## BESTELLBEISPIELE | PART NUMBER EXAMPLES

### Straight plug

FFA.1Y.405.CLAC32 = straight plug with cable collet, 1Y series, high voltage 5kV, outer shell in chrome plated brass, PEEK insulator, 1 male solder contact, C type collet for a 3,2 mm diameter cable.

### Fixed socket

ERA.1Y.405.CTL = fixed socket, nut fixing, 1Y series, high voltage 5kV, outer shell in chrome plated brass, PTFE insulator, 1 female solder contact.

### Fixed coupler

SWH.1S.405 = straight coupler, nut fixing, 1S series, high voltage firm, outer shell in chrome plated brass, PEEK insulator, 1 female contacts each end.

**Note:**  
<sup>1)</sup> the „Variant“ position in the reference is used to specify either the presence of a collet nut for fitting the bend relief or the anodized colour of the housing in aluminium alloy.  
 For models with collet nut for fitting the bend relief, a „Z“ should be indicated and a bend relief can be ordered separately as indicated in the „Accessories“ section. An order for a connector with bend relief should thus include two part numbers.  
 For the various housings available in colours, the corresponding letter in the part number for the colour see Unipole/Multipole catalogue.  
 For the watertight models of socket, the letter „P“ is used; for the vacuumtight models of socket the letters „PV“ shall be indicated.  
 For the plug and socket that should be fitted with an FPM O-ring the letter „H“ shall be indicated.  
<sup>2)</sup> Variants see Unipole/Multipole catalogue.

The background of the entire page is a solid blue color. At the top, there is a white technical line drawing of a connector assembly, showing various components like pins, sockets, and a grid-like structure. A white lightning bolt graphic starts from the top right and extends downwards, passing through the center of the page. In the middle of the page, there is a white-bordered rectangle containing a semi-circular graphic with a lightning bolt and an arrow pointing towards it, and a large white letter 'A' below it.

Multipole connectors are fitted with hermaphroditic inserts including male and female contacts. However, by convention, the letter indicating the contact type in the part number composition will be the male contact (reference A) for plugs and female contact (reference A) for sockets. In case of an odd number of contacts, the letter of reference corresponds to the one with the large number of contacts. For example, a 309 type connector with contact (reference A) will include 5 male and 4 female contacts.

**For RAD and SWH fixed couplers, the first contact type mentioned is always the one at the flange end.**

Connectors can be configured „inverted“ i.e. plugs equipped with female contacts (reference L), sockets with male contacts (reference A). This solution is particularly useful when plugs are mated to a coupler and it is essential to respect contact alignment.

### Note:

- <sup>1)</sup> for ordering collets separately.
- <sup>2)</sup> for ordering an M type collet, a reducer and its reducing cone should also be ordered.
- <sup>3)</sup> these collets cannot be used for connector models with nut for fitting a bend relief.

All dimensions are in millimetres.

#### Note:

- <sup>1)</sup> for ordering collet separately.
- <sup>2)</sup> for ordering an M type collet, a reducer and its reducing cone should also be ordered.
- <sup>3)</sup> these collets cannot be used for connector models with collet nut for fitting a bend relief.

#### Note:

- <sup>1)</sup> the bend relief is to be ordered separately (see page 80). All dimensions are in millimetres.

Part number example see page 3

### Note:

<sup>1)</sup> for ordering the collet system separately.

<sup>2)</sup> for ordering the K type collet, the oversize collet and the split centre-pieces, as well as the corresponding collet nut should also be ordered.  
All dimensions are in millimetres.

**Note:** <sup>1)</sup> for ordering the collet system separately.  
<sup>2)</sup> for ordering the K type collet, the oversize collet and the split centre-pieces, as well as the corresponding collet nut should also be ordered.

<sup>3)</sup> in 4K series, the centre-piece is made of one piece.

All dimensions are in millimetres.

### Note:

- <sup>1)</sup> for ordering collets separately.
  - <sup>2)</sup> these collets can only be used with the FLA model.
  - <sup>3)</sup> for ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered.
  - <sup>4)</sup> these collets should be used with FLA, FFP and PCP models.
  - <sup>5)</sup> for models with bend relief, the FFM.●●.130.LC collet nut should be ordered (see page 76).
- All dimensions are in millimetres.

#### Note:

<sup>1)</sup> for ordering collets separately.

<sup>3)</sup> for ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered.

<sup>4)</sup> these collets should be used with FLA, FFP and PCP models.

<sup>5)</sup> for models with bend relief, the FFM.●●.130.LC collet nut should be ordered (see page 76).

All dimensions are in millimetres.

Part number example see page 3

### Note:

<sup>1)</sup> for ordering collets separately.

<sup>3)</sup> for ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered.

<sup>4)</sup> these collets should be used with FLA, FFP and PCP models.

<sup>5)</sup> for models with bend relief, the FFM.●●.130.LC collet nut should be ordered (see page 76).

All dimensions are in millimetres.

#### Note:

<sup>1)</sup> for ordering collets separately.

<sup>3)</sup> for ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered.

<sup>4)</sup> these collets should be used with FLA, FFP and PCP models.

<sup>5)</sup> for models with bend relief, the FFM.●●.130.LC collet nut should be ordered (see page 76).

All dimensions are in millimetres. These notes also apply to the following page.

### Note:

<sup>1)</sup> for ordering the collet system separately.

<sup>2)</sup> for ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered (see page 79).

All dimensions are in millimetres.

**Note:** <sup>1)</sup> for ordering the collet system separately.

<sup>2)</sup> for ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered (see page 79).

<sup>3)</sup> in 4E series, the centre-piece is made of one piece. All dimensions are in millimetres.

Part number example see page 3
