

Parameters	Ratings	Units
Blocking Voltage	600	V _P
Load Current	150	mA _{rms} / mA _{DC}
On-Resistance (max)	22	Ω
LED Current to Operate	5	mA

Features

- PLA192E is 100% Tested for Partial Discharge: DIN EN 60747-5-5
- 5000V_{rms} Input/Output Isolation
- Low Drive Power Requirements (TTL/CMOS Compatible)
- No Moving Parts
- High Reliability
- Arc-Free With No Snubbing Circuits
- No EMI/RFI Generation
- Small 6-Pin Package
- Machine Insertable, Wave Solderable

Applications

- Instrumentation
 - Multiplexers
 - Data Acquisition
 - Electronic Switching
 - I/O Subsystems
- Meters (Watt-Hour, Water, Gas)
- Medical Equipment: Patient/Equipment Isolation
- Aerospace
- Industrial Controls

Pin Configuration

Description

IXYS Integrated Circuits Division's PLA192 is a single-pole, normally open (1-Form-A) solid state relay that provides 5000V_{rms} of input to output isolation.

In addition to all the features and benefits of the PLA192, the PLA192E meets the partial discharge demands of DIN EN 60747-5-5 (previously VDE 0884).

All versions of the PLA192 can be used to replace mechanical relays, while offering the superior reliability associated with semiconductor devices. Optically coupled outputs that use the patented OptoMOS architecture are controlled by a highly efficient GaAlAs infrared LED. Because they have no moving parts, they offer bounce-free switching in more compact surface mount or thru-hole packages.

Approvals

- UL Recognized Component: File E76270
- CSA Certified Component: Certificate 1175739
- EN/IEC 60950-1 Certified Component: TUV Certificate B 12 11 82667 002
- DIN EN 60747-5-5 Certified ("E" Suffix Only) VDE Certificate 40036603

Ordering Information

Part #	Description
PLA192E	6-Pin DIP (50/Tube)
PLA192ES	6-Pin Surface Mount (50/Tube)
PLA192ESTR	6-Pin Surface Mount (1000/Reel)
PLA192	6-Pin DIP (50/Tube)
PLA192S	6-Pin Surface Mount (50/Tube)
PLA192STR	6-Pin Surface Mount (1000/Reel)

Switching Characteristics of Normally Open Devices

Absolute Maximum Ratings @ 25°C (Unless Otherwise Noted)

Parameter	Rating	Units
Blocking Voltage	600	V _P
Reverse Input Voltage	5	V
Input Control Current	50	mA
Peak (10ms)	1	A
Input Power Dissipation ¹	150	mW
Total Package Dissipation ²	800	mW
Isolation Voltage, Input to Output (60 Seconds)	5000	V _{rms}
ESD Rating, Human Body Model	4	kV
Operational Temperature	-40 to +85	°C
Storage Temperature	-40 to +125	°C

¹ Derate linearly 1.33 mW / °C

² Derate linearly 6.67 mW / °C

Absolute Maximum Ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.

Electrical Characteristics @ 25°C (Unless Otherwise Noted)

Parameters	Conditions	Symbol	Min	Typ	Max	Units

Manufacturing Information

Moisture Sensitivity

 All plastic encapsulated semiconductor packages are susceptible to moisture ingress. IXYS Integrated Circuits Division classified all of its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, **IPC/JEDEC J-STD-020**, in force at the time of product evaluation. We test all of our products to the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a **Moisture Sensitivity Level (MSL) rating** as shown below, and should be handled according to the requirements of the latest version of the joint industry standard **IPC/JEDEC J-STD-033**.

Device	Moisture Sensitivity Level (MSL) Rating
All Versions	MSL 1

ESD Sensitivity

This product is **ESD Sensitive**, and should be handled according to the industry standard **JESD-625**.

Reflow Profile

This product has a maximum body temperature and time rating as shown below. All other guidelines of **J-STD-020** must be observed.

Device	Maximum Temperature x Time
All Versions	250°C for 30 seconds

Board Wash

IXYS Integrated Circuits Division recommends the use of no-clean flux formulations. However, board washing to remove flux residue is acceptable. IXYS Integrated Circuits Division employs the use of silicone coating as an optical waveguide in the standard PLA192 (without the "E" suffix); the use of a short drying bake could be necessary if a wash is used after solder reflow processes. The E-suffix product, being of double-molded construction, does not have the same necessity for a drying bake. Chlorine- or Fluorine-based solvents or fluxes should not be used. Cleaning methods that employ ultrasonic energy should not be used.
