

Surface Mount Optically Coupled Isolator Types HCC240, HCC242, TX, TXV, ESA-XN

Features

- Surface mountable on ceramic or printed circuit board
- Miniature package saves circuit board area
- Electrical performance similar to 4N22A and 4N24A
- Hermetically sealed
- Screened per MIL-PRF-19500 TX and TXV equivalent levels or per ESA 5000⁽⁶⁾

Description

The HCC240 and HCC242 are optically coupled isolators, consisting of a gallium aluminum arsenide LED and a silicon phototransistor mounted and coupled in a miniature surface mount hermetic leadless chip carrier. The HCC240 and HCC242 are identical except for the DC current transfer ratio. Electrical parameters are similar to the JEDEC registered 4N22A and 4N24A. These solid state couplers are ideal for designs where board space and device weight are important design considerations. Typical screening and lot acceptance tests are provided on page 13-4. The burn-in condition is $V_{CE} = 9\text{ V}$, $P_D = 275\text{ mW}$, $I_F = 20\text{--}50\text{ mA}$ (adjusted to achieve PD). No HTRB is performed on this device.
