

Pulse Withstanding Fusible Flameproof Metal Film Resistors

EMC Series

- UL1412 recognised*
- Failsafe 240V mains fusing
- Good pulse handling capability
- Small size for power rating
- UL94-V0 flameproof protection

* Values 22R and above. UL file number E234469

All parts are Pb-free and comply with EU Directive 2011/65/EU (RoHS2)

Electrical Data

		EMC2
Power rating at 70°C	Watts	2
Resistance range	Ohms	4R7 – 68R
TCR (25 to 75°C)	ppm/°C	100
Isolation Voltage	Volts	500
Resistance Tolerance	%	10, 20
Standard Values		E12
Thermal Impedance	°C/Watt	82
Ambient temperature range	°C	-55 to +155

Physical Data

Dimensions (mm) & Weight (g)								
Type	L max	D max	f min	d nom	PCB mount centres	Min bend radius	Wt. nom	
EMC2	10	4	27	0.8	18.4	1.2	0.55	

Construction

The metal film is deposited onto a high purity ceramic rod. End caps are force fitted and termination wires are welded to the end caps. Finally, a cement protection is applied to the resistor body prior to marking with indelible ink. The cement protection is applied in a manner that leaves the terminations completely clear. This permits a well-defined body length (clean lead to clean lead dimension L).

Terminations

Material: Solder-coated copper wire

Strength: The terminations meet the requirements of IEC 68.2.21

Solderability: The terminations meet the requirements of IEC 115-1 Clause 4.17.3.2

Solvent Resistance

The body protection and marking are resistant to all normal industrial cleaning solvents suitable for printed circuits.

General Note

TT Electronics reserves the right to make changes in product specification without notice or liability.

All information is subject to TT Electronics' own data and is considered accurate at time of going to print.

EMC Series

Flammability

The resistor coating is UL94-V0 rated and will not burn or emit incandescent particles under any condition of applied temperature or power overload.

Marking

EMC resistors are colour coded with five bands. Four of the bands indicate value and tolerance in accordance with IEC62. Parts with 20% tolerance have no fourth band. A fifth yellow band denotes constant voltage fusibility.

Performance Data

		Maximum
Load at Rated Power: 1000hrs @ 70°C	ΔR%	5
Shelf life: 12 months at room temperature	ΔR%	2
Derating from rated power at 70°C		Zero at 155°C
Climatic	ΔR%	3
Climatic Category		50/155/56
Temperature rapid change	ΔR%	0.5
Resistance to solder heat	ΔR%	0.5

Pulse Performance

EMC Series

Application Notes

- 1. If the resistors are to dissipate full rated power, it is recommended that the terminations should not be soldered closer than 4mm from the body.
- 2. Due to operating temperature limits imposed by some PCB materials, derating may be necessary. An estimate of the temperature rise to be expected can be calculated using the thermal impedance figures given under Electrical Data.
- 3. To protect against fire under all conditions of overload, a positive clearance of at least 13mm should be provided between the body of the resistor and any combustible materials.
- 4. EMC resistors can also be supplied loose packed with radial, goalpost or lancet pre-formed leads, tape packed with radial pre-formed leads, or in blister tape with Z-formed leads for SMD mounting. Consult factory for details.

Packaging

Our standard packaging for EMC is taped and boxed. The critical dimensions are shown in Figure 1. The component wires will not protrude beyond the outside edge of the tapes. Alternative packaging is available by request.

Standard Quantities Per Package

Type	EMC2
Ammo Pack	2000

Ordering Procedure

Specify type reference, value and tolerance as shown in this example of EMC2 at 33Ω, 20%:

Type

Value (use IEC62 code)

Tolerance (use IEC62 code)

Packing

EMC2 - 33R
