

## Medium Lights

### #3600 LITTLE ED

Little in size. Big in Performance. Pelican's rugged Big Ed meets the sleek design of the StealthLite®. Little Ed is these two powerful lights in one and guarantees to offer the high performance found in all Pelican flashlights.

This new right angle flashlight is similar to Pelican's Big Ed in design, but substantially smaller in size. The slender Xenoy body of Little Ed is lightweight and effortlessly clips to a turnout coat or shirt pocket. Little Ed's adjustable head makes it easy to maneuver the bright Xenon beam. Standing at just 7 inches tall, will be available in both an alkaline and rechargeable version.
