

The diagram shows a horizontal beam with a central hinge. A vertical support is located at a distance A from the left end. The distance from the support to the hinge is labeled B . The total length of the beam is labeled C . The beam is divided into two equal segments by the central hinge.

A simple line drawing of a roll of white tape. The roll is shown from a three-quarter perspective, with the tape unpeeling from the bottom right corner. The tape is represented by a series of concentric, slightly overlapping lines that form a spiral shape, indicating its thickness and the way it is wound. The unpeeling strip is shown as a single, flat line extending downwards and to the left.
