

High Power Chip Resistors

SC3 Series

- 3 watts in a 1 watt size package
- Resistance range from 1R0 to 10K
- Tolerances to $\pm 1\%$
- AEC-Q200 Qualified

 All Pb-free parts comply with EU Directive 2011/65/EU (RoHS2)

Electrical Data

Characteristic	Value
Power dissipation @70°C	3 watts
Resistance Range	1R0 to 10K
LEV	100V
Ambient temp range	-55 to +150°C
Resistance tolerance	1, 2, 5%
TCR	$\pm 100 \text{ ppm}/^\circ\text{C}$
Termination	Leach-resistant solder-plated copper wrap-around
Pad & trace area for maximum power rating	300mm ²

Construction

Resistive thick film material, overglaze and organic protection are screen printed on a 96% alumina substrate. The components are laser trimmed to achieve the required resistance tolerance.

Terminations

The wrap-around terminations have an electroplated nickel barrier and matte tin finish. This ensures excellent 'leach' resistance properties and solderability.

Chips can withstand immersion in solder at 250°C for 90 seconds and are suitable for reflow or wave soldering mounting applications.

Marking

The body protection and marking are resistant to all normal industrial cleaning solvents suitable for printed circuits. Chips are packed and mounted with marking side up. The SC3 Chips are mounted with the actual resistor element mounted face down on its termination pads.

Packaging

SC3 Resistors are supplied taped and reeled as per IEC 286-3. The standard quantity per reel is 1800 parts.
