Enfis UNO Tile Array Amber 595nm **Technical Specification**

Electro-Optical Characteristics

Spectral Data

Proper thermal design of the end product is of paramount importance. The operational junction temperature of each LED chip should be kept below 125°C. Please contact Enfis for further support in this matter.

Handling LED Array

Contact with the encapsulant on the surface of the LED array must be avoided to prevent damage. Do not apply pressure to the encapsulant or allow it to come into contact with the sharp objects During operation the encapsulant will be hot and contact should be avoided

Care must be taken when handling, these products are sensitive to static electricity. Observe static handling precautions

Avoid touching the LED array surface To clean - BLOW surface with either dry air or nitrogen gas

Eve Safety Precautions The light output of the products may cause injuries to

human eyes in circumstances where the products are viewed directly with unshielded eyes for more than a few seconds.

Please refer to IEC 60825-1:2001 for further information

ENFIS UNO Tile Array Amber 595nm

Smart, powerful, compact, efficient, reliable light

- Intense, high-power Amber spot source
- Ultra-high power density
- Long-life and reliable, high-performance due to excellent thermal conductivity

Simple integration via connectorized PCB with mounting holes

- 780mW typical power 0.5cm² Aperture
- 1560mW/cm² power density . Input power: 18W

 - Typical thermal resistance <1°C/W

Light Engine Integration

Enfis can eliminate the time. cost and risk of integration by offering our arrays as part of a complete light engine solution

Enfis arrays are designed to provide excellent thermal conductivity and to be integrated effectively with thermal hardware to ensure optimum performance and life.

Enfis UNO arrays provide a compact spot source with Lambertian emission characteristics Enfis technical experts can advise a range of optical solutions to match your requirements.

Enfis provides a range of feature -rich

powerful drivers and power supplies for our arrays. Our applications team can provide you with a solution for your specific requirements.
