

bin boxes & reel storage system

Corstat® Protection	Manufactured from Corstat® conductive fibreboard, giving static shielding and physical protection
Fully Open	Provide in plant ESD protection for 13" & 7" reels, plus a wide range of associated components
Modular	Can be used in numerous combinations to create bespoke storage systems.
Standard Sizes	Designed to industry recognised standards for shelves, racking and storage space

Corstat material advantages

Corstat® from GWP Conductive is the ESD industry's standard for conductive corrugated board.

For many years engineers have relied on the consistency of the Corstat® conductive packaging material, as it provides a buried shielding layer and a sealed surface for a controlled anti static path to ground.

Corstat® is the cleanest, longest-lasting conductive corrugated board in the marketplace and is used extensively in both our stock conductive packaging products as well as our bespoke ESD & anti static packaging items.

innovators

- award winning designers with specialist ESD knowledge
- bespoke solutions tailored to any requirement
- fast response & innovative solutions guaranteed

in

- stock holding of ESD boxes, components and containers
- just in time delivery service available
- bespoke online ordering system for complete flexibility

protective

- ESD conductive brands and materials that you can rely on
- perfect for the protection of any sensitive electronic devices
- supplier of market leading and industry standard solutions

packaging

- range of stock items or bespoke solutions
- ability to ship most orders of stock lines within 48 hours
- conductive and dissipative foam inserts

key	part number	description	external sizes (mm) length x width x depth
1	BN6160	Small Bin Box	600 x 160 x 140
2	BN6240	Medium Bin Box	600 x 240 x 140
3	BN6320	Large Bin Box	600 x 320 x 140
4	BN6090	Reel Bin / Fitting	600 x 90 x 140

Please note: all products supplied flat / un-assembled
