.  |
| GND             | 7   | —                   | Ground (0V) reference   |
| 3A              | 8   | I/O                 | Input/Output to switch channel 3  |
| 3B              | 9   | I/O                 | Input/Output to switch channel 3  |
| 4B              | 10  | I/O                 | Input/Output to switch channel 4  |
| 4A              | 11  | I/O                 | Input/Output to switch channel 4  |
| 4C              | 12  | I                   | Control line for channel 4. Switch is ON when control pin is high.  |
| 1C              | 13  | I                   | Control line for channel 1. Switch is ON when control pin is high.  |
| V <sub>CC</sub> | 14  | —                   | Positive power supply. This pin is the most positive power-supply potential. For reliable operation, connect a decoupling capacitor ranging from 0.1μF to 10μF between VDD and GND. |
| Thermal pad     |     | —                   | It is recommended to tie the pad to GND for the best performance.   |

(1) Signal types: I = input, O = output, I/O = input or output.

## 5 Specifications

### 5.1 Absolute Maximum Ratings

over operating free-air temperature range (unless otherwise noted)<sup>(1) (3)</sup>

|                  |   |  | MIN  | MAX                   | UNIT |
|------------------|---|--|------|-----------------------|------|
| V <sub>CC</sub>  | Supply voltage                                    |  | −0.5 | 7.0                   | V    |
| V <sub>I</sub>   | Logic input voltage range                         |  | −0.5 | 7.0                   | V    |
| V <sub>IO</sub>  | Switch I/O voltage range <sup>(2) (3)</sup>       |  | −0.5 | V <sub>CC</sub> + 0.5 | V    |
| I <sub>IK</sub>  | Logic input clamp current                         | V <sub>I</sub> < 0                                       | −20  |                       | mA   |
| I <sub>IOK</sub> | Switch path diode clamp current                   | V <sub>IO</sub> < 0 or V <sub>IO</sub> > V <sub>CC</sub> | −50  | 50                    | mA   |
| I <sub>T</sub>   | Switch continuous current                         | V <sub>IO</sub> = 0 to V <sub>CC</sub>                   |      | ±25                   | mA   |
|                  | Continuous current through V <sub>CC</sub> or GND |  |      | ±50                   | mA   |
| T <sub>J</sub>   | Junction temperature                              |  |      | 150                   | °C   |
| T <sub>stg</sub> | Storage temperature                               |  | −65  | 150                   | °C   |

- (1) Operation outside the *Absolute Maximum Ratings* may cause permanent device damage. Absolute maximum ratings do not imply functional operation of the device at these or any other conditions beyond those listed under *Recommended Operating Conditions*. If briefly operating outside the *Recommended Operating Conditions* but within the *Absolute Maximum Ratings*, the device may not sustain damage, but it may not be fully functional. Operating the device in this manner may affect device reliability, functionality, performance, and shorten the device lifetime.
- (2) Pins are diode-clamped to the power-supply rails. Over voltage signals must be voltage and current limited to maximum ratings.
- (3) This value is limited to 5.5V maximum

### 5.2 ESD Ratings

|                    |                         |  | VALUE | UNIT |
|--------------------|-------------------------|--|-------|------|
| V <sub>(ESD)</sub> | Electrostatic discharge | Human body model (HBM), per ANSI/ESDA/ JEDEC JS-001, all pins <sup>(1)</sup>             | ±2000 | V    |
|                    |                         | Charged device model (CDM), per JEDEC specification JESD22-C101, all pins <sup>(2)</sup> | ±1000 |      |

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

## 7 Detailed Description

### 7.1 Functional Block Diagram

Figure 7-1. Logic Diagram (Positive Logic)

### 7.2 Device Functional Modes

Table 7-1. Function Table

| Input Control (C) | Switch |
|-------------------|--------|
| L                 | OFF    |
| H                 | ON     |

## 8 Device and Documentation Support

TI offers an extensive line of development tools. Tools and software to evaluate the performance of the device, generate code, and develop solutions are listed below.

### 8.1 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on [ti.com](http://ti.com). Click on *Notifications* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

### 8.2 Support Resources

[TI E2E™ support forums](#) are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

### 8.3 Trademarks

TI E2E™ is a trademark of Texas Instruments.  
All trademarks are the property of their respective owners.

### 8.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

### 8.5 Glossary

[TI Glossary](#) This glossary lists and explains terms, acronyms, and definitions.

## 9 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

| Changes from Revision I (April 2006) to Revision J (February 2024)  | Page               |
|---|--------------------|
| • Updated the numbering format for tables, figures, and cross-references throughout the document.....   | <a href="#">1</a>  |
| • Removed the SN54LV4066A information from the data sheet.....  | <a href="#">1</a>  |
| • Increased $V_{CC}$ operation from: 2V to 5.5V to: 1.65V to 5.5V, and updated specifications such as $r_{ON}$ , $r_{ON(p)}$ $\Delta r_{ON}$ accordingly..... | <a href="#">1</a>  |
| • Changed RL value from: 600Ω to: 50Ω for frequency response, crosstalk, and feed-through attenuation, and their associated figures.....                      | <a href="#">10</a> |

## 10 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

<sup>(1)</sup> **Status:** For more details on status, see our [product life cycle](#).

<sup>(2)</sup> **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

<sup>(4)</sup> **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

<sup>(5)</sup> **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

SMALL OUTLINE INTEGRATED CIRCUIT

4220718/A 09/2016

**NOTES:**

1. All linear dimensions are in millimeters. Dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. This dimension does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.15 mm, per side.
4. This dimension does not include interlead flash. Interlead flash shall not exceed 0.43 mm, per side.
5. Reference JEDEC registration MS-012, variation AB.

4219040/A 09/2015

NOTES: (continued)

5. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.

## IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATA SHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES "AS IS" AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI's products are provided subject to [TI's Terms of Sale](#) or other applicable terms available either on [ti.com](https://www.ti.com) or provided in conjunction with such TI products. TI's provision of these resources does not expand or otherwise alter TI's applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
