DRAM DDR3

SODIMM

RDIMM	UDIMM	SODIMM	mini DIMM
-------	-------	--------	-----------

DDR3 is the current mainstream dram technology standardized by JEDEC, bringing further improvements in power consumption and increased bandwidth over DDR2. Available in power supply voltages of 1.5V (DDR3) and 1.35V (DDR3L) and with transfer data rates from 800Mb/s to 1.6Gb/s and beyond, DDR3 has become the de facto mainstream memory technology especially for server and notebook applications in the 1H of 2010. Many other applications are available in the market today to take advantage of the superior performance features of DDR3 and DDR3L. Wintec currently offers following DDR3 and DDR3L Modules and will continue to add more solutions as DDR3/DDR3L enabled applications will proliferate.
