

RF Discrete Transistors and Pressure Sensors

RF Discrete Transistors

RF Power MOSFETs

To 225 MHz VHF AM/FM; V_{DS} = 28 Volts, Class AB
For VHF military and commercial aircraft radio transmitters.

Mfr.'s Type	P _{out} Output Power Watts	P _{in} Input Power Watts	G _{re} (Typ.)/Freq. dB/MHz	η Eff. % Typ.	θJC °C/W	Package/Style
MRF136	15	0.38	16.0/150	60	3.20	211-07/2
MRF173	80	4.00	13.0/150	65	0.80	211-07/2
MRF141G	300	30.00	10.0/175	55	0.35	375/2

To 500 MHz VHF/UHF AM/FM; V_{DS} = 28 Volts, Class AB
For VHF/UHF military and commercial aircraft radio transmitters.

MRF166C	20	0.40	17.0/400	55	2.50	319/1
---------	----	------	----------	----	------	-------

RF Power Bipolar Transistors — HF

14-30 MHz, CB Amateur Band; V_{CC} = 12.5 or 13.6 Volts, Class AB
For economical, high-volume use in CW, AM and SSB applications.

Mfr.'s Type	P _{out} Output Power Watts	P _{in} (Max.) Input Power Watts	G _{re} (Min.) Gain @ 30 MHz dB	θJC °C/W	Package/Style
MRF455	60	3.00	13	1.0	211-07/1
MRF454	80	5.00	12	0.7	211-11/1

RF Power Bipolar Transistors — VHF

136-174 MHz High Band; V_{CC} = 12.5 Volts, Class C
For VHF FM high-band.

Mfr.'s Type	P _{out} Output Power Watts	P _{in} (Max.) Input Power Watts	G _{re} (Min.) Gain @ 175 MHz dB	θJC °C/W	Package/Style
MRF247*	75	15.00	7	0.7	316-01/1

*Internal impedance matched.

RF Power Bipolar Transistors — 900 MHz

870-960 MHz Band; V_{CC} = 26 Volts, Si Bipolar
For 900 MHz mobile radio band. Devices are listed for mobile and base station applications.

Mfr.'s Type	P _{out} Output Power Watts	Class	P _{in} (Max.) Input Power Watts	G _{re} (Min.) / Freq. Power Gain dB/MHz	θJC °C/W	Package/Style
MRF899*	150	AB	24	8.0/900	0.8	375A/1

*Internal impedance matched.

MPX Pressure Sensors

Motorola's sensor family provides a diverse portfolio of silicon MEMS pressure sensors with features that include high reliability, uncompromising accuracy and performance consistency, excellent manufacturing repeatability and system design versatility. By combining Motorola's SENSEON® sensors with our other SPS semiconductor products, you have the advantage of creating a value-added, total system design that carries Motorola's commitment to the highest quality, reliable delivery and consistent long-term performance.

Frequently Asked Questions

- Q. What is the advantage of silicon micromachined sensors over mechanical sensing technology?
A. Combined with Motorola's advanced silicon batch processing and micromachining technology, silicon based transducers offer high repeatability, accuracy and dependability over time at a very competitive price.
Q. Are Senseon sensors compatible with various types of media such as water or oils?
A. Motorola SENSEON pressure sensors have been used in applications such as washing machine water level, automotive fuel level and manifold absolute pressure measurements. By using appropriate media isolation techniques, our pressure sensors can be made compatible with a variety of media.
