

POWER-SUBCON PSC 1,5/...

POWER-SUBCON combines the principle of the MINI-COMBICON plug connectors with the good shielding features and the geometry of the D-SUB connectors.

The original 9-position D-SUB connector turns into a 3-position POWER-SUBCON, and there are 5 screw connections in the 15-position D-SUB connector. Both connector types can be inserted into standard D-SUB housings.

The high current carrying capacity of 8 A for a rated voltage of 250 V is a result of the robust MINI-COMBICON screw connection.

The headers are optionally available with a pre-mating ground contact for both numbers of positions.

Furthermore, a variant with integrated filter capacitor resp. varistor is available (see also part catalog 7, p.p. 82/83)

POWER-SUBCON
PSC 1,5/...

Note:
Only actuate MINI-COMBICON plug connectors when under no load condition. If for operating reasons small loads must be switched, experimental values are available on request.

Description	No. of positions
POWER-SUBCON plugs, shielded, color: green	3 5
POWER-SUBCON cable housing	3 5

Approval data (UL and CSA)

Nominal voltage / current / conductor sizes	UL: [V]/[A]/AWG
