Precision Insulation Stripper with adapted blades

PATENTED

- form-fit stripping also of difficult-to-remove insulating materials made of PTFE, silicone, Radox®, Kapton® and rubber; multi-layer too
- a second pair of blades holds the remaining insulation reliably in place
- Replaceable shaped blade adapted precisely to the respective conductor cross-section
- with length stop for constant stripping length during repetitive work
- pliers body: steel
- blade: special tool steel, oil-hardened
- specially for cable according to US specifications (AWG)

Precisely and reliably

Two pairs of blades (1) cut the insulation to a complete extent. Then the blade pairs move apart, and thus the insulation is removed form-fit (2). The pliers open automatically after the stripping procedure.

Principle of operation with adapted blades

Properly and precise stripping with an annular cut through the complete insulation. This is particularly important with conductors, which must be stripped precisely.

This works without any problem even with difficult insulating materials made of PTFE, Radox® and multilayer insulations.

Article No.	12 12 14
EAN	4003773077541
Pliers	burnished
Handles	with multi-component grips
AWG	16, 18, 20, 22, 24, 26
Length mm	195
Net weight g	450

12 12 02 with cable guide and length stop

Precise cutting of the insulation to a complete extent

Positive stripping thanks to precise shape of the blades

technical change and errors excepted

Spare Parts
