

UPC Code : 078477509111

Country Of Origin : United States

OSSMD-GAE

No neutral, dual relay, multi-tech occupancy sensor, 120/208/220/230/240/277v; 50/60Hz, CEC Title 20/24 compliant. Made in USA. Color: Black

The OSSMD provides automatic lighting control for two separate loads from a single unit. It is compatible with incandescent, fluorescent, low-voltage lighting, and fan loads. The unit features dual manual-override switches that can be used to toggle the ON/OFF status of each lighting load while an area is occupied. The OSSMD can be installed in place of two single-pole wall switches and fits in a standard single-gang wall box.

Technical Information

Mechanical Specifications

Adjustment : Self-Adjusting

Code Compliance : California Title 24

Color : Black

Consumption (mA) : N/A

Coverage (Sq.Ft.) : 2400

Device Type : Occupancy Sensor

Domestic Content : Made in USA

Grade : Commercial

HVAC Relay : N/A

LED Color : Green and Red

Load Rating : 800W@120V INC
1200VA@120V 2700VA@277V FL

Motor : 1/4 HP @ 120V

Mounting : Wall Switch

Mounting Height (Ft.) : 4 Ft.

Neutral Wire Connection : Not Required

Number of Relays : 2

Pattern : 180°

Photocell : Internal

Power Pack : External Power Pack Not Required

Product Line : OSSMD

Relative Humidity : 20% to 90% non-condensing

Relay Type : Dual Relay

Secondary Relay : 800W@120V INC
800VA@120V 1200VA@277V FL

Size : 4.06" H x 1.75" W x 1.85" D
(103.2mm x 44.4mm x 47.2mm)

Standards and Certifications : ETL/C-ETL

Storage Temperature Range : -10°C to 85°C

Switch Type : Single-Pole, Dual Relay

Technology : Multi-Technology
PIR/Ultrasonic

Time Delay : 30s-30m

Voltage : 120/277 VAC

Wallplate : Order Separately

Warranty : 5-Year Limited

Product Features

Color : Black

Coverage (Sq.Ft.) : 2400

Made in USA : Yes

Product Line : OSSMD

Sensor Type : Wall Switch

Technology : Multi-Technology
PIR/Ultrasonic

Standards and Certifications

NAFTA Compliant : Yes

Title 24 Compliant : Yes

Electrical Specifications

Frequency : 50/60Hz

Voltage : 120/277 VAC

Features and Benefits

- Provides automatic lighting control for two separate banks of fluorescent, incandescent, or low-voltage lighting from a single unit.
- The second relay is a manual-ON only with a maximum 30 minute time-out for maximum energy savings to comply with CEC Title 24.
- Fits in a standard single-gang wall box and replaces two single-pole wall-switches for fast and easy installation; neutral and ground connection required for OSSMD-MD. OSSMD-GD does not require a neutral for installation.
- Low-profile design eliminates obtrusive "scanning-device" look. Elegant Decora wallplates complement any interior for sleek aesthetics; uses Decora wallplates

and coordinates with Leviton's popular line of Decora wiring devices.

- 180° field-of-view provides approximately 2400 square feet of coverage, suitable for a variety of commercial areas.
- Convenient pushbuttons provide manual-ON/OFF light switching of each load at any time.
- Segmented Fresnel lens provides optimum sensitivity and performance. Designed with an extensive "minor motion" area where even slight body movements will be detected.
- Vandal resistant PIR lens.
- Adjustable horizontal field-of-view (PIR) may be adjusted between 180° and 60° of arc by using integral blinders located on either side of the lens. No masking tape required.
- Manual-ON/auto-OFF mode for installations where manual-ON switching is required but auto-OFF switching is still desired for CEC Title 24 energy savings.
- To comply with CEC Title 24, LED indicator light flashes when sensor detects motion to verify detection is active. Green flashes for ultrasonic, red flashes for PIR.
- Time delay adjustment for delayed-OFF time settings of 30 seconds (for walking test), 10 minutes, 20 minutes, and 30 minutes. Allows customized adjustments to maximize energy savings.
- Light sensor measures the ambient light in the room when it first detects motion and leaves the lights OFF (hold-off) if there is enough light in the room or turns the lights connected to the first relay ON if there is not enough light in the room.
- Self-Adaptive technology eliminates callbacks for adjustments. Time delay and sensitivity settings are continually adjusted to occupant patterns of use in auto adapt mode.
- Exclusive Walk-Through feature provides increased energy savings by not leaving the lights ON for an extended period after only momentary occupancy.
- Non-Adaptive Mode disables self-adjusting delayed-OFF time and walk-through feature in applications where these feature are not desired. Optional manual adjustment for delayed-OFF time settings allows customized adjustments to maximize energy savings.
- Vacancy confirmation; when the time out expires and the relay turns OFF, a 30-second vacancy confirmation exists to turn the relays back ON.
- False detection circuitry.
- U/S technology provides excellent minor motion sensitivity.
- Ability to disable PIR or U/S for added flexibility.
- Presentation Mode feature for slide or film presentations allows pushbuttons to turn lights OFF and keep them OFF while the room is occupied.
- Exclusive Leviton High Inrush Stability (H.I.S.) Circuitry. Specifically designed to handle today's high inrush electronic ballast loads and offer unmatched durability and service.
- One unit can be used for 120V through 277V lighting. Compatible with both

electronic and magnetic ballasts.

- True zero-cross relay switches at the zero crossing point of the AC power curve to ensure maximum contactor life and compatibility with electronic ballasts.
