

# Power Management IC

2007/4-

Our goal is to be a true partner that strategically contributes to your product development through our concept of "saving technologies" that save power, time, and space.

## Power Management IC

The market for semiconductors is expanding quickly as communications devices become increasingly ubiquitous in society.

Demand is growing for semiconductors for products ranging from mobile phones and other mobile devices and information terminals, automobile devices, and home appliances.

There is growing demand for more functions and better performance, namely, battery-operated devices, long-term operation with limited power, thinner and lighter devices, a shorter product cycle, and quicker development.

Never before has development of new products been more challenging.

We have been focusing on the creation of compact and low power semiconductors since we began development of a CMOS LSI for watches in 1969.

Through this process we have acquired expertise in power saving, space saving, and time saving.

The result was that we quickly obtained the semiconductor development technology that is required by a society with ubiquitous communications.

Our unique range of technologies and passion for excellence enables us to provide high value added solutions that fully meet your demands.

Our goal is to be a true partner that strategically contributes to your product development through our concept of "saving technologies" that save power, time, and space.

## Introduction of auto luminance control LED drivers that can realize "real-time auto luminance control" of the backlight of portable devices

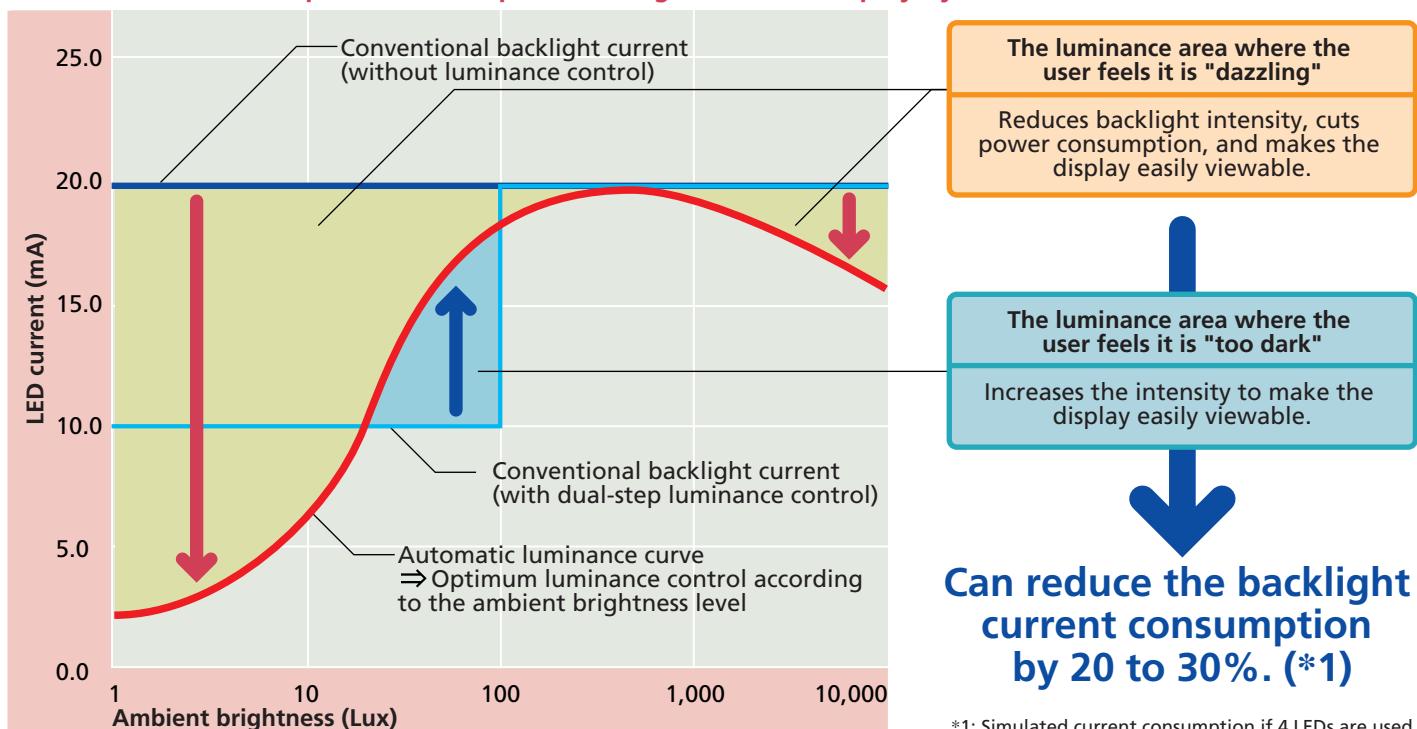

### New Product

### Auto luminance control LED drivers/controllers S1F76680/87110

As Epson's original luminance control data is stored, the LED driver can realize **real-time auto luminance control** according to the ambient brightness just when a photosensor is connected to it. This automatic luminance control function can reduce the LED current consumption by 20 to 30% and also realize a highly viewable display. As the LED driver has a built-in I2C interface, the customer can set up customized luminance control data in the driver and control the luminance of any type of display appropriately.

Our product lineup, consisting of the S1F76680 primarily used for luminance control of main displays, and the S1F87110 for control of auto luminance by PWM when connected to the existing LED driver, will be extended.

#### ■ Can realize the low power consumption but high viewable display by automatic luminance control.

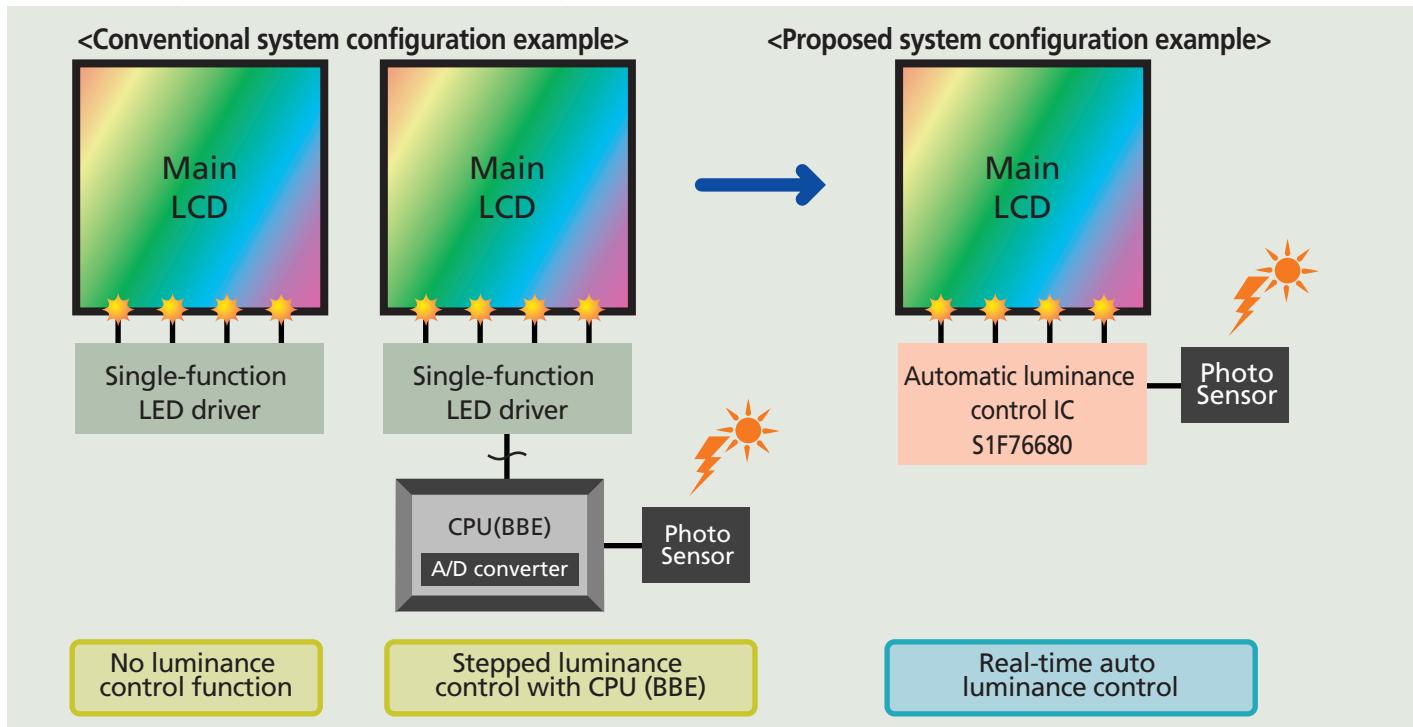

\*1: Simulated current consumption if 4 LEDs are used.

# Proposal for real-time auto luminance control ICs (1) S1F76680

Power  
Management  
IC

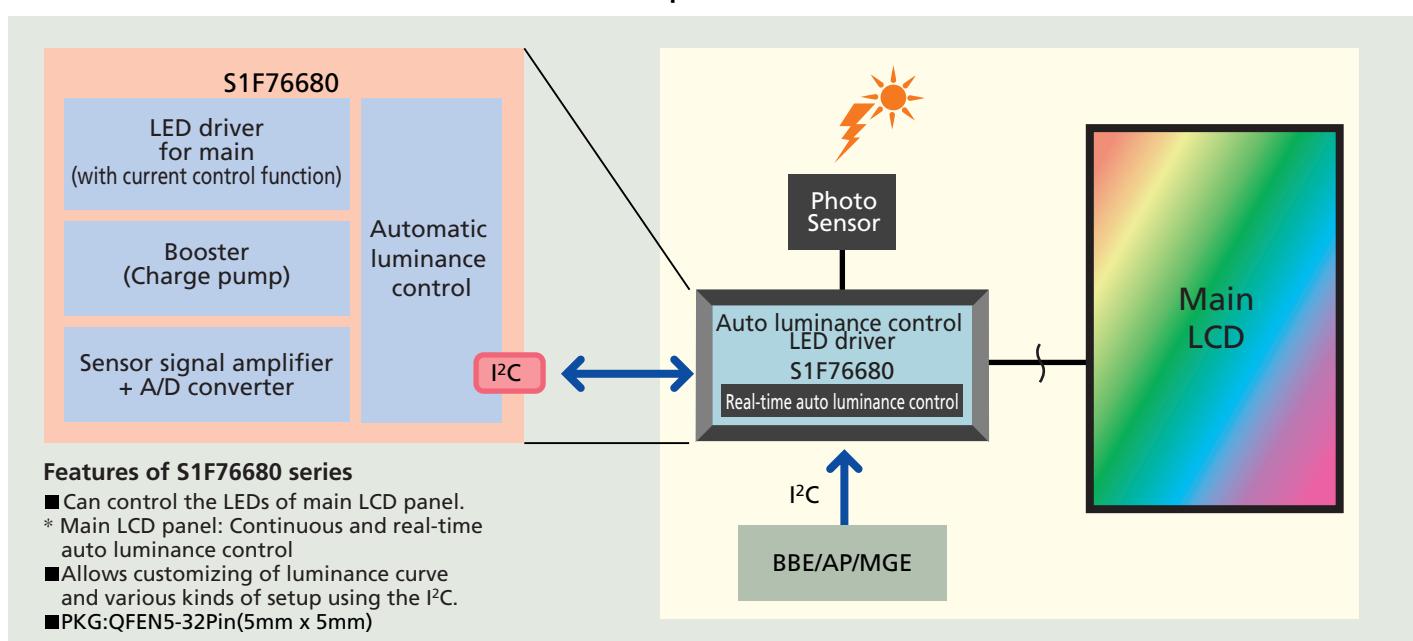

## ■ Configuration of backlight LED drivers (1)

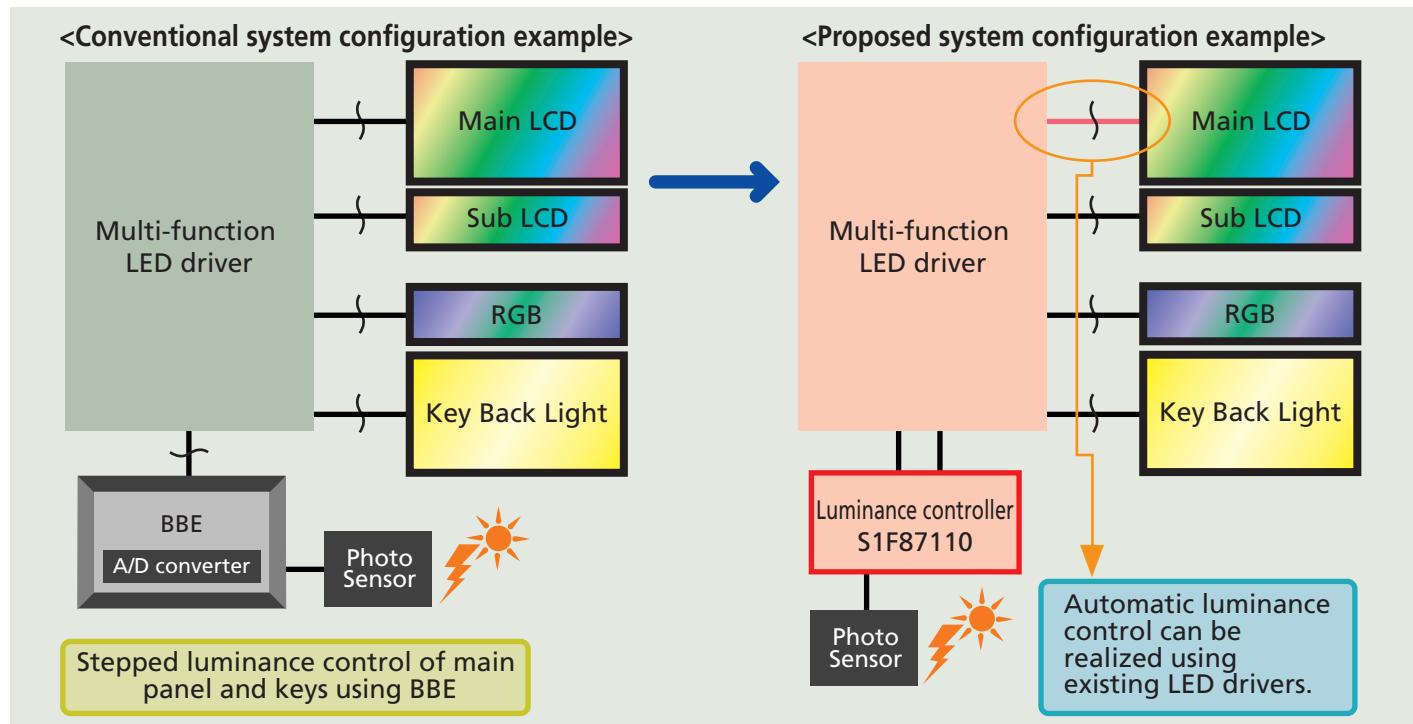

Back Light LED DRIVER

## ■ S1F76680 Auto Luminance Control LED Driver

- Can automatically control the backlight luminance of handset LCD and keys in real time mode!
- A combination of the S1F76680 and photosensors can readily realize real-time and automatic luminance control of LCD panels!

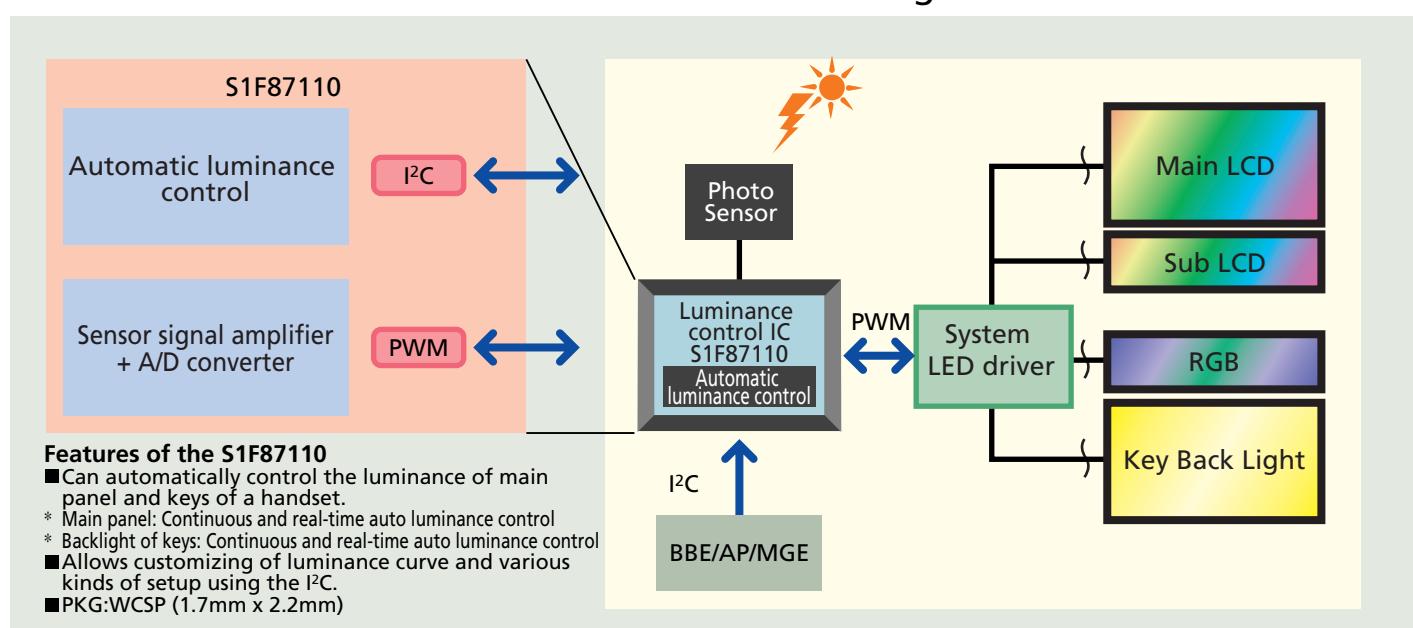

## ■ Configuration of backlight LED drivers

## ■ S1F87100 Automatic Luminance Controller ICs

- Real-time auto luminance control functionality can be realized by simply adding the S1F87100 and a photosensor to the LED driver currently being used!
- Luminance control information can be entered in the system LED driver using the PMW. The luminance curve can be customized using the I<sup>2</sup>C.

# Ultra Low current Consumption

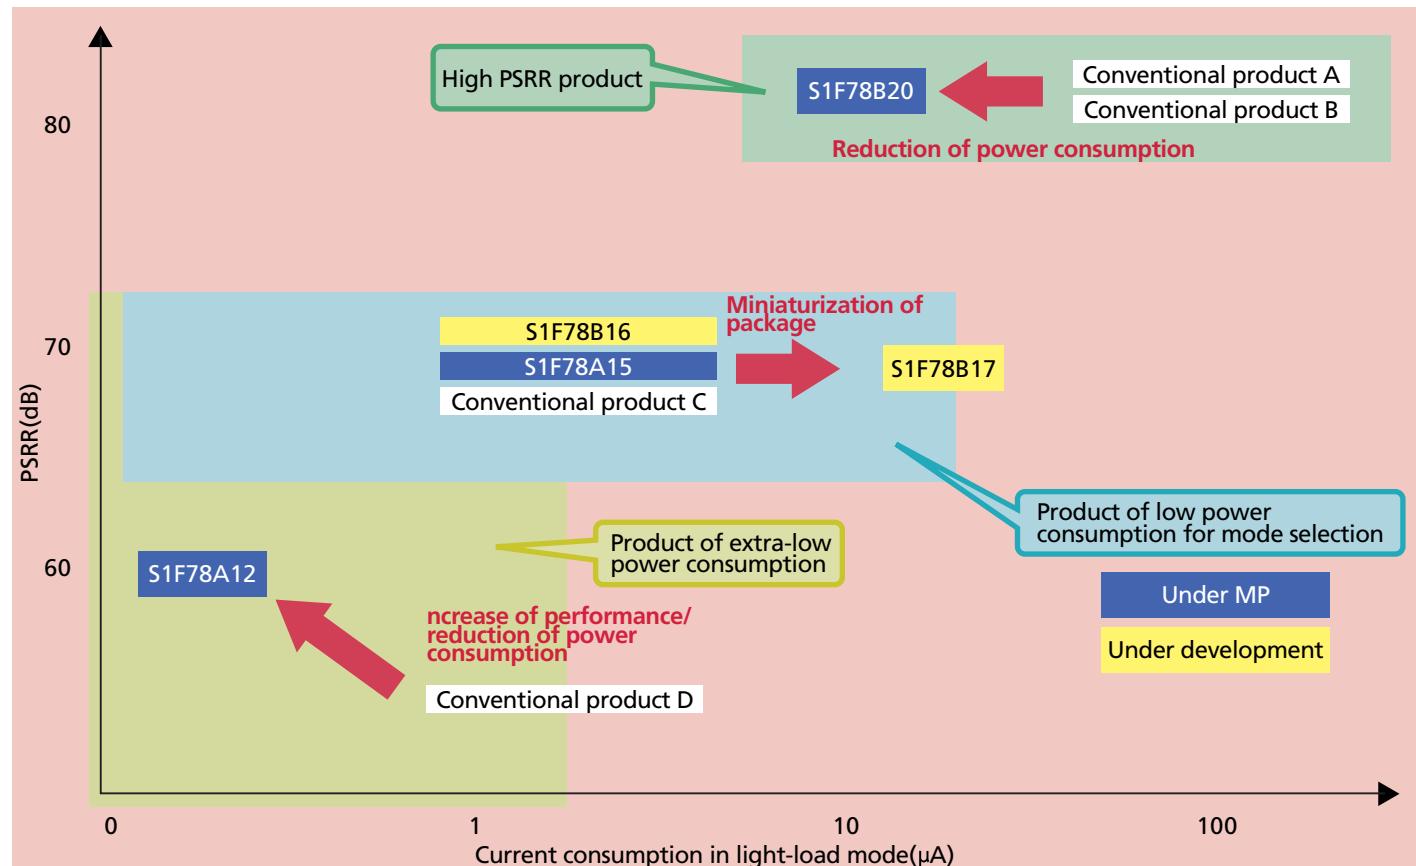

A regulator reducing power consumption by automatically switching between high-speed response and low power consumption modes has appeared on the market.

## New Product

### Regulator of extra-low current consumption S1F78A12/15 S1F78B20/17

This is a LDO which has achieved a **high ripple removal rate, high load response, and high precision** while substantially reducing current consumption using EPSON's unique circuit technique. It is provided with a built-in **automatic mode selector function**, which makes self-determination of output current and automatically switches to low current consumption mode when no load is applied. Therefore, external mode switching is not required and low current consumption is achieved. It adopts the ultra-compact package of VSON-6Pin (1.6mm x 1.6mm) to contribute to space savings. In addition to "S1F78A12" of the min. self-current consumption and "S1F78A15" providing low power consumption and high-speed response, we will provide a lineup of products such as "S1F78B20" of a high ripple removal rate, "S1F78B17" in which packages should be applied to WCSP (Wafer level CSP) and "S1F78B16: VOUT 0.9V or less" which supports the low voltage.

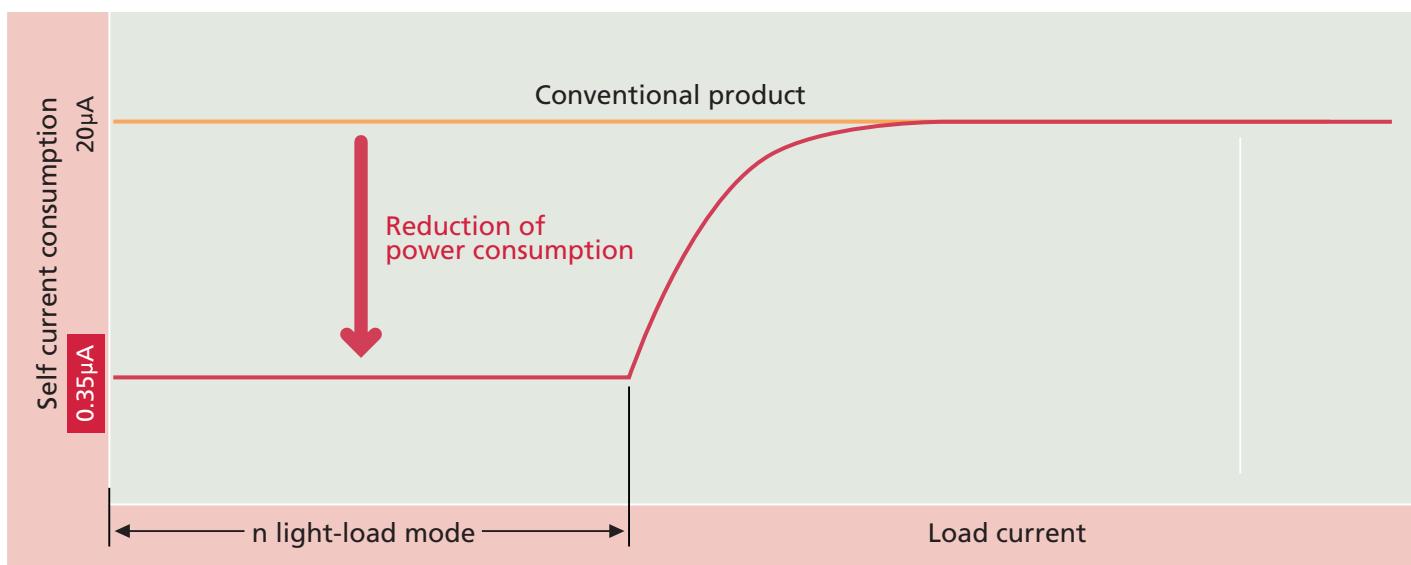

#### ■ A lineup of regulators of extra-low current consumption

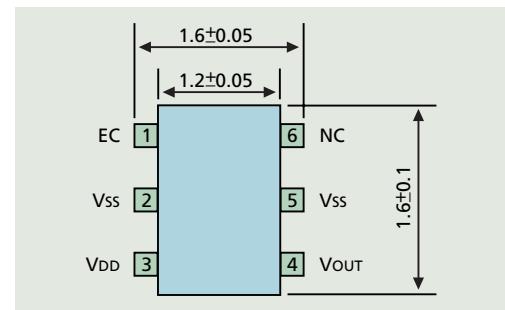

Industry leading extra-low power consumption  
Automatic switching regulator  
(Control pin is not required)

Control pin not required

■ Self current consumption of **0.35 $\mu$ A** achieved in light-load mode by automatic load detection/mode selector function

- Compact PKG-based high density package VSON-6Pin (1.6mm x 1.6mm)
- Built-in discharge function  
Discharges the capacitor connected to VOUT by CE pin setting.
- Stable built-in overcurrent protection circuit

■ General specification

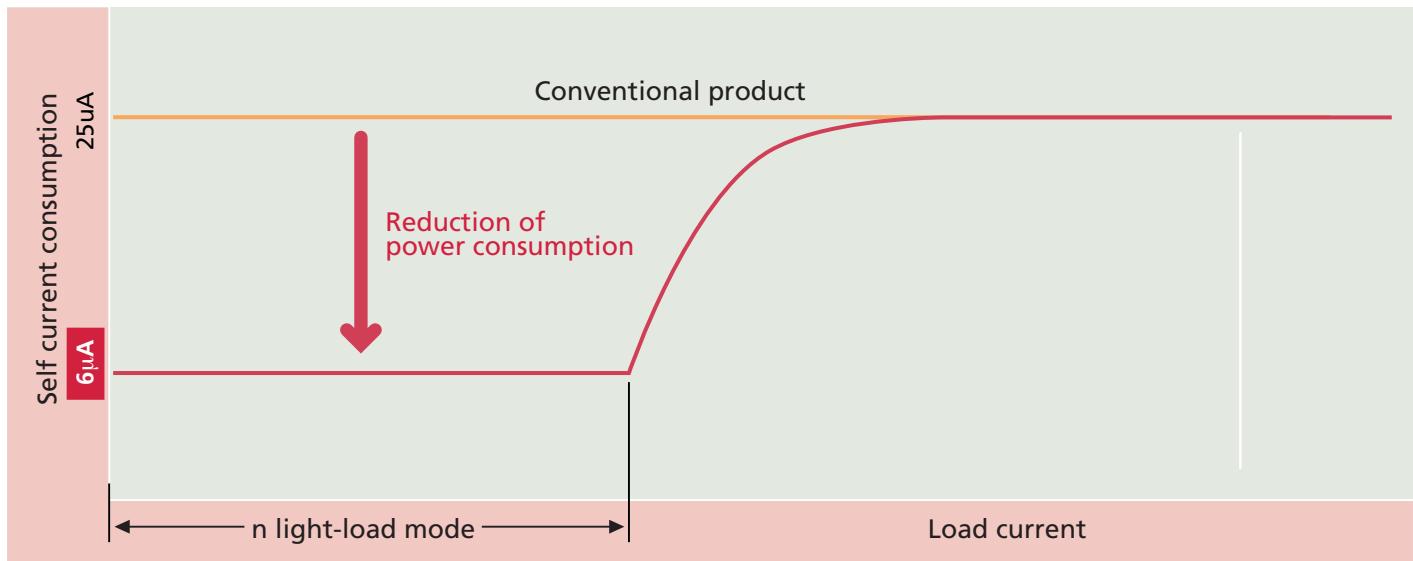

Input voltage range (V)	Operating temperature range (°C)	Output voltage (V)	Output current (mA)	Current consumption ( $\mu$ A)		Ripple removal rate (dB)	PKG
				In light-load mode	In standby mode		
(Max.) 5.5	-40 to 85	1.5 to 4.0 (In 0.1V interval)	75	0.35	(Max.) 0.05	55	VSON-6pin SOT23-5

# S1F78A15 Series

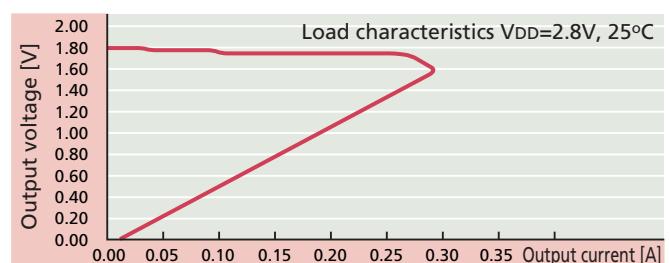

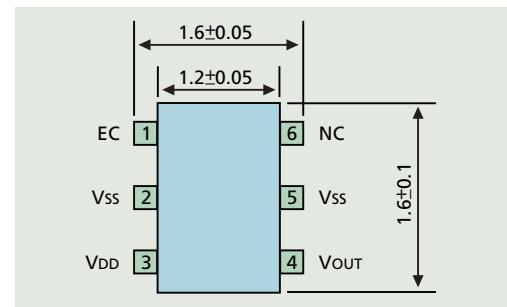

## Automatic low power consumption/ high-speed response switching regulator (Control pin is not required)

- Self current consumption of **6 $\mu$ A** achieved in light-load mode by automatic high-speed response/ low power consumption mode selector function

Control pin not required

- Ripple removal rate (PSRR) of **70dB** achieved with low power consumption
- Compact PKG-based high density package VSON-6Pin (1.6mm x 1.6mm)
- Built-in discharge function Discharges the capacitor connected to VOUT by CE pin setting.
- Stable built-in overcurrent protection circuit

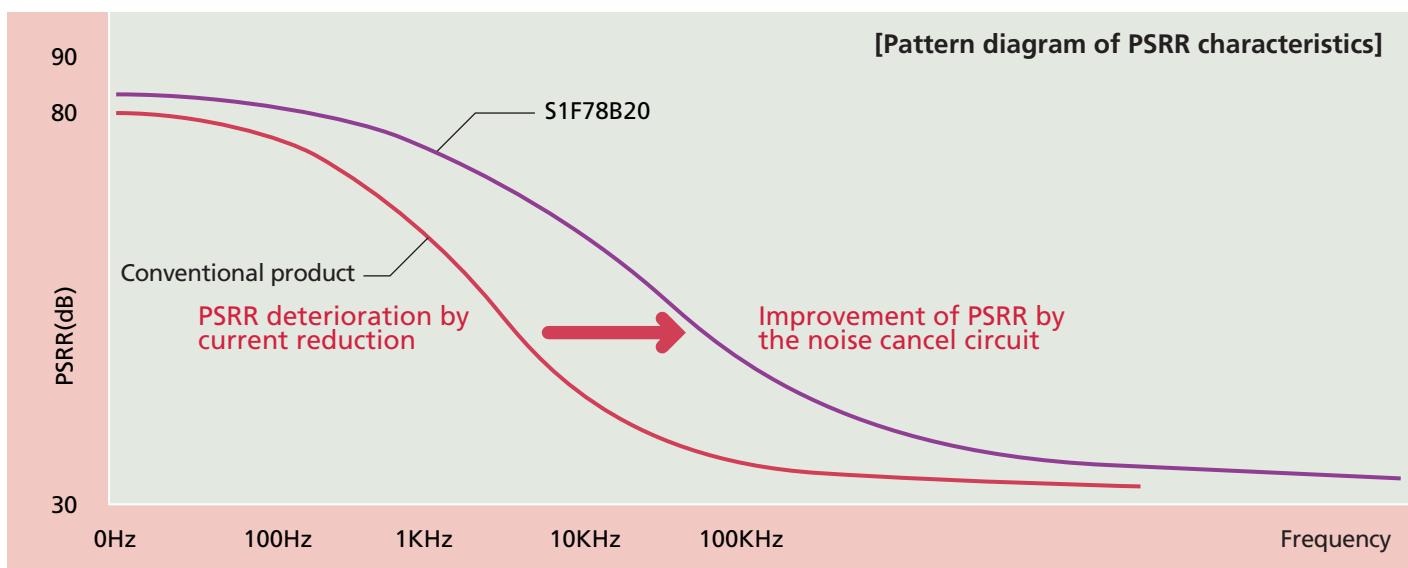

### General specification

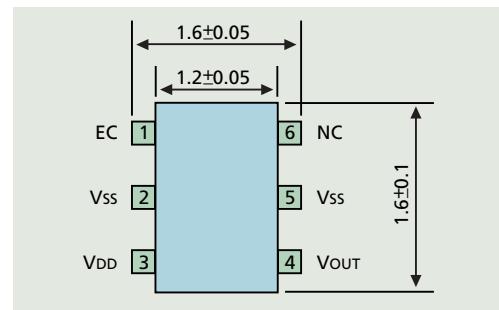

Input voltage range (V)	Operating temperature range (°C)	Output voltage (V)	Output current (mA)	Current consumption ( $\mu$ A)		Ripple removal rate (dB)	PKG
				In light-load mode	In standby mode		
(Max.) 5.5	-40 to 85	1.5 to 4.0 (In 0.1V interval)	200	6	(Max.) 0.05	70	VSON-6pin SOT23-5

A regulator of low power consumption,  
low output noise, and high PSRR

- Ripple removal rate (PSRR) of 80dB and low output noise voltage of  $30\mu\text{V}/\text{rms}$  achieved with low power consumption based on the noise cancel circuit technique

- Self current consumption:  $50\mu\text{A}$  (During operation)
- Compact PKG-based high density package VSON-6Pin (1.6mm x 1.6mm)
- Built-in discharge function Discharges the capacitor connected to VOUT by CE pin setting.
- Stable built-in overcurrent protection circuit

■ General specification

Input voltage range (V)	Operating temperature range (°C)	Output voltage (V)	Output current (mA)	Current consumption ( $\mu\text{A}$ )		Low output noise voltage ( $\mu\text{Vrms}$ )	Ripple removal rate (dB)	PKG
				In light-load mode	In standby mode			
(Max.) 5.5	-40 to 85	1.8 to 4.0 (In 0.1V interval)	150	0.35	(Max.) 0.1	30	80	VSON-6pin SOT23-5

# Product lineup

## ■ Power supply ICs for logic

Products	Supply voltage(V)	Output voltage(V)	Output current(mA)	Power-off current(mA)	Package
S1F78520M0A0	2.8 to 5.5	3.3 or 2.9 or 2.5/2.5 or 2.0 or 1.8	100/80	2 power outputs(Charge pump and LOD)	SSOP3-24pin
Products	Supply voltage(V)	Output voltage(V)	Output current(mA)	Features	Package
S1F81100F0E1	3.3 to 5.5	Ch-1: 0.8 to 1.5(Selectable by I <sup>2</sup> C) Ch-2: 3.3 Ch-3: 3.3 Ch-4: same voltage as Ch-1.	Ch-1: 500mA Ch-2: 1A Ch-3: 1A Ch-4: 20mA	• Most suitable for Intel® PXA255/210 application processors based on Intel® XScale™ micro-architecture.	QFP12-48pin
S1F81100F0R2	3.3 to 5.5	Ch-1: 0.9 to 1.5(Selectable by GPIO) Ch-2: 3.3 Ch-3: 2.5 Ch-4: same voltage as Ch-1.	Ch-1: 500mA Ch-2: 1A Ch-3: 1A Ch-4: 5mA		QFP12-48pin

## ■ Power supply ICs for liquid crystal

Products	Supply voltage(V)	Output voltage(V)	Consumption current(mA)	Features	Package
S1F75510M0A0	2.7 to 3.6	Double/triple in the positive direction	200mA	Conversion efficiency 95% Built-in Blank mode	SSOP3-24pin
S1F75540F5B0	2.4 to 3.6	Triple in the negative direction Vsce-Vss: +3.0 to +6.0 VGON-Vss: +3.0 to +16.5 VGOFFL-Vss: -1.0 to -16.5 VCOM amplitude: +3.0 to +5.5 VCOM center: +1.0 to +3.6 Vout2-Vss: +3.0 to +6.0 VLG-Vss: +1.8 VH-Vss: +2.0 to VGON VL-Vss: VN+1.0 to -1.0	2.4mA	Supports VCOM and VGOFF. Allows the setting of the pressurizing scale factor appropriate for output voltage.	QFN9-64pin

## ■ White LED driver ICs

Products	Supply voltage(V)	Application	Features	Package
S1F76680F5A1	3.0 to 4.6	LED driver for LED backlight of cell phones	• Real-time auto luminance control • The luminance control curve can be customized. • Parallel 4 LED drive • Luminance sensor amplification and brightness evaluation • 7bit automatic tone light control • Automatic variable pressurize output by magnification	QFN5-32
S1F87110B0A0	2.7 to 3.6	Automatic luminance control of LED backlight	• Automatic luminance control of LED driver in real-time mode • The luminance control curve can be customized.	WCSP

— : Under development

## ■ Battery management IC (with lithium cell recharging control)

Products	Supply voltage(V)	Application	Features	Package
S1F77500M0A0	4.3 to 6.3	Changer controller for 1 cell lithium ion battery	• Constant voltage and constant current charging • Timer function • Temperature detection • Constant voltage circuit (4.2V) • Charging and discharging current detection (Option)	SSOP3-24pin

## Product lineup

### Battery liquid leak prevention and protection circuit IC

Products	Supply voltage(V)	Application	Features	Package
S1F77600Y0A0	0.0 to 5.5	Liquid leak prevention for two batteries in series	<ul style="list-style-type: none"> <li>Low voltage operation</li> <li>High precision detection, low current consumption</li> <li>Built-in output secure circuit (forced output Hi-Z)</li> </ul>	SOT89-3pin
S1F77600M0A0				SON-6pin

### 3-Input power switching IC

Products	Supply voltage[V]	Built-in power monitoring circuit (Detection voltage)(V)			Application	Features	Package
		V <sub>CC</sub>	V <sub>BUS</sub>	V <sub>BAT</sub>			
S1F76980F0A0	0.0 to 6.5	5.0	4.0	2.8	The USB, battery, and AC adapter powers can be switched.	<ul style="list-style-type: none"> <li>Supply voltage monitoring circuit (VCC/VBUS/VBAT)</li> <li>Over-discharge protection circuit</li> <li>Power-on detect circuit, voltage limiter for overvoltage protection</li> <li>Power input control logic</li> </ul>	QFN4-24pin
S1F76980F0B0		2.3	3.8	1.6			QFN4-24pin
S1F76980F0C0		2.3	3.8	1.6			QFN4-24pin

### DC to DC converters

Products	Feature	Package
S1F76600M1E0	<ul style="list-style-type: none"> <li>Power supply voltage conversion IC</li> <li>Easy voltage conversions from input voltage to positive/negative potential (two conversion types; one-fold for reverse polarity and two-fold for the same polarity)</li> <li>Power conversion efficiency: 95% typical</li> </ul>	SOP3A-8pin
S1F76620M0C0	<ul style="list-style-type: none"> <li>Possible to double pressure rise to positive potential</li> <li>Power conversion efficiency: 95% typical</li> </ul>	SOP3B-8pin

### DC to DC converters and voltage regulators

Products	Feature	Package
S1F76610M2E0	<ul style="list-style-type: none"> <li>Power supply voltage conversion IC</li> <li>Easy voltage conversions from input voltage to positive/negative potential (two conversion types; one- and two-fold for reverse polarity and two- and three-fold for the same polarity)</li> <li>Power conversion efficiency: 95% typical</li> <li>Built-in circuit for voltage stabilization</li> <li>Four temperature coefficients suitable for LCD power supplies</li> </ul>	SSOP2-16pin
S1F76540M0C0	<ul style="list-style-type: none"> <li>Power supply voltage conversion IC</li> <li>Generation of 4/3/2 times output voltage in the negative direction</li> <li>Power conversion efficiency: 95% (Typ.)</li> <li>Built-in voltage stabilization circuit</li> <li>Possible to select temperature gradient for LCD power supply</li> </ul>	SSOP2-16pin
S1F76640M0C0	<ul style="list-style-type: none"> <li>Power supply voltage conversion IC</li> <li>Possible to 2/3/4 times pressure rise output to the positive potential</li> <li>Built-in voltage stabilization circuit</li> <li>Possible to select temperature gradient for LCD power supply</li> </ul>	SSOP2-16pin

\_\_\_\_\_ : Under development

### Step-down DC/DC converter (PWM switching regulator)

Products	Supply voltage(V)	Output voltage(V)	Output current(mA)	Features	Package
S1F72B01	2.5 to 5.5	0.9 to 3.3 (Voltage can be set by 0.1V)	600mA	<ul style="list-style-type: none"> <li>Buck type Synchronous Rectifier Switching Regulator</li> <li>Built-in PFM/PWM Automatic function</li> <li>LDO mode selection during limited load (by pin switching)</li> <li>Low power consumption: (during standby) 500nA</li> <li>Switching frequency: 2.2MHz</li> <li>High efficiency: 95%</li> </ul>	PLP-8pin

## ■ High precision voltage regulators

Products	Input voltage (V-max.)	Output voltage (V)	Output current ( $\mu$ A-Typ.)	Current consumption(mA-Typ.)	Package
S1F78101Y3C0	15	3.2	10(V <sub>I</sub> =5V)	3.0	SOT89-3pin
S1F78101Y3T0		3.3	10(V <sub>I</sub> =5V)		
S1F78101Y3K0		3.9	10(V <sub>I</sub> =6V)		
S1F78101Y3B0		5.0	10(V <sub>I</sub> =7V)		
S1F78A12M	5.5	1.5 to 4.0 (Voltage can be set by 0.1V)	75(V <sub>DD</sub> =V <sub>OUT</sub> +1.0V)	0.35 (Unloaded) (During standby: 50nA Max.)	VSON-6pin
S1F78A12Y					SOT23-5
S1F78A15M	5.5	1.5 to 4.0 (Voltage can be set by 0.1V)	200(V <sub>DD</sub> =V <sub>OUT</sub> +1.0V)	6.0 (Unloaded) (During standby: 50nA Max.)	VSON-6pin
S1F78A15Y					SOT23-5
S1F78B20M	5.5	1.8 to 4.0 (Voltage can be set by 0.1V)	150(V <sub>DD</sub> =V <sub>OUT</sub> +1.0V)	50 (Unloaded) (During standby: 100nA Max.)	VSON-6pin
S1F78B20Y					SOT23-5
S1F78B17B	5.5	1.8 to 4.0 (Voltage can be set by 0.1V)	150(V <sub>DD</sub> =V <sub>OUT</sub> +1.0V)	35 (Unloaded) (During standby: 100nA Max.)	WCSP-4pin
S1F78B17Y					SOT23-5

Note) Temperatures during reflow soldering must remain within the limits set out under LSI Device Precautions in this catalog. Do not immerse QFP and SOT89 packages during soldering, as the rapid temperature gradient during dipping can cause damage.

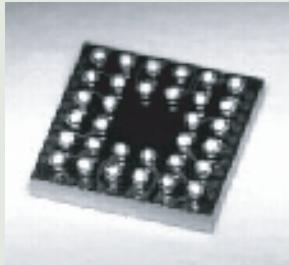

## ■ High precision voltage detectors

Products	Output level (V)	Detection voltage level (V)			Operating voltage range (V)	Operating current( $\mu$ A-Typ.)	Package
		Min.	Typ.	Max.			
S1F77201Y1C0	N-channel open drain	2.1	2.15	2.2	1.5 to 12.0	4.0 (V <sub>DD</sub> =3.0V)	SOT89-3pin
S1F77201Y1F0		2.6	2.65	2.7		4.0 (V <sub>DD</sub> =5.0V)	
S1F77201Y1T0		3.9	4	4.1		4.0 (V <sub>DD</sub> =3.0V)	
S1F77211Y1R0		2.73	2.8	2.87		4.0 (V <sub>DD</sub> =4.0V)	
S1F77211Y1G0	CMOS	2.93	3	3.07	0.7 to 6.0	4.0 (V <sub>DD</sub> =5.0V)	WCSP-4pin
S1F77211Y1T0		3.9	4	4.1		0.35 (V <sub>DD</sub> =3.0V)	
S1F77B01B	N-channel open drain/CMOS	1.5 to 4.6 (Voltage can be set by 0.1V)			0.7 to 6.0	SOT23-5pin	
S1F77B01Y							

Note) Temperatures during reflow soldering must remain within the limits set out under LSI Device Precautions in this catalog. Do not immerse QFP and SOT89 packages during soldering, as the rapid temperature gradient during dipping can cause damage.

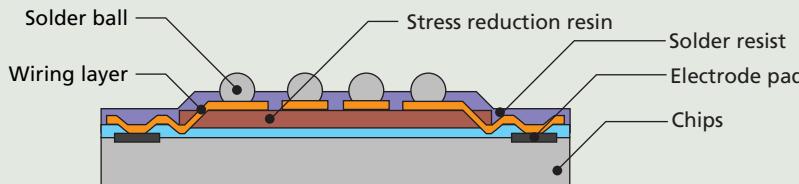

Product lineup

## ■ WCSP

WCSP (Wafer Level Chip Size Package) is a package that satisfies lightweight, compact, and thin conditions required for high-density assembly such as a small-sized portable device. Small-to-medium-sized pin devices such as EEPROM, RTC, PLL, and power supply are targeted for applications.

- Space saving package with full real chip size
- Ball pitch: 0.65/0.5/0.4mm pitch
- Under-filling is not required because this package provides a stress reduction structure at secondary mounting.
- This package facilitates changing from a conventional interposer-type package; so, it enables you to replace bare-chip mounting (wire bonding or face-down bonding) with SMT mounting.

## ■ Quad Flat Non-leaded Package

Unit: mm

Number of pins	PKG code	Body size Nom.	Height Max.	Lead pitch	Lead shape
24	QFN 4	4 x 4	1.0	0.5	STD
32	QFN 5	5 x 5	1.0	0.5	STD
48	QFN 7	7 x 7	1.0	0.5	STD
52	QFN 8	8 x 8	1.0	0.5	STD
64	QFN 9	9 x 9	1.0	0.5	STD

## ■ Small Outline Non-leaded Package

Unit: mm

Number of pins	PKG code	Body size Nom.	Height Max.	Lead pitch	Lead shape
8	SON 1	3 x 3.8	1.0	0.65	STD
6	SON	1.6 x 2.6	0.8	0.5	STD
16	SON 2	5.3 x 4.4	1.0	0.65	STD

## ■ Small Outline Package

Unit: mm

Number of pins	PKG code	Body size Nom.	Height Max.	Lead pitch	Lead shape
8	SOP 3B	4.9 x 3.9	1.75	1.27	STD
8	SOP 3A	5 x 4.4	1.7	1.27	STD
16	SOP 3A	10 x 4.4	1.7	1.27	STD

## ■ Shrink Small Outline Package

Unit: mm

Number of pins	PKG code	Body size Nom.	Height Max.	Lead pitch	Lead shape
16	SSOP 2	6.6 x 4.4	1.7	0.8	STD
24	SSOP 3	7.8 x 5.6	1.45	0.65	STD

## ■ Small Outline Transistor Package

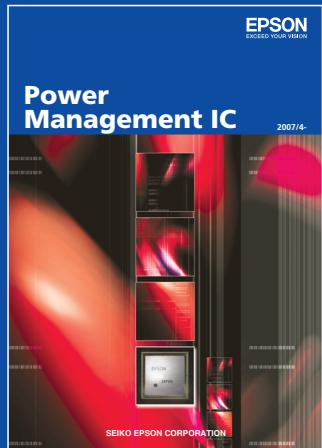

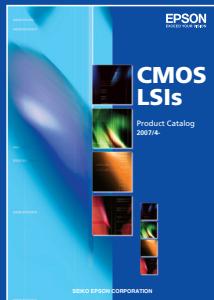

Unit: mm

Number of pins	PKG code	Body size Nom.	Height Max.	Lead pitch	Lead shape
3	SOT 89	4.5 x 2.5	1.6	1.5	STD
