ÖLFLEX® SERVO FD 796 CP cables are high-flexible, screened, oil-resistant, halogen free, low capacitance servo motor cables with an outer sheath of Polyurethane. They are designed for use in high-dynamic applications with acceleration up to 50 m/s² in power chains as well as for fixed installation subject to medium mechanical load conditions. They are among others designed for use in dry, damp and wet conditions. Outdoor use: They may only be installed considering the indicated temperature range. ÖLFLEX® SERVO FD 796 CP cables are increased oil resistant and at room temperature widely resistant to acids and caustic solutions. The outer sheath is resistant to high mechanical load, particularly to abrasion and scouring, is cut resistant, microbe-proof and hydrolysis resistant. Usage on cable drums or pulleys or under a tensile strain of more than 20 N/mm² conductor cross-section is not allowed. The screen is a protection against electrical interference, the data pairs are additionally screened.

Application range:

Connecting cable between servo controller and motor, in power chains or moving machine parts, for use in assembling- & pick-and-place machines, machine tools and transfer lines, for assembly lines, production lines in all kind of machines.

Use acc. to UL: PUR sheathed cable for external wiring of electronic equipment.

Use acc. to CSA: PUR sheathed cable for external wiring of electronic equipment
with or without mechanical load conditions.
