

CPCI and DPCI Standard Series Hot Swap Power Supplies

- Features
- Fully Compliant with PICMG® CompactPCI® Specification
 - Forced Current Sharing and Internal OR-ing Diodes for N+1 Redundancy
 - High Current 5 V and 3.3 V Outputs
 - 150 W in 3 U × 8 HP, 350 W in 6 U × 8 HP CompactPCI® Package Requiring only 15 cfm of External Air
 - Universal AC Input with Power Factor Correction
 - 48 VDC Input Version and AC Universal Input Version Available

Both the CPCI and DPCI standard series have current sharing, internal Or-ing diodes and a hot plug input/output/signal connector providing a standalone redundant power solution. Compatible AC and DC units allow standardization of system mechanicals on a single power supply series.

CPCI Series — AC Input

The CPCI series of high reliability power supplies are designed for telecommunications and industrial systems requiring redundancy and modularity. These low-cost, high density units meet the electrical and mechanical requirements of the PICMG® specifications for CompactPCI® systems. **Connector:** 47 pin modular, except where noted.

DPCI Series — DC Input

The DPCI series of high reliability power supplies are designed for DC input systems, telecommunications and industrial equipment requiring redundancy and modularity. These low-cost, high-density units meet the electrical and mechanical requirements of the PICMG® specification for CompactPCI® systems.

1000 W Single Output Power Supplies

- Features
- 1000 W
 - Power Factor Corrected
 - Single Output, Hot Swappable
 - Diode Isolated Output for Hot Swap
 - "Zero Wire" Slope Program Current Sharing
 - High Power Density 6.5 W/Cu. In.
 - Industry Standard DIN Connector
 - 0.99 Typical Power Factor
 - DC Power Good and AC Power Fail Signals
 - True Remote Inhibit
 - Monotonic Turn-On and Turn-Off
 - Extended Temperature Operation
 - High Efficiency 87% Typical (48 V Units)

The 1000 W TCM series hot swappable power supplies deliver remarkable economy and reliability in applications that require redundancy over extended temperature ranges. These high-density, single-output supplies are available with a front panel and handle for use in subsystems racks or without handles for embedded applications. Power factor correction, OR-ing diodes, and current sharing make the TCM series an ideal choice for communications and data processing systems utilizing distributed power or redundant power architecture. **Specifications. Dimensions:** 13.27" × 4.87" × 2.49". **Weight:** 5.2 Lbs. **Operating Temperature Range:** –20°C to +60°C.

The SPH-1200 series provides low-cost, highly reliable, N+1 redundant hot swap power for critical applications. These 1200 W single output power supplies include an integral fan and are available with a front panel and handle for front access in sub-system racks or without handles for embedded applications. Power factor correction, OR-ing diodes, and current sharing make the SPH series an ideal choice for communications and data processing systems utilizing distributed power or redundant power architecture. **Dimensions:** 13.44" × 5.00" × 4.03". **Weight:** 7.3 lbs.

TRS Power Supply 19" Rack System for TCM and SPH Series

- Features
- N+1 Redundancy
 - Front Access
 - Hot Pluggability
 - Up to 6 kW in One 3 U (5¼") Rack
 - Field Configurable
 - Single Phase or 3 Phase Input
 - Blank Filler Panels Available

Consult factory for value added instrumentation and custom paint color options. Racks and power supplies are shipped separately.
