

Weller®

Compact Capability with Cordless Convenience.

Introducing the soldering pencil that's small in size but huge on performance.

COOPER Hand Tools

The new mid-size Weller® ML500MP Magna-Lite Butane Soldering Pencil has the power to tackle most any job

With most mid-size portable soldering irons, you're forced to choose between power and run time... but the Weller ML500MP gives you both. With a medium setting working time of approximately 30 minutes, it has the capacity to complete multiple jobs between refills, making it perfect for field service repair applications. And with continuously variable temperature adjustment - from 750°F to 900°F - it has the versatility to handle anything from basic home electrical projects to intricate tasks involving sensitive electronics. The ML500MP can also be used as a mini-torch when the soldering tip is removed, allowing it to perform jobs such as working with heat shrink tubing.

The ML500MP can also be used as a mini-torch when the soldering tip is removed.

Catalog Number	Description
