ETHERNET-HSMC Card

(Currency: USD)

[Buy it now](#)

The Terasic HSMC-NET is a Gigabit Ethernet transceiver with a High Speed Mezzanine Connector (HSMC) interface. It offers network transfers of up to 1 Gbps with the host board using a HSMC connector. Also, it provides a fully integrated Ethernet solution enabling fast implementation design, shortening development times, and allows you to focus on the core functions of the system design. Lastly, the HSMC-NET can be connected any HSMC/HSTC interfaces.
