Accuride®

4120/4140

Super Heavy-Duty Slides

Accuride's product range is expanded with the addition of two super heavy-duty slides designed to carry loads up to 966 pounds. Made of aluminum with stainless steel components, these products have corrosion resistance for applications exposed to moisture and high humidity.

Features & Benefits

- **Model AL4120:** 3/4 extension and up to 966-pound load rating.
- **Model AL4140:** full extension and up to 882-pound load rating.
- **Load ratings** are based on a pair of slides spaced 24" apart and tested to 10,000 cycles.
- **Lightweight aluminum** — combined with stainless steel ball bearings and ball retainers provides corrosion resistance and strength without the additional weight of steel slides.
- **Non-disconnect** — for added strength.
- **RoHS compliant**

Availability

- **Lengths:** 16", 20", 24", 28", 32", 36", 40", 44" and 48".
The lengths indicated in inches are approximate conversions from the metric measurements. Please see technical sheet for exact dimensions.
- **Fasteners** are not included.
