

The PM1122R is a remote control panel for the PM1122, APart's multifunctional pre-amplifier. Mounting screws are included.

The control panel offers music level control, line source selection and microphone mix level control.

The remote panels are connected to the PM1122 by a standard CAT-5 cable wired according to the T-568B protocol. The maximum wire length is up to 300m, according to circumstances. You can use one PM1122RL per zone.
