

New!

Ex SERIES Pliers and Cutters

Lindstrom introduces three new ranges of exciting and extremely comfortable precision handtools, the **EX Series**, featuring **EX Cutters** and **EX Pliers**.

- Precision joints and hardened carbon steel cutting edges provide consistent high performance
- Ergonomically designed, high-friction grips for safe and sure operation
- Over 40 new part numbers round out the Lindstrom pliers and cutters offering
- ESD safe for use in sensitive environments
- Replaces a wide variety of popular part numbers

EX Series Ergonomic Cutters

Wide, ergonomically correct handles distribute even and soft hand pressure while the high-friction outer grips and tuned spring sets allow precise and secure handling with maximum comfort. Induction hardened, high chromium steel alloy and high technology screw joint offer precision alignment and extended tool life.

582 EI	Tapered, flush, angle head cutter
588 EI	Tapered & relieved, flush, 15° angle head cutter
592 EI	Small, semi-flush, tapered & relieved head cutter
595 EI	Small, semi-flush, tapered soft wire cutter
610 EI	Extra small, flush, oval head cutter
611 EI	Extra small, semi-flush, oval head cutter
670 EI	Medium, relieved, flush cutter
675 EI	Tapered, flush, 45° angled tip cutter
676 EI	Extra small, tapered & relieved, flush cutter
677 EI	Extra small, ultra-flush diagonal cutter
694 EI	Relieved flush, 60° angle head cutter
776 EI	Medium, tapered & relieved, ultra-flush cutter
777 EI	Medium, tapered, ultra-flush diagonal cutter
1710 EI	Extra small, ultra-flush diagonal cutter
1776 EI	Extra small, relieved, ultra-flush diagonal cutter
1777 EI	Extra small, tapered, ultra-flush diagonal cutter
1794 EI	Extra small, ultra-flush oblique cutter

Ex SERIES

EX '80 Series' Ergonomic Cutters

Induction hardened, honed cutting edges and strong high chromium steel alloy provide for consistent cuts and long tool life. High technology screw joint offers precision alignment over extended tool life. New ergonomic handles distribute correct pressure to hand surfaces through soft contact with the high-friction outer grips.
