

Roller tinning machine RTM 220

Roller tinning machine for the manual production of printed circuit boards.

The secure design has safety features such as tin bath protection (to prevent starting when the tin is solid) and over temperature protection. Also a standard fume extraction outlet is on the models.

CIF supplies you also the accessories such as the solder, the solder bath salts and the organic flux to complete the product.

- **Precise deposit**
- **Compact & secure machines**
- **Stainless steel**
- **Exhaust pipe for fumes**
- **Lead free qualified**
- **Strong construction**
- **Filtration option**

RTM 220 Model

Description	Item Code
RTM 220, lead free version	DP 63.SP

Technical characteristics	RTM 220
---------------------------	---------

Tinning length	220 mm
Solder bath capacity	6 kg
Dimensions (L x w x H)	440 x 260 x 210 mm
Net weight without solder	22 kg
Power	1 KW
Electrical supply	230 V- 50/60 Hz
