Article No.: **259442**

Sales text **Undervoltage release**

Non-delayed disconnection of NZM circuit-breakers or N switch-disconnectors when the control voltage sinks below 35 – 70% U_s .

For use with Emergency-Stop devices in conjunction with Emergency-Stop button.

Notes concerning the product group

When the undervoltage release is de-energized, accidental contact with the main contacts of the switch during attempts to switch on, is safely prevented .

Undervoltage release cannot be installed simultaneously with NZM...–XHIV... early-make auxiliary contact or NZM...–XA... shunt release.
