New Blue End Cap For Syringe Barrel

OK International has introduced a new end cap for syringe barrel. To keep the color consistent for both end cap and tip cap, we are changing the end cap color from red to blue. This color change will enhance the appearance of the complete syringe assembly, especially when used in conjunction with the blue piston.

Material and dimension specifications remain the same.

Below are new part numbers for the blue cap:

Part Number	Description
903-ECB	900 Series End Cap, 3cc, Blue
905-ECB	900 Series End Cap, 5cc, Blue
910-ECB	900 Series End Cap, 10cc, Blue
930-ECB	900 Series End Cap, 30cc, Blue

- The new Blue cap will be available from July 2011.
- Pricing remain the same as the red cap
- Red end caps will be discontinued as standard parts by June 30, 2011
