

MCDTS6/MCDTS2/KTSC2 Series

Tact Switches - SPNO & Caps

Features:

- Sharp click feel with a positive tactile feedback. Due to small movement distance (stroke), user experiences distinct sensation when the switch “clicks” into place.
- Ultraminiature and light weight structure suitable for high density mounting. Economic with high reliability.
- Insert moulding in the contact has a special treatment which prevents flux build-up during soldering and permits auto-dipping.
- Comprehensive range of SPNO tact switches.
- Select by overall height, body, actuator length, and operating force.
