

Power supply unit for LCDs

BP5302 / BP5302F

The BP5302 and BP5302F are DC / DC converter units for supplying power to liquid crystal display (LCD) panels. The ICs supply a negative voltage from a positive power supply. They are available in a single in-line package as an upright (BP5302) or L-shaped lead (BP5302F) type.

●Applications

LCD panels in personal computers, word processors, copiers and facsimiles

●Features

- 1) Wide input voltage range. (+ 5 to + 14V)
- 2) Accurate output voltage. ($-24 \pm 0.75\text{V}$)
- 3) High conversion efficiency. (typically 80%)
- 4) Built-in protection circuit.
- 5) Built-in ON / OFF switch.
- 6) Compact and light.
- 7) Available as an upright or L-shaped lead type.

●Pin descriptions

Pin No.	Pin name	Functions
1	C_o	Output smoothing capacitor connection; connect a low-impedance capacitor with a recommended capacitance of $47\ \mu\text{F}$ between this pin and GND
2	V_{OUT}	Output
3	V_{ref}	Output voltage pin for contrast adjustment; output voltage is adjusted by connecting a resistor between pins 2 and 3 or pins 3 and 4
4, 7	GND	Ground
8	V_{CTL}	Output ON/OFF control; output starts when the pin is HIGH level, and stops when the pin is LOW or OPEN
9	V_{IN}	Input; connect a low-impedance capacitor with a recommended capacitance of $100\ \mu\text{F}$ between this pin and GND

● Measurement circuit and application example

Fig. 1

C1: 100 μ F / 16V (NICHICON PL-series or equivalent)

C2: 47 μ F / 35V (NICHICON PL-series or equivalent)

R1, R2: Resistors for adjusting output voltage (disconnected during test measurement)

● Operation notes

(1) Place I / O external capacitors as near as possible to the connection pins. In particular, make sure to minimize the impedance between the input-side capacitor (C1) and pin 9.

(Reference valve: A length less than 50mm is recommended for a copper foil of 1.0mm wide and 35 μ m thick.)

(2) Avoid frequent switching using the ON / OFF CTL pin (5 times per second at the maximum).

(3) R1 and R2 resistors, which are used for changing the output voltage, are usually not required.
