#6050 RECHARGEABLE LASERPRO™ SYSTEM

The LaserPro™4D is an industrial/professional quality multi-use spotlight. It is made of unbreakable ABS body with polycarbonate lens and thermoplastic rubber shroud. Features include a dual filament Xenon back-up safety lamp, operating during 30 hours each filament (60 hours in total). It includes a multi-position, ergonomically designed handle (that fits gloved hands), adjustable position foldaway stand and double switch. The Rechargeable LaserPro™System is equipped with the battery pack pre-installed ready for charging. The system includes: Rechargeable LaserPro™, handy desk/dash wall mount Smart charger base, 110V transformer, hi-capacity rechargeable battery pack and #6054 Xenon high performance lamp. The Rechargeable LaserPro™System is submersible to 250 feet and not approved for hazardous location use. You break it, we replace it... forever.
