

# Model CB3 & CB3LV

## HCMOS/TTL Clock Oscillator

Part Dimensions:  
7.0 × 5.0 × 1.8mm • 171.497mg

### Features

- Ceramic Surface Mount Package
- Fundamental and 3<sup>rd</sup> Overtone Crystal Designs
- Frequency Range 1.0 – 200MHz \*
- +3.3V and +5.0V Operation
- Operating Temperature Range to -40°C to +85°C
- Output Enable Standard
- Tape and Reel Packaging, EIA-418

#### Standard Frequencies

\* See Page 6 for common frequencies.  
Check with factory for availability of frequencies not listed.

### Applications

- Internet of Things [IoT, IIoT]
- Microcontrollers and FPGAs
- Wireless Communication
- Networking Equipment
- Data Communications
- Computers and Peripherals
- Ethernet/GbE/SyncE
- Portable Devices
- Test and Measurement

### Description

CTS Model CB3 and CB3LV are low cost, low voltage clock oscillators supporting HCMOS output. Employing the latest IC technology, CB3/CB3LV have excellent stability and low phase jitter performance.

### Ordering Information

| Model | Supply Voltage |         | Frequency Stability |  | Temperature Range |                | Frequency Code [MHz] |
|-------|----------------|---------|---------------------|--|-------------------|----------------|----------------------|
| CB3   | LV             | -       | 3                   |  | C                 | -              | XXXMXXXXXX           |
|       |                |         |                     |  |                   |                |                      |
|       | Code           | Voltage |                     |  | Code              | Temp. Range    |                      |
|       | LV             | +3.3Vdc |                     |  | C                 | -20°C to +70°C |                      |
|       | Blank          | +5.0Vdc |                     |  | I                 | -40°C to +85°C |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |
|       |                |         |                     |  |                   |                |                      |

#### Notes:

- 1) Consult factory for availability of 6I Stability/Temperature combination.
- 2) These stabilities are not recommended for new designs.
- 3) Frequency is recorded with 1, 2 or 3 leading significant digits before and 6 significant digits [including zeroes] after the "M".  
[Ex. 3.579545MHz = 3M57954, 14.31818MHz = 14M318180, 25MHz = 25M000000, 125MHz = 125M000000]  
[Ex. part numbers - CB3LV-3C-25M000000, CB3-3C-14M318180]
- 4) CTS Distributors may add a -T or -1 at the end of the part number to indicate Tape and Reel packaging.

**Not all performance combinations and frequencies may be available.**  
**Contact your local CTS Representative or CTS Customer Service for availability.**

This product is specified for use only in standard commercial applications. Supplier disclaims all express and implied warranties and liability in connection with any use of this product in any non-commercial applications or in any application that may expose the product to conditions that are outside of the tolerances provided in its specification.

## Electrical Specifications

### Operating Conditions

### HCMOS

### Mechanical Specifications

Package Drawing

### Marking Information

1. \*\* – Manufacturing Site Code.  
[Note a dash may follow the site code and is acceptable.]
2. xxxMxxxxxx – Frequency is marked with 1, 2 or 3 leading significant digits before the “M” and 6 digits after the “M” [including zeroes].  
Ex. xMxxxxxx [3M579545]  
xxMxxxxxx [14M318180]  
xxMxxxxxx [25M000000]  
xxxMxxxxxx [125M000000]
3. YYWW – Date Code; YY = year, WW = week.
4. ST – Frequency Stability/Temperature Code.  
[Refer to ordering information for codes.]
5. V – Voltage Code; 3 = +3.3V, 5 = +5.0V.

### Recommended Pad Layout

### Notes

1. JEDEC termination code (e4). Barrier-plating is nickel [Ni] with gold [Au] flash plate.
2. Reflow conditions per JEDEC J-STD-020; +260°C maximum, 20 seconds.
3. MSL = 1.

### Pin Assignments

| Pin | Symbol          | Function                 |
|-----|-----------------|--------------------------|
| 1   | EOH             | Enable                   |
| 2   | GND             | Circuit & Package Ground |
| 3   | Output          | RF Output                |
| 4   | V <sub>CC</sub> | Supply Voltage           |

## Packaging - Tape and Reel

Tape Drawing

Reel Drawing

## Notes

1. Device quantity is 1k pieces maximum per 180mm reel.
2. Complete CTS part number, frequency value and date code information must appear on reel and carton labels.

## Addendum

### Common Frequencies – MHz

| FREQUENCY | FREQUENCY | FREQUENCY | FREQUENCY | FREQUENCY | FREQUENCY  |
