

Visual Signals LIGHT EMITTING DIODE BEACONS

E-Flare - 350 LED Portable Beacon Series>

Product overview

Suitable for a wide range of applications the E-Flare beacon has been designed with versatility in mind. The unit provides a highly visible warning zone, day or night. These beacons are single colour only and incorporate a failsafe activation switch to prevent

accidental turn on or off. The units are powered by four 'AA' Cell Alkaline batteries (not supplied) that will provide at least 30 hours of peak brightness operation. See below for the range of accessories for the E-Flare portable beacon. The units are supplied with a lanyard (as standard) for hanging/ wearing the unit.
