

# Separate units ø 22: Heads

IP 66  
To be combined with a clip and electrical blocks (p. 48)  
Equipped with a locking ring  
Plastic chrome bezel - Black bezel on request (form p. 79)  
Conform to IEC 60947-5-1

Characteristics (p. 94)  
Cross reference list (p. 311)

## ▶ EMERGENCY STOP ACTUATORS - EN 418:

For equipment subject to Machine Security Directive CE 98/37 and EN60204 standard.

BACO emergency stop switches EN418 and contact blocks meet the requirements of the European Machine Directive EN 418 and EN60947-5-5 specification.

Our E-stops provide the "fool-proof" or "tease-proof" emergency stop switch feature - described below, that latches in the emergency stop command and then switches the contact state to open the circuit and shut down the equipment.

"After the emergency stop command has been generated during actuation of the emergency stop device, the command shall be maintained by engagement (latching-in) of the actuating means. The emergency stop command shall be maintained until the emergency stop device is reset (disengaged). It shall not be possible for the emergency stop device to engage without generating the stop command."

Simply stated, this directive indicates that the latching mechanism of the switch is activated when the actuator is pushed to a certain point. The switch will continue to remain in this latched position until manually reset by twisting to release.

## ► NOT-AUS TASTER - ÜBERLISTUNGSSICHER NACH EN418

Not-Aus Taster entsprechen der IEC 60947-5-5 und DIN EN 60204. Sie sind durch einen zwangsgeführten mechanischen Bewegungsablauf überlistungssicher nach EN418. Zum Schutz gegen versehentliches Betätigen muss ein Druckpunkt überwunden werden. Die Tasten rasten in gedrückter Stellung ein und werden durch eine Rechtsdrehung entriegelt. Durch die Formgebung des Betätigungselementes ist die Schalttaste blockiergeschützt. Das heißt, ein eingeleiteter Not-Aus-Vorgang kann nicht durch verklemmende Gegenstände unterbrochen werden.

# Schaltpläne

## ARBEITSWEISE DER KONTAKTE

Für Drehschalter 3 Stellungen  
Aktivierte Elemente

Kontakt von vorn betrachtet

Nicht aktiviert

Aktiviert

Stellung des Knebels  
(von vorn betrachtet)

Zustand der Kontakte  
(von vorn betrachtet)

## FUNKTIONSWEISE JOYSTICK

2 Stellungen

4 Stellungen

## ANSCHLUSSSCHALTPLAN LAMPENTESTELEMENT UND LED-ELEMENT

Für Speisung 24 V und 48 V AC/DC  
Test mit 1 Diode

Für Speisung 24 V und 48 V AC/DC  
Test mit 2 Dioden

Für Speisung 130 V und 48 V AC  
Zusammenbau Test + LED (auf Anfrage)

## MONTAGE AUF LEITERPLATTE
