800/1 Z

05072059001 1 x 1 x 5.5 x 25 mm
05072061001 1 x 1.2 x 6.5 x 25 mm

868/1 Z

05066405001 1 x # 1 x 25 mm
05066410001 1 x # 2 x 25 mm

Kraftform

Prevents hand injuries

Fine-tooth design

Fine adjustment work

The basic idea for the prototype of the Kraftform handle – that the hand should dictate the design – has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

Fine action 44 tooth system for precision work. Great time savings when screwdriving.

Additionally, the lockable neutral position permits exact adjustment work without having to change the screwdriving direction every time. Lockable neutral position for fine adjustment work.
