- 8-Line to 1-Line Multiplexers Can Perform as:
 - Boolean Function Generators
 - Parallel-to-Serial Converters
 - Data Source Selectors
- Package Options Include Plastic Small-Outline (D) and Ceramic Flat (W)
 Packages, Ceramic Chip Carriers (FK), and Standard Plastic (N) and Ceramic (J)
 300-mil DIPs

description

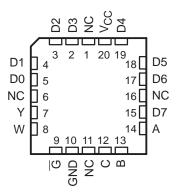

These monolithic data selectors/multiplexers provide full binary decoding to select one of eight data sources. The strobe (\overline{G}) input must be at a low logic level to enable the inputs. A high level at the strobe terminal forces the W output high and the Y output low.

The SN54HC151 is characterized for operation over the full military temperature range of -55°C to125°C. The SN74HC151 is characterized for operation from -40°C to 85°C.

NC - No internal connection

FUNCTION TABLE

	II.	OUTI	PUTS		
,	SELECT	-	STROBE	_	w
С	В	Α	G	'	**
Х	Χ	Х	Н	L	Н
L	L	L	L	D0	D0
L	L	Н	L	D1	D1
L	Н	L	L	D2	D2
L	Н	Н	L	D3	D3
Н	L	L	L	D4	D4
Н	L	Н	L	D5	D5
Н	Н	L	L	D6	D6
Н	Н	Н	L	D7	D7

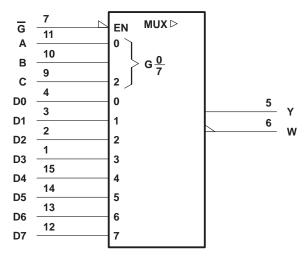

D0, D1 \dots D7 = the level of the respective D input

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

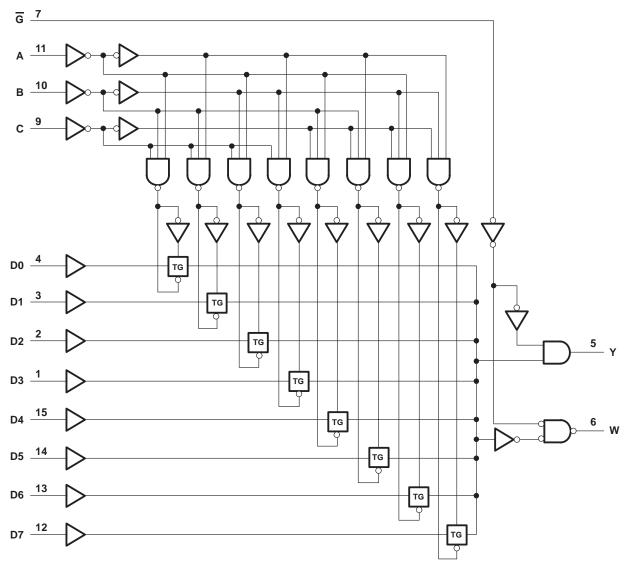

logic symbol†

 $^{^\}dagger$ This symbol is in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12. Pin numbers shown are for the D, J, N, and W packages.

logic diagram (positive logic)

Pin numbers shown are for the D, J, N, and W packages.

SN54HC151, SN74HC151 8-LINE TO 1-LINE DATA SELECTORS/MULTIPLEXERS

SCLS110C - DECEMBER 1982 - MAY 1997

absolute maximum ratings over operating free-air temperature range†

Supply voltage range, V _{CC}	–0.5 V to 7 V
Input clamp current, I _{IK} (V _I < 0 or V _I > V _{CC}) (see Note 1)	±20 mA
Output clamp current, I _{OK} (V _O < 0 or V _O > V _{CC}) (see Note 1)	±20 mA
Continuous output current, I_O ($V_O = 0$ to V_{CC})	±35 mA
Continuous current through V _{CC} or GND	±70 mA
Package thermal impedance, θ _{JA} (see Note 2): D package	113°C/W
N package	78°C/W
Storage temperature range, T _{sto}	–65°C to 150°C

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

recommended operating conditions

PARAMETER MEASUREMENT INFORMATION VCC From Output Test Input 50% 50% **Under Test Point** C_L - tPLH → (see Note A) In-Phase Vон 90% 50% Output **LOAD CIRCUIT ⋖**─ tpHL - Vcc 90% 90% Input 50% 90% Out-of-Phase 50% Output v_{OL} **VOLTAGE WAVEFORM VOLTAGE WAVEFORMS INPUT RISE AND FALL TIMES** PROPAGATION DELAY AND OUTPUT TRANSITION TIMES

- NOTES: A. C_L includes probe and test-fixture capacitance.
 - B. Phase relationships between waveforms were chosen arbitrarily. All input pulses are supplied by generators having the following characteristics: PRR \leq 1 MHz, Z_O = 50 Ω , t_f = 6 ns.
 - C. The outputs are measured one at a time with one input transition per measurement.
 - D. tpLH and tpHL are the same as tpd.

IMPORTANT NOTICE

Texas Instruments and its subsidiaries (TI) reserve the right to make changes to their products or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed, except those mandated by government requirements.

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH, PERSONAL INJURY, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE ("CRITICAL APPLICATIONS"). TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER'S RISK.

In order to minimize risks associated with the customer's applications, adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards.

TI assumes no liability for applications assistance or customer product design. TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right of TI covering or relating to any combination, machine, or process in which such semiconductor products or services might be or are used. TI's publication of information regarding any third party's products or services does not constitute TI's approval, warranty or endorsement thereof.
