7. Precautions in Using the Demo Board for Evaluation

- An about 30cm long cable for input signal & power supply connection is attached with the demo set.
However, please make the signal connection between MCU/DSP and the DIP-IPM as short as possible.
- Please select the proper shunt resistance corresponding to the current rating of the DIP-IPM.
(68m Ω for PS21962, 33m Ω for PS21963, 22m Ω for PS21964, 16m Ω for PS21965)
